Mr. Speaker then said:—

May it please Your Honour:

We, Her Majesty's most dutiful and faithful subjects, the Legislative Assembly of the Province of Ontario, in Session assembled, approach Your Honour with sentiments of unfeigned devotion and loyalty to Her Majesty's person and Government, and humbly beg to present for Your Honour's acceptance a Bill intituled, "An Act for granting to Her Majesty certain sums of money for the Public Service for the fiscal years ending the 31st day of March, 1958, and the 31st day of March, 1959."

To this Act the Royal Assent was announced by the Clerk of the Legislative Assembly in the following words:—

"The Honourable the Lieutenant-Governor doth thank Her Majesty's dutiful and loyal Subjects, accept their benevolence and assent to this Bill in Her Majesty's name."

The Honourable the Lieutenant-Governor was then pleased to deliver the following gracious speech:—

Mr. Speaker and Members of the Legislative Assembly of Ontario:

Before proroguing this Fourth Session of the Twenty-fifth Parliament, I wish to commend you for the thoughtful consideration and unflinching attention you have given to the affairs of this Province. Rapid growth and social and economic change have imposed upon you heavy responsibilities. During the Session now closing you have studied and passed more than 180 Bills and approved a many-sided program to promote the economic and social well-being of our people. Although many matters have commanded your attention, ten stand out as being of paramount importance.

First, you have adopted a well-conceived and soundly-planned program of capital projects and works which will add to the productive assets of our people and sustain and create employment and income. The magnitude of this program is unprecedented. It is estimated that in the coming fiscal year, the Province, together with the municipalities and the various commissions and agencies, will spend on the construction of new assets and the repair of existing facilities a total of \$955 million. This expenditure will provide employment for 235,000 on-site and off-site workers.

Second, you have authorized a record-breaking increase in provincial assistance to the municipalities and other local agencies. You have provided more money, not only for schools but for hospitals and roads, and you have increased the appropriation for unconditional grants. You have approved provincial payments to the municipalities and local agencies totalling \$260 million, an increase of more than \$45 million over the appropriation last year. That is an increase without parallel in the annals of the Province. It will go a long way towards stabilizing local tax rates and indeed, in many instances, in effecting rate reductions that will be translated into immediate benefits to the local taxpayer.

Various other steps have been taken to improve the municipal position. A comprehensive program of sewer and water works financed by and carried out under the direction of the Ontario Water Resources Commission has been approved. More than 150 municipalities have availed themselves of the funds of the Ontario Municipal Improvement Corporation and this number will be substantially increased during the next fiscal year. Legislation has been passed to reinforce provincial and municipal welfare arrangements. In many instances, the Province has assumed a greater proportion of these costs and thereby relieved the municipality and the homeowner.

Amendments have been made to The Assessment Act and a new Act—The Municipal Franchise Extension Act, 1958—has been passed empowering municipalities to extend the right to vote for council members to all persons of the full age of 21 years who are British subjects and who have resided in the municipality for at least one year. Additional funds have been provided for mining, logging and community access roads and for assisting mining municipalities.

Third, you have authorized a greatly expanded program of assistance for education. The Province's grants to local school boards are being increased by 33 per cent and several other improvements are being made to strengthen the educational fabric of the Province. Coincidental with the increase in school grants to \$133 million, a new system of distribution has been adopted, which, being based on equalized assessment factors, provides equality of opportunity for education in all parts of Ontario as never before. A growth-need factor has been built into the new grants formula to meet the problems of rapidly growing residential areas with a large number of children.

Besides providing elementary and secondary school grants, you have authorized payments of over \$23 million to the universities for maintenance and capital purposes. Good progress is being made on the construction of facilities for the Ryerson Institute and for new teachers' colleges. The bursary system has been expanded and a new student loan fund introduced. In addition to the normal contribution of \$10.5 million that the Province now makes for teachers' superannuation, you have again provided for a special payment into this fund of \$1.0 million. To implement these various educational policies, you have authorized appropriations totalling \$177 million, an increase in this one year alone of over 26 per cent.

Fourth, a series of measures that will contribute materially to Ontario's health and welfare services has been adopted. Foremost among these is hospital insurance. The first agreement between any province and the Federal Government was signed by Ontario last March 3rd. This agreement has now become a model for the agreements with the other provinces. In conformity with this agreement and the Federal Act, amendments have been made to The Hospital Services Commission Act of Ontario, enabling hospital insurance to become a reality in Ontario next January 1st. Another notable advance has been the Province's doubling of its capital grants for the construction of public general, convalescent and chronic hospitals.

You have approved the adoption of The Home-makers and Nurses Services Act, 1958, which provide for provincial-municipal sharing of the cost of providing home care and nursing services under certain condition. Other notable improvements have also been made. The Province will share with the municipalities on an 80-20 basis, up to a maximum of \$100 per month per person, the cost of maintaining needy persons in nursing homes. Any municipality with a population of more than 15,000 may now establish a home for the aged, while an amendment to The Charitable Institutions Act provides a new basis for paying subsidies to institutions operated as homes for the aged. The Child Welfare Act has been revised to strengthen and clarify the adoption process and the status of the adopted child. Amendments have also been made to The Disabled Persons' Allowances Act, The Old Age Assistance Act and The Mothers' and Dependent Children's Allowances Act in order to bring this legislation into line with current administrative arrangements. Amendments to The Indian Welfare Services Act broaden the basis of payment of mothers' allowances to Indian mothers with dependent children and enable agreements to be made with the Government of Canada with respect to welfare assistance to Indians.

Measures have been adopted to improve the machinery for providing direct relief to unemployed workers and also for creating certain types of emergency employment. The Province has raised its share of direct relief assistance to needy persons from 60 to 80

per cent and has thereby reduced the municipal proportion from 40 to 20 per cent. In this way, we are meeting the essential needs of workers who have either exhausted their unemployment insurance benefits or who are not eligible to receive them. The Province has also introduced an emergency works program under which it undertakes to reimburse municipalities to the extent of 70 per cent of their direct labour costs incurred between February 15th and May 31st, 1958, on approved municipal projects or works undertaken in the municipality. The program is designed to furnish employment to those who are eligible for direct relief and who are capable of working.

The Air Pollution Control Act has been passed to provide for the control of air contaminants, to facilitate air pollution research and to empower municipalities to pass and enforce air pollution by-laws.

Fifth, plans for carrying out an expanded resource conservation and development program have received your close attention. Substantial increases in appropriations have been made to enlarge the Ontario Agricultural College and Veterinary College facilities and to promote research in agriculture and forestry. Amendments have been made to The Farm Products Marketing Act and to The Milk Industry Act. Under the latter, the Milk Industry Board may act as an arbitrator in disputes. Loans are continuing to be made under The Junior Farmer Establishment Act.

Sixth, progress has been made with the Federal Government on tax-sharing arrangements and other matters. The Province's revenue under its income tax rental agreement has been enhanced by an amendment to the Tax-Sharing Arrangements Act which—for the year 1958—has increased the Province's share of the personal income tax field from 10 to 13 per cent of the Federal tax. An Agreement has been signed under which the Federal Government contributes 50 per cent of the cost of direct relief. In connection with hospital insurance, the Federal Government has undertaken to remove the restriction that would prevent it from contributing until six provinces, having a majority of the Canadian population, had plans in operation.

Seventh, steps have been taken to deter discrimination and fortify individual freedom. The Ontario Anti-Discrimination Commission Act, 1958, establishes a commission to secure the elimination of discriminatory practices under the authority of the following Acts: The Fair Employment Practices Act, The Female Employees Fair Remuneration Act and The Fair Accommodation Practices Act.

Eighth, despite the huge capital works program upon which we have been engaged, there are no new taxes or increases in taxes. Indeed, we have reduced the diesel fuel tax by $1\frac{1}{2}$ cents a gallon. Furthermore, an amendment to The Corporations Tax Act, passed at this Session, allows an allocation of corporation profits among provinces that avoids the taxation of corporation profits by one province that are taxable by another province. It also brings the Ontario Act into closer relationship with the provisions of The Income Tax Act (Canada).

Ninth, two measures which will promote the more efficient utilization and recruitment of civil service personnel have been adopted. Under one amendment to The Public Service Act, pension rights may be vested and annuities established for employees who have ten or more years' service and contributions to the Public Service Superannuation Fund. Another amendment enables superannuated civil servants to be appointed in special capacities without interfering with their pensions or requiring them to make additional contributions to the superannuation fund.

Tenth, fewer services will have more enduring benefits than the expansion of the provincial parks system. At present the Province is seeking the acquisition of an additional 20 parks. To implement this policy and also to bring into reality the St. Lawrence Parks System from the Bay of Quinte to the Ontario-

Quebec boundary, nearly \$6 million is being provided for the year 1958-59. Many other Acts have been passed covering a variety of subjects dealing with the welfare of our people and the progress of our Province.

To the various standing and select committees of the House, I wish to extend sincere thanks for their conscientious devotion to the requirements of this Province. I wish to thank the Honourable Members, too, for the financial provisions that they have made. Despite the heavy demands that are created by education and many other provincial and municipal services, the financial position of the Province is strong. However, it can be kept that way only by a most careful husbanding of our financial resources.

Looking into the future, the economic outlook is not trouble-free, yet it is one in which we have confidence. With our growing population, modern industry and our favourable resource-population ratio, our long-term future cannot be other than bright. The volume of construction in Ontario is higher this year than even that of a year ago, while overall capital investment intentions approximate last year's exceedingly high level. The Province has taken steps to bolster employment through public works. Credit has been eased both in Canada and abroad, and interest rates have been reduced. We have before us opportunities unexcelled in our history.

Gratitude is expressed to the public servants of Ontario for the faithful discharge of their duties and responsibilities.

I pray that Divine Providence may guide and bless you and promote the well-being of this Province and Nation.

The Provincial Secretary then said:—

Mr. Speaker and Members of the Legislative Assembly:

It is the will and pleasure of the Honourable the Lieutenant-Governor that this Legislative Assembly be prorogued and this Legislative Assembly is accordingly prorogued.

On Thursday, February 20th, 1958, the Honourable the Lieutenant-Governor entered the Chamber of the Legislative Assembly and took his seat upon the Throne.

Mr. Speaker addressed His Honour in the following words:

"May it please Your Honour:

The Legislative Assembly of the Province has at its present Sittings thereof passed a certain Bill to which, in the name and on behalf of the said Legislative Assembly, I respectfully request Your Honour's Assent."

The Clerk Assistant then read the title of the Bill that had passed, as follows:—

"The following is the title of the Bill to which Your Honour's Assent is prayed:—

An Act to amend The Hospital Services Commission Act, 1957."

To this Act, the Royal Assent was announced by the Clerk of the Legislative Assembly in the following words:—

"In Her Majesty's name, the Honourable the Lieutenant-Governor doth assent to this Bill."

RODERICK LEWIS, Q.C.,
Clerk of the Legislative Assembly
of Ontario.

Applications to Parliament Private Bills

PUBLIC NOTICE

LEGISLATIVE ASSEMBLY OF ONTARIO

The attention of Municipal Officials, Solicitors and all other persons who may be interested in the preparation of Private Bills for submission to the Legislative Assembly of Ontario is directed particularly to the following Rules of the House governing the submission of such Bills:

RULES RE SUBMISSION OF PRIVATE BILLS

63.—(1) No petition for any Private Bill is received by the House after the first two weeks of each Session nor may any Private Bill be presented to the House after the first three weeks of each Session; nor may any report of any Standing or Select Committee upon a Private Bill be received after the first six weeks of each Session and no motion for the general suspension or modification of this Rule shall be entertained by the House unless after reference made thereof, at a previous sitting of the House, to the several Standing Committees charged with the consideration of Private Bills upon Report submitted by two or more of such committees.

64.—(1) Any person desiring to obtain a Private Bill shall deposit with the Clerk of the House at least eight (8) days before the meeting of the House a copy of such Bill together with a fee of \$150, and if such Bill is not deposited by that time the applicant shall pay \$10 for each and every day which intervenes between the said eighth day and the date of the filing of the Bill.

(2) After the first reading of the Bill and before its consideration by the Committee to which it is referred, the applicant in every case shall pay the cost of printing the Act in the Statutes.

(3) The following charges shall also be levied and paid in addition to the foregoing:

(a) When any rule of the House is suspended with reference to a Bill or the Petition therefor, for each suspension, \$50.

(b) When a Bill is presented to the House after the first three weeks of the Session and before the end of the fourth week, \$75.

(c) When a Bill is presented after the fourth week of the Session, \$100.

(4) In case of any Bill incorporating a company or increasing the capital stock of a company already incorporated, there shall be paid to the Clerk of the House, by or on behalf of the applicant, before the same is reported to the House, the same fee as would be payable to the Provincial Secretary in the case of an incorporation or increase of capital under the provisions of The Ontario Companies Act, less the sum of \$150 already paid to the Clerk of the House.

(5) When a Bill is for the purpose of confirming by-laws, bonds, debentures or other securities, or authority is asked to borrow money or to increase borrowing powers, the following additional fees shall be paid according to the amount of money involved:

On amounts less than \$10,000, \$25; on amounts over \$10,000 and up to \$25,000, \$50; on amounts over \$25,000 and up to \$40,000, \$75; on amounts over \$40,000 and up to \$75,000, \$100; on amounts over \$75,000 and up to \$125,000, \$125; on amounts over \$125,000 and up to \$175,000, \$150; on amounts over \$175,000 and up to \$250,000, \$200; on amounts over \$250,000 and up to \$350,000, \$250; and an additional fee of \$50 for every \$100,000 over \$350,000.

66. All applications for Private Bills properly the subject of legislation by the Legislative Assembly of Ontario, within the purview of "The British North America Act, 1867," shall require a Notice, clearly and distinctly specifying the nature and object of the application and, where the application refers to any proposed work, indicating generally the location of the work, and signed by or on behalf of the applicants, such Notice to be published as follows, viz.:

A notice inserted in THE ONTARIO GAZETTE and in one newspaper published in the Municipality affected, or if there be no newspaper published therein, then in a newspaper in the next nearest municipality in which a newspaper is published.

Such notice shall be continued in each case for a period of at least six weeks, during the interval of time between the close of the next preceding Session and the consideration of the Petition.

If the application is by a Municipal Corporation for authority to issue debentures the notice shall set out the particulars of the existing debenture debt and the amount of rateable property of the Municipality according to the last revised assessment roll of the Corporation, and in brief and general terms, the object for which the new issue of debentures is required.

67. Before any Petition praying for leave to bring in a Private Bill for the erection of a Toll Bridge is received by the House, the person or persons intending to petition for such Bills shall, upon giving the Notice required by preceding Rule, also, at the same time and in the same manner, give Notice of the rates which they intend to ask, the extent of the privileges, the height of the arches, the interval between the abutments or piers for the passage of rafts and vessels, and mentioning also whether they intend to erect a drawbridge or not, and the dimensions of the same.

68. Before any Petition praying for leave to bring in a Bill for the construction of Railways, Tramways or canals is received by the House, the person or persons petitioning for such Bill shall deposit with the Clerk the following documents:

1. A map or plan upon a scale of not less than half an inch to the mile, showing the location upon which it is intended to construct the proposed work, and showing also the line of existing or authorized works of a similar character within, or in any way affecting the district or any part thereof which the proposed work is intended to serve. Such map or plan to be signed by the Engineer or other party making the same.

2. A book of reference in which shall be clearly set out the following information in separate schedules, namely:

SCHEDULE A.—The name of each municipality within which the proposed works or any part thereof are intended to be constructed; the population of each such municipality as returned by the next preceding census, the rateable value of the property within each such municipality, as returned by the next preceding assessment rolls thereof; and this schedule may contain in a separate statement similar information as to the adjoining districts intended to be served by the proposed work.

SCHEDULE B.—A general description of the nature, extent and proposed character of the contemplated works, and an estimate of the probable cost thereof, distinguishing the general items of construction and the cost thereof respectively, as well as the nature, extent and probable cost of all engines and car stock or other outfit or equipment necessary to the use and operation of the proposed undertaking, such schedule to be signed by the Engineer, or other person preparing the same.

SCHEDULE C.—An exhibit showing the total amount of capital proposed to be raised for the purposes of the undertaking and the manner in which it is proposed to raise the same, whether by ordinary shares, bonds, debentures or other securities, and the amounts of each respectively.

SCHEDULE D.—An estimate of the probable revenues of the proposed undertaking showing the sources whence the same are expected to be derived; the annual earnings thereof respectively; the probable annual cost of operation or working expenditure, and the annual net revenue applicable to the payment of interest on the proposed investments, such schedules to be signed by the person preparing the same.

72. When any Bill for confirming any Letters Patent, or Agreement, is presented to the House, the copy of such Letters Patent, or Agreement, shall be attached to it.

74. Every Private Bill, when read a first time shall unless it be an Estate Bill or a Bill providing for the consolidation of a floating debt or for the consolidation or renewal of debentures (other than local improvement debentures) of a Municipal Corporation, shall stand referred to the proper Standing Committee, and all petitions before the House, for or against the Bill, are considered referred to such Committee.

75. Every Private Bill, in so far as it provides for the consolidation of a floating debt or for the consolidation or renewal of debentures (other than local improvement debentures) of a Municipal Corporation when a Bill has been read the first time, shall, without special reference, stand referred to The Ontario Railway and Municipal Board for their report; and a copy of such Bill and of the Petition on which the same is founded shall be forthwith transmitted by the Clerk of the House to the Board, in order that the Board may, after an inquiry into the allegations set out in the Bill, and into any other matters which the Board may deem necessary in connection therewith, report to the House whether or not it is reasonable that such Bill or part thereof relating to the matters aforesaid shall be passed; and what alterations, if any, should be made in the same, and the Board shall make such inquiry accordingly and shall sign the same; and the said Report, Bill and Petition shall be transmitted to the Clerk, and the Report shall be read by the Clerk at the Table and shall be entered on the Journals of the House, and the Bill, together with the Report, shall stand referred to the Standing Committee on Private Bills.

76. Every Estate Bill, when read a first time shall without special reference, stand referred to the Commissioners of Estate Bills, for their Report, and a copy of such Bill, and of the Petition on which the same is founded, shall be forthwith transmitted by the Clerk of the House to the said Commissioners, or one of them, in order that they, or any two of them, may, after perusing the Bill, without requiring any proof of the allegations thereof, report to the House their opinion thereon under their hands; and whether presuming the allegation contained in the preamble to be proved to the satisfaction of the House, it is reasonable that such Bill do pass into a law; and whether the provisions thereof are proper for carrying its purposes into effect, and what alterations or amendments, if any, are necessary in the same, and in the event of their approving the said Bill they are to sign the same; and the said Report, with the said Bill and Petition, are to be transmitted by the said Commissioners to the Clerk; and the Report shall be read by the Clerk at the Table and shall be entered on the Journals of the House; and the Bill, together with the report shall stand referred to the Standing Committee on Private Bills, which is not to consider the said Bill, before the delivery of the said Report, Bill and Petition to the Chairman of the said Committee.

77. In the event of the Commissioners of Estate Bills reporting that, in their opinion, it is not reasonable that the Bill submitted to them shall pass into law such Bill shall not be further considered.

RODERICK LEWIS
Clerk of Legislative Assembly
of Ontario.

THE GAME AND FISHERIES ACT

O. Reg. 69/58.

Fishing Licences.

Amending O. Reg. 257/56.

Made—20th March, 1958.

Filed—24th March, 1958.

REGULATIONS MADE UNDER THE GAME AND FISHERIES ACT

1. Clause *b* of subregulation 2 of regulation 3 of Ontario Regulations 257/56 is revoked and the following substituted therefor:

(*b*) that part of Lake Erie easterly of a line drawn south 21 degrees 30 minutes east astronomically or approximately south 16 degrees 30 minutes east magnetically from a point where the high-water mark on the northerly shore of Lake Erie is intersected by the boundary between the counties of Elgin and Kent and authorizes the estimated taking of more than 15 tons of fish, is \$125;

(*bb*) that part of Lake Erie mentioned in clause *b* and authorizes the estimated taking of not more than 15 tons of fish, is \$50;

2. Regulation 8 of Ontario Regulations 257/56, as amended by regulation 1 of Ontario Regulations 3/58, is revoked and the following substituted therefor:

8.(1) The holder of a licence in form 9 shall pay, on or before the 31st of January next following the expiry of the licence, a royalty

(*a*) of $\frac{1}{4}$ cent a pound on the aggregate weight of blue pickerel, lake trout, sturgeon, whitefish and yellow pickerel in excess of

(i) 5 tons for each 3,000 yards of gill-net authorized by the licence and taken under the licence from Lake Superior, Lake Huron, including North Channel and Georgian Bay, Lake Erie, except that part described in clause *b* of subregulation 2 of regulation 3, and Lake Ontario, except the bays mentioned in sub-clauses ii, iii, and iv;

(ii) 10 tons taken under the licence from Bay of Quinte of Lake Ontario;

(iii) 5 tons taken under the licence from Presqu'ile Bay of Lake Ontario;

(iv) 5 tons taken under the licence from Weller Bay of Lake Ontario; and

(v) 10 tons for each 2,000 yards of gill-net authorized by the licence and taken under the licence from waters other than Lake Nipigon and those waters mentioned in subclauses i to iv, both inclusive, and subregulations 2 and 3, and

(*b*) of

(i) 1 cent a pound on lake trout, whitefish and yellow pickerel, and

(ii) 5 cents a pound on sturgeon

taken under the licence from Lake Nipigon.

(2) The holder of a licence in form 9 authorizing the estimated taking of more than 15 tons of fish from that part of Lake Erie mentioned in clause *b* of subregulation 2 of regulation 3 shall pay, on or before the 31st of January next following the expiry of the licence, a royalty of $\frac{1}{4}$ cent a pound on the aggregate weight of blue pickerel, lake trout, sturgeon, whitefish and yellow pickerel in excess of 60 tons taken under the licence.

(3) The holder of a licence in form 9 authorizing the estimated taking of not more than 15 tons of fish from that part of Lake Erie mentioned in clause *b* of subregulation 2 of regulation 3 who takes more than 15 tons of fish under the licence shall pay, on or before the 31st of January next following the expiry of the licence, an additional licence fee of \$75 and a royalty of $\frac{1}{4}$ cent a pound on the aggregate weight of blue pickerel, lake trout, sturgeon, whitefish and yellow pickerel in excess of 30 tons taken under the licence.

3. Ontario Regulations 257/56 are amended by adding thereto the following regulation:

9*a*. The holder of a licence in form 17 shall pay, on or before the 31st of January next following the expiry of the licence, a royalty of $\frac{1}{4}$ cent a pound on the weight of sturgeon in excess of ten tons taken under the licence.

(2) The maximum number of pupils served by a home-instruction teacher shall be 8.

(3) The maximum number of pupils served by a speech-correction teacher shall be 150.

EQUIPMENT

8. Where a board establishes an auxiliary-education class, it shall provide for the use of the pupils enrolled therein the equipment for their special needs.

QUALIFICATIONS OF TEACHERS

9. A teacher of an auxiliary-education class or a home-instruction teacher or a speech-correction teacher or an itinerant auxiliary-education teacher, appointed with the approval of the Minister, shall hold

- (a) a certificate qualifying him to teach in an elementary or secondary school, as the case may be, and
- (b)
 - (i) an Interim or Permanent Intermediate Auxiliary Education Certificate, or
 - (ii) a Specialist Certificate in Auxiliary Education.

UNQUALIFIED TEACHERS

10.(1) Where a board after advertising and offering a salary is unable to obtain a qualified teacher, the Minister, upon the application of the board, may accept other qualifications he deems equivalent thereto under clause *b* of subsection 1 of section 11 of the Act.

(2) Where the Minister accepts the qualifications of an unqualified teacher, the board may engage that teacher for all or part of a school year.

GRANTS FOR HANDICAPPED INDIVIDUALS

11. Where

- (a) a handicapped individual requires habilitation training or assistance in order to take advantage of the regular instructional programme of an elementary or secondary school,

(b) the Superintendent of Elementary Education and the Superintendent of Special Services report to the Minister that there is urgent need for special educational services for the individual, and

(c) a duly qualified medical practitioner certifies that because of a handicap the individual is unable to take advantage of the regular instructional facilities,

the Minister may make an annual grant to assist in the provision of an instructional programme for the habilitation of the individual.

Applications to Parliament Private Bills

PUBLIC NOTICE

LEGISLATIVE ASSEMBLY OF ONTARIO

The attention of Municipal Officials, Solicitors and all other persons who may be interested in the preparation of Private Bills for submission to the Legislative Assembly of Ontario is directed particularly to the following Rules of the House governing the submission of such Bills:

RULES RE SUBMISSION OF PRIVATE BILLS

63.—(1) No petition for any Private Bill is received by the House after the first two weeks of each Session nor may any Private Bill be presented to the House after the first three weeks of each Session; nor may any report of any Standing or Select Committee upon a Private Bill be received after the first six weeks of each Session and no motion for the general suspension or modification of this Rule shall be entertained by the House unless after reference made thereof, at a previous sitting of the House, to the several Standing Committees charged with the consideration of Private Bills upon Report submitted by two or more of such committees.

64.—(1) Any person desiring to obtain a Private Bill shall deposit with the Clerk of the House at least eight (8) days before the meeting of the House a copy of such Bill together with a fee of \$150, and if such Bill is not deposited by that time the applicant shall pay \$10 for each and every day which intervenes between the said eighth day and the date of the filing of the Bill.

(2) After the first reading of the Bill and before its consideration by the Committee to which it is referred, the applicant in every case shall pay the cost of printing the Act in the Statutes.

(3) The following charges shall also be levied and paid in addition to the foregoing:

(a) When any rule of the House is suspended with reference to a Bill or the Petition therefor, for each suspension, \$50.

(b) When a Bill is presented to the House after the first three weeks of the Session and before the end of the fourth week, \$75.

(c) When a Bill is presented after the fourth week of the Session, \$100.

(4) In case of any Bill incorporating a company or increasing the capital stock of a company already incorporated, there shall be paid to the Clerk of the House, by or on behalf of the applicant, before the same is reported to the House, the same fee as would be payable to the Provincial Secretary in the case of an incorporation or increase of capital under the provisions of The Ontario Companies Act, less the sum of \$150 already paid to the Clerk of the House.

(5) When a Bill is for the purpose of confirming by-laws, bonds, debentures or other securities, or authority is asked to borrow money or to increase borrowing powers, the following additional fees shall be paid according to the amount of money involved:

On amounts less than \$10,000, \$25; on amounts over \$10,000 and up to \$25,000, \$50; on amounts over \$25,000 and up to \$40,000, \$75; on amounts over \$40,000 and up to \$75,000, \$100; on amounts over \$75,000 and up to \$125,000, \$125; on amounts over \$125,000 and up to \$175,000, \$150; on amounts over \$175,000 and up to \$250,000, \$200; on amounts over \$250,000 and up to \$350,000, \$250; and an additional fee of \$50 for every \$100,000 over \$350,000.

66. All applications for Private Bills properly the subject of legislation by the Legislative Assembly of Ontario, within the purview of "The British North America Act, 1867," shall require a Notice, clearly and distinctly specifying the nature and object of the application and, where the application refers to any proposed work, indicating generally the location of the work, and signed by or on behalf of the applicants, such Notice to be published as follows, viz.:

A notice inserted in THE ONTARIO GAZETTE and in one newspaper published in the Municipality affected, or if there be no newspaper published therein, then in a newspaper in the next nearest municipality in which a newspaper is published.

Such notice shall be continued in each case for a period of at least six weeks, during the interval of time between the close of the next preceding Session and the consideration of the Petition.

If the application is by a Municipal Corporation for authority to issue debentures the notice shall set out the particulars of the existing debenture debt and the amount of rateable property of the Municipality according to the last revised assessment roll of the Corporation, and in brief and general terms, the object for which the new issue of debentures is required.

67. Before any Petition praying for leave to bring in a Private Bill for the erection of a Toll Bridge is received by the House, the person or persons intending to petition for such Bills shall, upon giving the Notice required by preceding Rule, also, at the same time and in the same manner, give Notice of the rates which they intend to ask, the extent of the privileges, the height of the arches, the interval between the abutments or piers for the passage of rafts and vessels, and mentioning also whether they intend to erect a drawbridge or not, and the dimensions of the same.

68. Before any Petition praying for leave to bring in a Bill for the construction of Railways, Tramways or canals is received by the House, the person or persons petitioning for such Bill shall deposit with the Clerk the following documents:

1. A map or plan upon a scale of not less than half an inch to the mile, showing the location upon which it is intended to construct the proposed work, and showing also the line of existing or authorized works of a similar character within, or in any way affecting the district or any part thereof which the proposed work is intended to serve. Such map or plan to be signed by the Engineer or other party making the same.

2. A book of reference in which shall be clearly set out the following information in separate schedules, namely:

SCHEDULE A.—The name of each municipality within which the proposed works or any part thereof are intended to be constructed; the population of each such municipality as returned by the next preceding census, the rateable value of the property within each such municipality, as returned by the next preceding assessment rolls thereof; and this schedule may contain in a separate statement similar information as to the adjoining districts intended to be served by the proposed work.

SCHEDULE B.—A general description of the nature, extent and proposed character of the contemplated works, and an estimate of the probable cost thereof, distinguishing the general items of construction and the cost thereof respectively, as well as the nature, extent and probable cost of all engines and car stock or other outfit or equipment necessary to the use and operation of the proposed undertaking, such schedule to be signed by the Engineer, or other person preparing the same.

SCHEDULE C.—An exhibit showing the total amount of capital proposed to be raised for the purposes of the undertaking and the manner in which it is proposed to raise the same, whether by ordinary shares, bonds, debentures or other securities, and the amounts of each respectively.

SCHEDULE D.—An estimate of the probable revenues of the proposed undertaking showing the sources whence the same are expected to be derived; the annual earnings thereof respectively; the probable annual cost of operation or working expenditure, and the annual net revenue applicable to the payment of interest on the proposed investments, such schedules to be signed by the person preparing the same.

72. When any Bill for confirming any Letters Patent, or Agreement, is presented to the House, the copy of such Letters Patent, or Agreement, shall be attached to it.

74. Every Private Bill, when read a first time shall unless it be an Estate Bill or a Bill providing for the consolidation of a floating debt or for the consolidation or renewal of debentures (other than local improvement debentures) of a Municipal Corporation, shall stand referred to the proper Standing Committee, and all petitions before the House, for or against the Bill, are considered referred to such Committee.

75. Every Private Bill, in so far as it provides for the consolidation of a floating debt or for the consolidation or renewal of debentures (other than local improvement debentures) of a Municipal Corporation when a Bill has been read the first time, shall, without special reference, stand referred to The Ontario Railway and Municipal Board for their report; and a copy of such Bill and of the Petition on which the same is founded shall be forthwith transmitted by the Clerk of the House to the Board, in order that the Board may, after an inquiry into the allegations set out in the Bill, and into any other matters which the Board may deem necessary in connection therewith, report to the House whether or not it is reasonable that such Bill or part thereof relating to the matters aforesaid shall be passed; and what alterations, if any, should be made in the same, and the Board shall make such inquiry accordingly and shall sign the same; and the said Report, Bill and Petition shall be transmitted to the Clerk, and the Report shall be read by the Clerk at the Table and shall be entered on the Journals of the House, and the Bill, together with the Report, shall stand referred to the Standing Committee on Private Bills.

76. Every Estate Bill, when read a first time shall without special reference, stand referred to the Commissioners of Estate Bills, for their Report, and a copy of such Bill, and of the Petition on which the same is founded, shall be forthwith transmitted by the Clerk of the House to the said Commissioners, or one of them, in order that they, or any two of them, may, after perusing the Bill, without requiring any proof of the allegations thereof, report to the House their opinion thereon under their hands; and whether presuming the allegation contained in the preamble to be proved to the satisfaction of the House, it is reasonable that such Bill do pass into a law; and whether the provisions thereof are proper for carrying its purposes into effect, and what alterations or amendments, if any, are necessary in the same, and in the event of their approving the said Bill they are to sign the same; and the said Report, with the said Bill and Petition, are to be transmitted by the said Commissioners to the Clerk; and the Report shall be read by the Clerk at the Table and shall be entered on the Journals of the House; and the Bill, together with the report shall stand referred to the Standing Committee on Private Bills, which is not to consider the said Bill, before the delivery of the said Report, Bill and Petition to the Chairman of the said Committee.

77. In the event of the Commissioners of Estate Bills reporting that, in their opinion, it is not reasonable that the Bill submitted to them shall pass into law such Bill shall not be further considered.

RODERICK LEWIS
Clerk of Legislative Assembly
of Ontario.

Publications Under The Regulations Act

April 12th, 1958

THE POWER COMMISSION ACT

O. Reg. 80/58.

General Regulations.

Amending Regulations 324 of Consolidated Regulations of Ontario, 1950.

Made—19th March, 1958.

Approved—27th March, 1958.

Filed—28th March, 1958.

REGULATIONS MADE BY THE COMMISSION UNDER THE POWER COMMISSION ACT

1. In these regulations "principal regulations" means Regulations 324 of Consolidated Regulations of Ontario 1950.

2.—(1) Clause *a* of regulation 1 of the principal regulations is revoked and the following substituted therefor:

(a) "base annual earnings" means

(i) in respect of a monthly-paid employee, his base earnings multiplied by 12, and

(ii) in respect of a weekly-paid employee, his base earnings multiplied by 52.14;

(aa) "base earnings" means

(i) the weekly or monthly earnings of an employee at the standard base rate, as set out in the Commission's Management Guide, at which he is being paid for the position he is occupying, provided that in the case of an hourly-rated employee the earnings shall be calculated for the normal scheduled hours of the job not exceeding a maximum of 40 hours per week, or

(ii) in respect of a member who is in receipt of compensation under The Workmen's Compensation Act or who is on leave of absence without pay while on loan to another employer, an amount equivalent to the earnings referred to in subclause i.

(2) Clause *g* of said regulation 1 is revoked.

(3) Clause *i* of said regulation 1 is amended by striking out "effective date" in the third line and inserting in lieu thereof "1st of January 1957", and by inserting after "employee" in subclause i "in the fund and".

(4) Clause *p* of said regulation 1 is revoked.

3. Regulation 7 of the principal regulations is revoked and the following substituted therefor:

7. The Commission may retire a member on pension, or upon completion of 15 years of continuous employment a member, with the consent of the Commission, may retire on pension, on an early-retirement date at a reduced pension which is the actuarial equivalent of the pension as of his normal-retirement date accrued to the early-retirement date.

4. Regulation 8 of the principal regulations is revoked and the following substituted therefor:

8. The Commission with the member's consent may delay his retirement on pension to a postponed-retirement date but no contributions shall be made by him on and after his normal-retirement date and his pension shall commence on the postponed-retirement date.

5. Regulation 15 of the principal regulations is revoked and the following substituted therefor:

15.—(1) The annual pension, as at his normal-retirement date, of a member who has not been retired on pension prior to the 1st of January 1957, shall be the sum of

(a) 1.5 per cent of the average of his base annual earnings at the 1st of July 1955 and the 1st of July 1956 multiplied by his established service to and including the 31st of October 1948, and

(b) 2 per cent of the average of his base annual earnings at the 1st of July 1955 and the 1st of July 1956 multiplied by his established service from the 1st of November 1948 to the 31st of December 1956, both dates inclusive, or to his normal-retirement date, whichever is earlier, and

(c) 2 per cent of his premium earnings from the 1st of November 1948 to the 31st of December 1957, both dates inclusive, being the excess of earnings over his base earnings for the months of November and December 1948 and the excess of earnings over his base annual earnings at the 1st of July in each year for the years of 1949 to 1956, inclusive, and the excess of earnings over his base earnings for 1957, and

(d) 2 per cent of his base earnings in respect of which contributions have been made to the fund from and inclusive of the 1st of January 1957 to his normal-retirement date;

provided that the pension computed in accordance with clauses *a*, *b* and *c* shall not be less than the pension which would have been payable under subregulation 1 of regulation 15 as revoked and superseded by this subregulation.

(2) The annual pension of a member at an early-retirement date shall be the actuarial equivalent of the pension in subregulation 1 accrued to the early-retirement date.

(3) The pension of a person who was retired on pension from the superseded pension-fund prior to the 1st of November 1947 shall be increased 50 per cent as at the 1st of January 1957.

(4) A pension that is being paid from the fund and which commenced on or after the 1st of November 1947 and prior to the 1st of January 1957 shall be increased 15 per cent as at the 1st of January 1957.

6. Subregulation 1 of regulation 16 of the principal regulations is revoked and the following substituted therefor:

- (1) From the date of becoming a member or the 1st of January 1958, whichever is later, and until
 - (a) his normal-retirement date,
 - (b) his early-retirement date, or
 - (c) termination of his employment,

the member shall contribute 5 per cent of his base earnings to the fund towards the cost of his pension.

7. Subregulation 2 of regulation 17 of the principal regulations is amended by striking out "or pensioner" in the first line and inserting in lieu thereof "who has attained his normal-retirement date or a pensioner".

8. Regulation 19 of the principal regulations is revoked and the following substituted therefor:

19.—(1) A member may elect in writing before his retirement date to take a reduced pension, a specified percentage whereof upon his death on or after his normal-retirement date or an early-retirement date, as the case may be, shall be paid to and during the life of a surviving contingent annuitant named in the election, and the reduced pension shall be the actuarial equivalent of the member's pension under regulation 15, and subregulation 2 of regulation 17 shall not apply.

- (2) A person in receipt of a pension which commenced on or after the 1st of January 1957 may, prior to the 1st of September 1958,

(a) make an election as provided by subregulation 1,

(b) revoke an election,

and in respect of an election which is not revoked prior to the 1st of September 1958 the pension shall be computed as provided by subregulation 1 and, where required, be re-adjusted as and from its commencement date.

- (3) A member may, prior to his normal-retirement date or the 1st of September 1958, whichever is later, revoke an election made under subregulation 1.

- (4) Where the contingent annuitant dies before the member attains his retirement date, the election shall not be effective, provided that in respect of a member who is retired on pension on or after the 1st of January 1957 where his contingent annuitant dies before him or the 1st of September 1958, whichever is earlier, the election shall not be effective and his pension shall be re-adjusted as and from its commencement date.

9.—(1) Subregulation 1 of regulation 21 of the principal regulations is revoked and the following substituted therefor:

- (1) Upon the death before his normal-retirement date of a member who has not been retired at an early-retirement date, there shall be paid to the beneficiary or if there is no beneficiary or the beneficiary has predeceased the member, to the executors or administrators of the member,

(a) a death benefit equal to the sum of the member's contributions in the fund, with credited interest, and

- (b) on and after the 1st of January 1957, where the member's period of employment as calculated in accordance with the procedure set out in the Commission's Management Guide and entered in the employee-record of the member exceeds 18 years, a monthly pension of 50 per cent of the accrued pension at the date of death for each completed month by which the member's said period of employment exceeds 18 years up to a maximum of 60 months.

(2) Subregulation 2 of said regulation 21 is amended by inserting after "benefit" in the ninth line "referred to in clause a of subregulation 1".

Applications to Parliament Private Bills

PUBLIC NOTICE

LEGISLATIVE ASSEMBLY OF ONTARIO

The attention of Municipal Officials, Solicitors and all other persons who may be interested in the preparation of Private Bills for submission to the Legislative Assembly of Ontario is directed particularly to the following Rules of the House governing the submission of such Bills:

RULES RE SUBMISSION OF PRIVATE BILLS

63.—(1) No petition for any Private Bill is received by the House after the first two weeks of each Session nor may any Private Bill be presented to the House after the first three weeks of each Session; nor may any report of any Standing or Select Committee upon a Private Bill be received after the first six weeks of each Session and no motion for the general suspension or modification of this Rule shall be entertained by the House unless after reference made thereof, at a previous sitting of the House, to the several Standing Committees charged with the consideration of Private Bills upon Report submitted by two or more of such committees.

64.—(1) Any person desiring to obtain a Private Bill shall deposit with the Clerk of the House at least eight (8) days before the meeting of the House a copy of such Bill together with a fee of \$150, and if such Bill is not deposited by that time the applicant shall pay \$10 for each and every day which intervenes between the said eighth day and the date of the filing of the Bill.

(2) After the first reading of the Bill and before its consideration by the Committee to which it is referred, the applicant in every case shall pay the cost of printing the Act in the Statutes.

(3) The following charges shall also be levied and paid in addition to the foregoing:

(a) When any rule of the House is suspended with reference to a Bill or the Petition therefor, for each suspension, \$50.

(b) When a Bill is presented to the House after the first three weeks of the Session and before the end of the fourth week, \$75.

(c) When a Bill is presented after the fourth week of the Session, \$100.

(4) In case of any Bill incorporating a company or increasing the capital stock of a company already incorporated, there shall be paid to the Clerk of the House, by or on behalf of the applicant, before the same is reported to the House, the same fee as would be payable to the Provincial Secretary in the case of an incorporation or increase of capital under the provisions of The Ontario Companies Act, less the sum of \$150 already paid to the Clerk of the House.

(5) When a Bill is for the purpose of confirming by-laws, bonds, debentures or other securities, or authority is asked to borrow money or to increase borrowing powers, the following additional fees shall be paid according to the amount of money involved:

On amounts less than \$10,000, \$25; on amounts over \$10,000 and up to \$25,000, \$50; on amounts over \$25,000 and up to \$40,000, \$75; on amounts over \$40,000 and up to \$75,000, \$100; on amounts over \$75,000 and up to \$125,000, \$125; on amounts over \$125,000 and up to \$175,000, \$150; on amounts over \$175,000 and up to \$250,000, \$200; on amounts over \$250,000 and up to \$350,000, \$250; and an additional fee of \$50 for every \$100,000 over \$350,000.

66. All applications for Private Bills properly the subject of legislation by the Legislative Assembly of Ontario, within the purview of "The British North America Act, 1867," shall require a Notice, clearly and distinctly specifying the nature and object of the application and, where the application refers to any proposed work, indicating generally the location of the work, and signed by or on behalf of the applicants, such Notice to be published as follows, viz.:

A notice inserted in THE ONTARIO GAZETTE and in one newspaper published in the Municipality affected, or if there be no newspaper published therein, then in a newspaper in the next nearest municipality in which a newspaper is published.

Such notice shall be continued in each case for a period of at least six weeks, during the interval of time between the close of the next preceding Session and the consideration of the Petition.

If the application is by a Municipal Corporation for authority to issue debentures the notice shall set out the particulars of the existing debenture debt and the amount of rateable property of the Municipality according to the last revised assessment roll of the Corporation, and in brief and general terms, the object for which the new issue of debentures is required.

67. Before any Petition praying for leave to bring in a Private Bill for the erection of a Toll Bridge is received by the House, the person or persons intending to petition for such Bills shall, upon giving the Notice required by preceding Rule, also, at the same time and in the same manner, give Notice of the rates which they intend to ask, the extent of the privileges, the height of the arches, the interval between the abutments or piers for the passage of rafts and vessels, and mentioning also whether they intend to erect a drawbridge or not, and the dimensions of the same.

68. Before any Petition praying for leave to bring in a Bill for the construction of Railways, Tramways or canals is received by the House, the person or persons petitioning for such Bill shall deposit with the Clerk the following documents:

1. A map or plan upon a scale of not less than half an inch to the mile, showing the location upon which it is intended to construct the proposed work, and showing also the line of existing or authorized works of a similar character within, or in any way affecting the district or any part thereof which the proposed work is intended to serve. Such map or plan to be signed by the Engineer or other party making the same.

2. A book of reference in which shall be clearly set out the following information in separate schedules, namely:

SCHEDULE A.—The name of each municipality within which the proposed works or any part thereof are intended to be constructed; the population of each such municipality as returned by the next preceding census, the rateable value of the property within each such municipality, as returned by the next preceding assessment rolls thereof; and this schedule may contain in a separate statement similar information as to the adjoining districts intended to be served by the proposed work.

SCHEDULE B.—A general description of the nature, extent and proposed character of the contemplated works, and an estimate of the probable cost thereof, distinguishing the general items of construction and the cost thereof respectively, as well as the nature, extent and probable cost of all engines and car stock or other outfit or equipment necessary to the use and operation of the proposed undertaking, such schedule to be signed by the Engineer, or other person preparing the same.

SCHEDULE C.—An exhibit showing the total amount of capital proposed to be raised for the purposes of the undertaking and the manner in which it is proposed to raise the same, whether by ordinary shares, bonds, debentures or other securities, and the amounts of each respectively.

SCHEDULE D.—An estimate of the probable revenues of the proposed undertaking showing the sources whence the same are expected to be derived; the annual earnings thereof respectively; the probable annual cost of operation or working expenditure, and the annual net revenue applicable to the payment of interest on the proposed investments, such schedules to be signed by the person preparing the same.

72. When any Bill for confirming any Letters Patent, or Agreement, is presented to the House, the copy of such Letters Patent, or Agreement, shall be attached to it.

74. Every Private Bill, when read a first time shall unless it be an Estate Bill or a Bill providing for the consolidation of a floating debt or for the consolidation or renewal of debentures (other than local improvement debentures) of a Municipal Corporation, shall stand referred to the proper Standing Committee, and all petitions before the House, for or against the Bill, are considered referred to such Committee.

75. Every Private Bill, in so far as it provides for the consolidation of a floating debt or for the consolidation or renewal of debentures (other than local improvement debentures) of a Municipal Corporation when a Bill has been read the first time, shall, without special reference, stand referred to The Ontario Railway and Municipal Board for their report; and a copy of such Bill and of the Petition on which the same is founded shall be forthwith transmitted by the Clerk of the House to the Board, in order that the Board may, after an inquiry into the allegations set out in the Bill, and into any other matters which the Board may deem necessary in connection therewith, report to the House whether or not it is reasonable that such Bill or part thereof relating to the matters aforesaid shall be passed; and what alterations, if any, should be made in the same, and the Board shall make such inquiry accordingly and shall sign the same; and the said Report, Bill and Petition shall be transmitted to the Clerk, and the Report shall be read by the Clerk at the Table and shall be entered on the Journals of the House, and the Bill, together with the Report, shall stand referred to the Standing Committee on Private Bills.

76. Every Estate Bill, when read a first time shall without special reference, stand referred to the Commissioners of Estate Bills, for their Report, and a copy of such Bill, and of the Petition on which the same is founded, shall be forthwith transmitted by the Clerk of the House to the said Commissioners, or one of them, in order that they, or any two of them, may, after perusing the Bill, without requiring any proof of the allegations thereof, report to the House their opinion thereon under their hands; and whether presuming the allegation contained in the preamble to be proved to the satisfaction of the House, it is reasonable that such Bill do pass into a law; and whether the provisions thereof are proper for carrying its purposes into effect, and what alterations or amendments, if any, are necessary in the same, and in the event of their approving the said Bill they are to sign the same; and the said Report, with the said Bill and Petition, are to be transmitted by the said Commissioners to the Clerk; and the Report shall be read by the Clerk at the Table and shall be entered on the Journals of the House; and the Bill, together with the report shall stand referred to the Standing Committee on Private Bills, which is not to consider the said Bill, before the delivery of the said Report, Bill and Petition to the Chairman of the said Committee.

77. In the event of the Commissioners of Estate Bills reporting that, in their opinion, it is not reasonable that the Bill submitted to them shall pass into law such Bill shall not be further considered.

RODERICK LEWIS
Clerk of Legislative Assembly
of Ontario.

THE MILK INDUSTRY ACT, 1957

O. Reg. 88/58.

General Regulations.
New and Revoking O. Reg. 214/56.
Made—28th March, 1958.
Filed—8th April, 1958.

REGULATIONS MADE BY THE BOARD UNDER THE MILK INDUSTRY ACT, 1957

INTERPRETATION

1. For the purpose of these regulations "plant" means any cheese factory, combined plant, creamery, cream receiving station, milk receiving station, milk separating plant or processing plant.

PERMITS FOR CONSTRUCTION OR ALTERATION OF A BUILDING

2.(1) An application for a permit for the construction or alteration of a building intended for use as a plant or for the alteration of a plant the operation of which is licensed under the Act shall be in form 1.

(2) An application in form 1 shall be accompanied by two copies of drawings and specifications for the construction or alteration of the building, or alteration of the plant.

3. A permit for the construction or alteration of a building intended for use as a plant or for the alteration of a plant the operation of which is licensed under the Act, shall be in form 2.

4. A permit in form 2 is issued on the terms and conditions that

- (a) the location of the plant is on land that is well drained and readily accessible;
- (b) the building being constructed or altered or the plant being altered has a supply of clean, fresh water, and has facilities for disposal of sewage, sufficient for the purposes of the operation of the plant as constructed or altered;
- (c) the construction or alteration of the building or alteration of the plant is carried out in accordance with the drawings and specifications submitted with the application in form 1;
- (d) the applicant has complied with the provisions of municipal by-laws and Acts or regulations applicable to the construction or alteration being made.

5.(1) An application for a licence to operate a plant, or renewal thereof, shall be in form 3.

(2) A licence to operate a plant shall be in form 4.

(3) A licence is valid for the period from and including the 1st of April or the date of issue, whichever is the later, to the 31st of March next following.

(4) A licence may be limited to one or more classes of plants.

(5) The fee for a licence is \$1 and shall accompany the application therefor.

(6) A licence is not transferable.

6. A licence is issued on the terms and conditions that

- (a) in the case of a creamery the buttermaking is in charge of a person who holds a butter-maker's certificate,
- (b) in the case of a cheese factory the cheesemaking is in charge of a person who holds a cheesemaker's certificate,
- (c) the holder of the licence does not permit any employee to work in the plant
 - (i) while the employee has a communicable disease, or
 - (ii) who is not wearing outer clothing that is clean and light in colour,

- (d) the operator of the plant files with the Board the cash or credit basis for the payment of producers for milk and cream sold to him,
- (e) where the operator of the plant fails to pay the producers promptly on any payment date in accordance with the cash or credit basis filed with the Board, the operator of the plant notifies the Board within three days after the payment date that payment was not made in accordance with the cash or credit basis, and
- (f) where the licence was issued subject to the deposit of security under regulations 7 and 8, security is deposited in accordance with regulations 7 and 8.

SECURITY

7. Where the Board receives an application for a licence to operate a plant and the operation includes the buying or selling of a regulated product and the Board is not satisfied in respect of financial responsibility of the applicant to properly conduct the business for which the application was made, the Board may issue the licence subject to deposit with the Board by the applicant of security in the form of

- (a) direct and guaranteed securities of the Government of Canada,
- (b) direct and guaranteed securities of the Government of Ontario,
- (c) a surety bond of a guarantee company approved under *The Guarantee Companies Securities Act*, in form 5, in an amount in accordance with regulation 8.

8.(1) In subregulation 2, the average value of milk and cream shall be determined on the average daily value of milk and cream delivered to the plant during the previous calendar year.

(2) Where security is required under regulation 7 it shall be in the following amounts:

- (a) where producers are paid on a daily cash basis, not less than the average value of milk and cream received from producers during a period of seven days; or
- (b) where producers are paid on a weekly credit basis, not less than the average value of milk and cream received from producers during a period of fifteen days; or
- (c) where producers are paid on a bi-weekly or twice-a-month credit basis, not less than the average value of milk and cream received from producers during a period of thirty days; or
- (d) where producers are paid on a monthly credit basis, not less than the average value of milk and cream received from producers during a period of forty-five days; or
- (e) where the operator of the plant is commencing business, not less than \$1,000.

9. The security deposited with the Board under regulations 7 and 8 shall be applicable solely to unpaid claims of producers for milk and cream sold to the operator of the plant.

10.(1) Where an operator of a plant is in default in making payment for milk and cream sold to him by a producer on a basis mentioned in regulation 8, the producer may notify the Board of the default.

(2) Upon receipt of a notice under subregulation 1, or a report from a field-man, that the operator is in default in making payment for milk and cream sold to the operator by a producer on a basis mentioned in

regulation 8, the Board shall give notice to the operator by registered mail of the producer's claim and require that the claim be paid within five days of the date of mailing the notice by the Board.

(3) Where the Board is satisfied after the expiration of the five-day period in subregulation 2 that the operator is in default in making the payment referred to in subregulation 1, the Board may realize upon the security and shall, out of the money so obtained, pay the producer the amount of his claim.

(4) Where more than one producer notifies the Board of default of an operator under subregulation 1 and the amount of moneys realized upon the security deposited by the operator with the Board is insufficient to pay the claims of the producers, the Board shall distribute the moneys *pro rata* to all the producers to whom the operator owes payment for milk or cream received at the plant.

(5) Where

- (a) the operator has deposited with the Board security in the form of securities under clause a or b of regulation 7; and
- (b) the Board has realized upon the security under subregulation 3,

the Board shall require the operator to deposit such additional security with the Board as may be necessary to comply with regulation 8 and, upon the operator depositing additional security, the Board shall return to the operator any money remaining from the sale of securities by the Board after the payment of the claims of the producer under subregulation 3.

11. The construction or alteration of a building intended for use as a plant shall be made so that

- (a) the floors of all rooms in which milk or milk products are handled, processed or stored are of concrete or other material impervious to liquids, and drained,
- (b) each wall in a room in which milk or milk products are handled, processed or stored has a base at least 6 inches above the floor level made of concrete or other waterproof material, and the joint between the floor and the base is water-tight,
- (c) the ceiling of a room in which processing is done is at least 10 feet above the floor,
- (d) the surfaces of the walls and ceilings of all rooms in which milk or milk products are handled, processed or stored are of washable and moisture-proof material,
- (e) there is provision for equipping all openings with screens, proof against flies or other insects and all doors with self-closing devices, or equivalent method of ensuring that flies or other insects do not enter,
- (f) rooms where milk and cream are handled or processed contain provision for lighting, ventilating and heating,
- (g) the ceilings in the plant are insulated and sealed against infiltration of dampness or vapour, with free circulation of air between the insulation and the roof,
- (h) a water-closet does not open directly into a room where milk or milk products are handled or processed,
- (i) sewage is carried from the building by pipes, each of which contains a trap in an accessible location and connecting with a municipal sewer or septic tank,

(j) any heating unit is located in a room having a concrete floor and not used for the handling, processing or storing of milk or milk products,

(k) (i) in the case of a cheese factory, there is a curing-room large enough for the operation intended,

(ii) in the case of a creamery, there is a cold storage room of a size large enough to hold at least seven days' production of butter, and

(iii) in the case of a building intended for use as a plant for the manufacture of milk products other than butter or cheese, there are storage rooms large enough for the operation intended,

capable of being equipped with an automatic temperature-control system,

(l) receiving rooms for milk and cream are enclosed and of sufficient size to permit freedom of movement in receiving, grading, sampling and handling of milk and cream and the washing of containers, and

(m) rodents and other vermin do not enter or remain on the premises.

12.(1) Plants shall be equipped with

(a) screens capable of preventing the entry of flies or other insects covering every opening into the plant, or other equivalent equipment, and a self-closing device on each outside door of the plant, and on each door of a water-closet,

(b) a wash basin in each room where milk or milk products are handled or processed,

(c) a temperature-control system capable of automatically controlling the temperature in each curing-room, cold-storage room or storage room for efficient processing or preserving of milk or milk products therein,

(d) a boiler or other equipment capable of maintaining a supply of hot water or steam sufficient for processing milk and cream and hot water for cleaning and sterilizing the equipment and rooms used in receiving, handling, processing or storing milk or milk products,

(e) (i) thermometers of shatter-proof material, and

(ii) thermometers on equipment used in processing, cleaning or sterilizing milk or milk products, capable of registering the temperature of the milk or milk product.

(2) A creamery shall be equipped with a pasteurizer having a capacity of at least 300 gallons and a churn capable of manufacturing at least 1000 pounds of butter at one time.

(3) Where a plant is equipped with conveyors for moving containers of milk or cream in the receiving room, the conveyors shall be of sufficient length and in such locations that the milk or cream may be readily graded, sampled and weighed, and where milk or cream is rejected, the containers may be moved on a conveyor other than the conveyor used for incoming containers.

SANITATION

13.(1) Any part of a plant, including piping, pumps, containers, tanks and other equipment which is in contact with or likely to be in contact with milk or milk products shall be scoured of particles of milk or milk products by scrubbing or by a solvent and rinse

(a) at least once every 24 hours, and

(b) before there is a change in the kind of milk or milk product in contact with or likely to be in contact with the part of the plant.

(2) The floor of each room in a plant in which milk or milk products are handled or processed shall be scrubbed and rinsed with fresh water at least once every 24 hours.

(3) The walls and ceiling of each room in a plant in which milk or milk products are handled, processed or stored, and the floor of each room in a plant in which milk or milk products are stored shall be scrubbed and rinsed with fresh water at least once every six months, and at such other times as may be necessary to remove any noticeable accumulation.

14.(1) Where equipment or containers for handling, processing or storing milk or milk products are of metal, the surfaces likely to come in contact with milk or milk products shall be

(a) smooth and anti-corrosive,

(b) without open seams,

(c) accessible at all points for scrubbing,

(d) without joints which are not flush with adjoining surfaces.

(2) Wooden equipment used in a plant shall be of sound material with smooth surfaces, and joints or seams shall be sealed.

15. Tanks used for storing skim-milk, buttermilk or whey that are not intended for human consumption or for processing into milk products for human consumption in a plant

(a) shall be of metal construction,

(b) shall not be located in contact with earth, and

(c) shall not be used for any purpose in respect of food for human consumption.

16.(1) The handling, processing or storing of milk or milk products shall be carried on in such a location and in such a manner that no matter foreign to the milk or milk product being handled, processed or stored can enter the milk or milk product.

(2) A room in which milk or milk products are stored shall not be used for storing other products or other milk or milk products that may contaminate or deteriorate the milk or milk products being stored.

(3) A plant shall not contain odours other than those resulting from the handling, processing or storing of fresh milk, or fresh milk products.

MILK AND CREAM TESTERS AND GRADERS

17. The holder of

(a) a milk tester's certificate is classified as a milk tester;

(b) a cream tester's certificate is classified as a cream tester;

(c) a milk grader's certificate is classified as a milk grader;

(6) An apprentice milk tester's certificate, apprentice cream tester's certificate, apprentice milk grader's certificate or apprentice cream grader's certificate shall be in form 13.

22.(1) An applicant for a milk tester's certificate or a cream tester's certificate shall be examined by examiners appointed by the Board

- (a) on his ability to sample and test milk and cream, and
- (b) on his knowledge of
 - (i) handling, sampling and testing for milk-fat content of milk and cream,
 - (ii) the principles of grading milk and cream,
 - (iii) the sanitary requirements for plants and the provisions of the Act and the regulations pertaining thereto.

(2) An applicant for a milk grader's certificate, a bulk-tank milk grader's certificate or a cream grader's certificate, shall be examined by examiners appointed by the Board

(a) on his knowledge of

- (i) handling, sampling, grading, rejecting and weighing milk and cream,
- (ii) the principles of testing milk and cream for milk-fat content,
- (iii) tests for accurately determining the amount of sediment, bacteria and acid in milk or cream, and
- (iv) the sanitary requirements for plants, and the provisions of the Act and regulations pertaining thereto.

23.(1) Where an applicant is found by the examiners to be competent to perform the duties which the certificate he applies for qualifies him to perform, the Board shall issue him a certificate in the form applied for.

(2) The holder of a milk tester's certificate, cream tester's certificate, milk grader's certificate or cream grader's certificate under Ontario Regulations 214/56 is deemed to be the holder under these regulations of the respective certificate.

24. An apprentice milk tester's certificate, an apprentice cream tester's certificate, an apprentice milk grader's certificate or an apprentice cream grader's certificate shall be issued to the applicant therefor.

25. The Board may require a milk or cream tester, a milk or cream grader, or a bulk-tank milk grader to be re-examined at any time the Board deems necessary.

26. A certificate issued under regulation 23 is issued on the terms and conditions that the holder of the certificate

- (a) submits to re-examination from time to time as the Board deems necessary,
- (b) conforms to the requirements of the Act and regulations pertaining to his duties,
- (c) where he is employed in one plant, conspicuously displays the certificate in the room in the plant in which he is usually employed,
- (d) where he is employed in more than one plant or operates a tank-truck, has the certificate available for production on request, and
- (e) does not cease for a period of five years to perform the duties which the certificate qualifies him to perform.

27. The Board may, after a hearing, suspend or revoke a certificate issued under regulation 23,

- (a) for any breach of the terms and conditions upon which the certificate was issued, or
- (b) when the holder of the certificate is found on re-examination to be not competent to perform the duties which the certificate qualifies him to perform.

BUTTERMAKER'S CERTIFICATES

28.(1) The holder of a first class buttermaker's certificate is classified as a first class buttermaker.

(2) The holder of a second class buttermaker's certificate is classified as a second class buttermaker.

30. A buttermaker's certificate shall not be issued unless the person to whom it is issued

(a) (i) is the holder of a diploma from Kemptville Dairy School, Ontario Agricultural College Dairy School or other agricultural educational institution which in the opinion of the Board has equivalent courses of study and practical training in respect of the making of butter, or

(ii) was the holder of a buttermaker's certificate under Ontario Regulations 214/56, or under these regulations, within five years before the date of his application for the certificate, and

(b) is a cream tester and cream grader.

31. Upon application therefore a first class buttermaker's certificate shall be issued to a person who qualifies under regulation 30 and who

(a) was a buttermaker in charge of the butter-making in a creamery for at least three months in the year ending with the 31st of March preceding the period for which the certificate is issued, and

(b) made First Grade butter from at least 95 per cent of the cream graded Special and First Grade made into butter in the creamery during the time that he was in charge of the buttermaking.

32. Upon application therefor a second class buttermaker's certificate shall be issued to a person who qualifies under regulations 30 and who

(a) was a buttermaker in charge of the butter-making in a creamery for at least three months in the year ending with the 31st of March preceding the period for which the certificate is issued, and

(b) made First Grade butter from at least 90 per cent of the cream graded Special and First Grade made into butter in the creamery during the time that he was in charge of the buttermaking.

33. Upon application therefor a temporary buttermaker's certificate shall be issued to a person who qualifies under regulation 30 and who does not qualify for a first class or second class buttermaker's certificate and who was the holder of a buttermaker's certificate under Ontario Regulations 214/56 or under these regulations, within five years before the date of the application.

34. Notwithstanding regulations 30, 31, 32 and 33, a buttermaker who did not hold a buttermaker's certificate in the year immediately preceding the date of his application but did hold a buttermaker's certificate under Ontario Regulations 214/56 or under these regulations, within five years before the date of his application may be issued a buttermaker's certificate of the same class he last held.

35.(1) A first class buttermaker's certificate, a second class buttermaker's certificate, and a beginner buttermaker's certificate are valid from the date of issue to the 31st of March next following.

(2) A temporary buttermaker's certificate is valid for the period of time stated thereon.

36. Notwithstanding regulation 30, upon application therefor a beginner buttermaker's certificate shall be issued to a person who

(a) (i) is the holder of a diploma described in sub-clause i of clause a of regulation 30, or

(ii) has been the holder of a buttermaker's certificate under Ontario Regulations 214/56 or under these regulations, and

(b) was employed in a creamery for at least three months in the two-year period preceding the date of his application,

(c) is a cream tester and cream grader, and

(d) is recommended in writing for the certificate by a first class buttermaker.

37.(1) A buttermaker's certificate is issued on the terms and conditions that the holder of the certificate

(a) conforms to the requirements of the Act and regulations pertaining to his duties, and

(b) conspicuously displays the certificate in the room in the plant in which he is usually employed.

(2) The Board may, after a hearing, suspend or revoke a buttermaker's certificate for any breach of the terms and conditions upon which it is issued.

CHEESEMAKERS

38.(1) The holder of a variety cheesemaker's certificate is classified as a variety cheesemaker.

(2) The holder of a first class cheesemaker's certificate is classified as a first class cheesemaker.

(3) The holder of a second class cheesemaker's certificate is classified as a second class cheesemaker.

(4) The holder of a temporary cheesemaker's certificate is classified as a temporary cheesemaker.

(5) The holder of a beginner cheesemaker's certificate is classified as a beginner cheesemaker.

39.(1) An application for a cheesemaker's certificate shall be in form 19.

(2) A variety cheesemaker's certificate shall be in form 20.

(3) A first class cheesemaker's certificate shall be in form 21.

(4) A second class cheesemaker's certificate shall be in form 22.

(5) A temporary cheesemaker's certificate shall be in form 23.

(6) A beginner cheesemaker's certificate shall be in form 24.

40. A cheesemaker's certificate shall not be issued unless the person to whom it is issued

- (a) (i) is the holder of a diploma from Kemptville Dairy School, Ontario Agricultural College Dairy School, or other agricultural educational institution which in the opinion of the Board has equivalent courses of study and practical training in respect of the making of cheese, or
- (ii) was the holder of a cheesemaker's certificate under Ontario Regulations 214/56, or under these regulations, within five years before the date of his application for the certificate, and
- (b) is a milk tester and milk grader.

41. Upon application therefor a variety cheesemaker's certificate shall be issued to a person who qualifies under regulation 40, and who

- (a) was a cheesemaker for the period of at least three months in the year ending with the 31st of March preceding the period for which the certificate is issued, and
- (b) was in charge of the making of cheese other than cheddar cheese in a cheese factory for that year.

42. Upon application therefor a first class cheesemaker's certificate shall be issued to a person who qualifies under regulation 40, and who

- (a) was a cheesemaker in charge of the cheesemaking in a cheese factory for at least three months in the year ending with the 31st of March preceding the period for which the certificate is issued, and
- (b) made First Grade cheese from at least 95 per cent of the milk made into cheese in the cheese factory during the time he was in charge of the cheesemaking.

43. Upon application therefor a second class cheesemaker's certificate shall be issued to a person who qualifies under regulation 40, and who

- (a) was a cheesemaker in charge of the cheesemaking in a cheese factory for at least three months in the year ending with the 31st of March preceding the period for which the certificate is issued, and
- (b) made First Grade cheese from at least 90 per cent of the milk made into cheese in the cheese factory during the time he was in charge of the cheesemaking.

44. Upon application therefor a temporary cheesemaker's certificate shall be issued to a person who qualifies under regulation 40 and who does not qualify for a first class or second class cheesemaker's certificate and who was the holder of a cheesemaker's certificate under Ontario Regulations 214/56 or under these regulations, within five years before the date of the application.

45. Notwithstanding regulations 40, 41, 42, 43 and 44, a cheesemaker who did not hold a cheesemaker's certificate in the year immediately preceding the date of his application but did hold a cheesemaker's certificate under Ontario Regulations 214/56 or under these regulations, within five years before the date of his application may be issued a cheesemaker's certificate of the same class he last held.

46.(1) A variety cheesemaker's certificate, a first class cheesemaker's certificate, a second class cheesemaker's certificate and a beginner cheesemaker's certificate are valid from the date of issue to the 31st of March next following.

(2) A temporary cheesemaker's certificate is valid for the period of time stated thereon.

47. Notwithstanding regulation 40, upon application therefor a beginner cheesemaker's certificate shall be issued to a person who

- (a) (i) is the holder of a diploma described in sub-clause i of clause a of regulation 40; or
- (ii) has been the holder of a cheesemaker's certificate under Ontario Regulations 214/56 or under these regulations; and
- (b) was employed in a cheese factory for at least three months in the two-year period immediately before the date of his application,
- (c) is a milk tester and milk grader, and
- (d) is recommended in writing for the certificate by a first class cheesemaker.

48.(1) A cheesemaker's certificate is issued on the terms and conditions that the holder of the certificate

- (a) conforms to the requirements of the Act and regulations pertaining to his duties, and
- (b) conspicuously displays the certificate in the room in the plant in which he is usually employed.

(2) The Board may, after a hearing, suspend or revoke a cheesemaker's certificate for any breach of the terms and conditions upon which the certificate is issued.

SELECTING AND REJECTING OF MILK

49. Milk rejected at a plant shall be known as "rejected milk".

50. The milk grader at a plant shall select or reject milk delivered by each producer immediately after the lid of the container is loosened and before any of the milk of the producer is removed from the container other than for testing purposes.

51. The milk grader at a plant shall reject milk delivered by a producer which

- (a) is not sweet, or
- (b) has an objectionable flavour or odour, or
- (c) shows evidence of being watery, flaky, stringy, bloody, thick or adulterated or insanitary.

52. The milk grader at a plant shall reject milk delivered by a producer in a container which is not

- (a) metal, or
- (b) in good condition, or
- (c) free from rust, open seams and other defects, or
- (d) covered by a secure lid.

TESTING FOR SEDIMENT CONTENT OF MILK

53.(1) The grades for milk when tested for sediment content of the milk are

- (a) grade A, consisting of milk that contains not more than 0.25 milligrams of sediment to 16 ounces of milk,
- (b) grade B, consisting of milk that contains not more than 1.25 milligrams of sediment to 16 ounces of milk,
- (c) grade C, consisting of milk that contains not more than 2.0 milligrams of sediment to 16 ounces of milk, and
- (d) grade D, consisting of milk that contains more than 2.0 milligrams of sediment to 16 ounces of milk.

(2) Tests made for sediment content of milk shall be known as "sediment tests".

54.(1) An operator of a plant shall provide the following equipment for making sediment tests:

- (a) at least one sediment tester having a capacity of 16 ounces of milk,
- (b) an additional head for each sediment tester,
- (c) two holders of clamp type,
- (d) a quantity of lintine cotton discs, having a diameter of $1\frac{1}{4}$ inches, and
- (e) charts of sediment standards.

(2) The milk grader at a plant shall maintain equipment for making sediment tests in good repair and shall from time to time examine the equipment to ensure that when a sediment tester is used the sample of milk drawn for each test is at least 16 ounces.

(3) The milk grader shall, for purposes of testing, draw each sample of milk by a sediment tester from the bottom of the container of milk so that the head of the sediment tester passes diametrically across the bottom of the container as the sample of milk is drawn into the sediment tester.

55.(1) A milk grader shall make at least one sediment test of milk delivered to a plant by a producer in each half-month period.

(2) When a sediment test is made, the test shall be made of the milk in at least one container received from the producer and selected at random, before any of the milk received from the producer on that day is removed from its containers.

(3) The milk grader shall make the sediment test of the milk immediately after the lid of the container is first removed and before any of the milk is removed from the container.

(4) Where a sediment test is made of the milk in one container delivered by a producer and the sediment test shows that the milk is grade C or grade D, the grader shall

- (a) make a sediment test of the milk in every container of milk received from the producer on the day of the test,
- (b) make a sediment test of every container of milk subsequently delivered by that producer until all of the milk received from that producer on a subsequent day complies with the standards of at least grade B or all of the milk delivered by that producer is rejected under regulation 56,
- (c) where he finds by a sediment test that any milk is grade D, reject the milk, and
- (d) where he finds by a sediment test that any milk is grade C,

(i) where the container is owned by the producer, attach to the container a warning tag on which is recorded the particulars of the delivery and the grade and return the container promptly to the producer, or

(ii) send by prepaid post or deliver a notice to the producer of the particulars of the delivery of the milk and the grade.

56.(1) Where a milk grader finds by sediment tests that milk delivered to a plant by a producer fails to comply with at least grade B on more than six days in any fifteen-day period he shall reject all milk from that producer for the next ensuing fifteen days unless the producer shows that the milk he delivers complies with the requirements of at least grade B.

(2) Where a milk grader rejects milk under sub-regulation 1, the milk grader shall send by prepaid post or deliver a notice to the producer of the particulars of the delivery of milk and the cause of the rejection and return to the producer at his expense any milk delivered thereafter during the next ensuing fifteen days unless the producer shows that the milk he delivers complies with the requirements of at least grade B.

57. Where a milk grader rejects milk he shall

- (a) attach to the container in which the milk was delivered a rejection tag bearing the words "rejected milk",
- (b) state on the rejection tag the cause for the rejection,
- (c) add to the milk a harmless food colouring, and
- (d) return the milk in the container in which it was delivered to the producer as soon as practicable.

58. No person shall sell, offer for sale, transport or deliver the rejected milk for use as food, or in the preparation of food, for human consumption.

TESTING FOR BACTERIAL ACTIVITY IN MILK

59.(1) The milk grader at a plant shall make at least one test for bacterial activity in milk delivered to the plant by a producer in each thirty-day period.

(2) The test for bacterial activity in milk shall be

- (a) a Methylene Blue reduction test, or
- (b) a Resazurin reduction test.

60.(1) The operator of a plant shall provide equipment for making

- (a) Methylene Blue reduction tests, or
- (b) Resazurin reduction tests.

(2) The operator of a plant shall provide the following equipment for making Methylene Blue reduction tests or Resazurin reduction tests:

- (a) one pipette or dipper having a capacity of 10 millilitres,
- (b) one pipette or burette having a capacity of 1 millilitre,
- (c) culture tubes,
- (d) culture-tube racks,
- (e) culture-tube closures,

- (f) a water bath with a cover capable of excluding light, and with a means of heating that is thermostatically controlled so that the contents of culture tubes in the bath are heated to at least 96 degrees Fahrenheit in a period of not more than 10 minutes and then maintained at a temperature between 96 and 99 degrees Fahrenheit during the test period,
 - (g) where a Methylene Blue reduction test is performed, a quantity of methylene blue thiocyanate tablets each containing 8.8 milligrams of dye,
 - (h) where a Resazurin reduction test is performed, a quantity of resazurin tablets, each containing 11 milligrams of dye,
 - (i) a quantity of distilled water,
 - (j) one thermometer,
 - (k) one china-marking pencil,
 - (l) one graduate cylinder of such capacity as required for holding and measuring quantities of 50 millilitres and 200 millilitres of liquids,
 - (m) one glass bottle of amber or other colour having low actinic properties, of 500 millilitre capacity, and suitable for holding a solution of methylene blue thiocyanate or resazurin, and
 - (n) one container for holding hot water for the sterilization of pipettes, dippers and burettes during milk-sampling operations.
- (3) For purposes of making Methylene Blue reduction test, or a Resazurin reduction test, a milk grader shall prepare a blue dye solution, or a resazurin dye solution, as the case may be.

61.(1) Where milk is tested for bacterial activity by a Methylene Blue reduction test and the sample of milk for purposes of test is added to the blue dye solution, the grades for milk are

- (a) grade 1, for milk of which the sample is not discolored within a period of 6 hours,
- (b) grade 2, for milk of which the sample is not discolored within a period of 4 hours but is discolored within a period of 6 hours,
- (c) grade 3, for milk of which the sample is not discolored within a period of 2 hours but is discolored within a period of 4 hours, and
- (d) grade 4, for milk of which the sample is discolored within a period of 2 hours.

(2) Where milk is tested under subregulation 1 for a period of at least 4 hours and the sample is not discolored in that period of time the milk may be graded as "at least grade 2".

62. Where milk is tested for bacterial activity by a Resazurin reduction test and the sample of milk for purposes of test is added to the resazurin dye solution, the grades for milk are

- (a) grade 1, for milk of which the sample does not change in colour from blue grey to more than purplish blue in a period of 3 hours,
- (b) grade 2, for milk of which the sample changes in colour from blue grey to not more than purplish blue in a period of 2 hours, but to more than purplish blue in a period of 3 hours,
- (c) grade 3, for milk of which the sample changes in colour from blue grey to not more than purplish blue in a period of 1 hour, but to more than purplish blue in a period of 2 hours, and

- (d) grade 4, for milk of which the sample changes in colour from blue grey to more than purplish blue in a period of 1 hour.

63. Where a milk grader finds by a Methylene Blue reduction test or a Resazurin reduction test that the milk delivered by a producer is grade 4 he shall make a Methylene Blue reduction test, or a Resazurin reduction test, of the milk of that producer at least once each week until he finds that the milk is at least grade 3 or the milk is rejected under regulation 64.

64.(1) Where a milk grader finds by a Methylene Blue reduction test or a Resazurin reduction test that the milk delivered by a producer failed to comply with at least grade 3 on more than three tests in any thirty-day period he shall reject all milk from that producer for the next ensuing fifteen days unless the producer shows that the milk he delivers complies with the requirements of at least grade 3.

(2) Where a milk grader finds by a bacterial activity test that the milk is grade 4 he shall notify, within 24 hours, the producer of the results of the test.

(3) Where a milk grader rejects milk under subregulation 1, the milk grader shall send by prepaid post or deliver a notice to the producer of the particulars of the delivery of milk and the cause for the rejection and return to the producer at his expense any milk delivered thereafter during the next ensuing fifteen days unless the producer shows that the milk he delivers complies with the requirements of at least grade 3.

65.(1) A producer whose milk or cream is rejected at a plant shall not deliver milk to another plant within a period of fifteen days after such rejection or until he has shown to the operator of the plant at which the milk or cream was rejected that the milk or cream that he delivers is acceptable under these regulations.

(2) A producer whose milk or cream is rejected at a plant and who delivers milk to another plant within fifteen days of the rejection shall notify the operator of the plant of the rejection and the cause for the rejection given on the rejection tag or in a notice to the producer.

(3) The operator of a plant shall reject milk delivered by a producer whose milk or cream was rejected at a plant within the preceding period of fifteen days unless the producer has complied with subregulations 1 and 2 and the milk is tested by sediment test and found to be at least grade B, and by Methylene Blue reduction test or Resazurin reduction test and found to be at least grade 3.

66. A milk grader shall test milk for sediment content and bacterial activity, delivered by a producer

- (a) who has not delivered milk to the plant during the fifteen-day period preceding the date of delivery, and
- (b) whose milk or cream has been rejected by a plant during the fifteen-day period preceding the date of delivery.

EQUIPMENT FOR SAMPLING AND TESTING MILK

67. An operator of a plant shall provide

- (a) containers of at least eight-ounce capacity with close-fitting tops or stoppers to hold composite samples of milk of producers delivering milk to the plant,
- (b) equipment for obtaining a sample of milk from the milk received from a producer,

- (c) a cabinet capable of holding and maintaining all composite samples at a temperature not lower than 40 degrees Fahrenheit nor higher than 60 degrees Fahrenheit; and
- (d) a tank of sufficient size to be a tempering bath for samples of milk in the making of a test for milk-fat content of the milk.

68. The operator of a plant shall provide the following equipment for making Babcock-tests of milk:

- (a) Babcock-test bottles and pipettes,
- (b) one acid measure for measuring sulphuric acid and pouring it into Babcock-test bottles,
- (c) a quantity of sulphuric acid having a specific gravity of not less than 1.82 or more than 1.83 at a temperature of 68 degrees Fahrenheit,
- (d) a centrifuge which is
 - (i) in sound mechanical operating condition,
 - (ii) capable of being operated at speeds required for tests without appreciable vibration,
 - (iii) equipped with a speed indicator or other means of readily determining the speed, and
 - (iv) properly mounted.
- (e) a means of heating the centrifuge to a temperature of at least 130 degrees Fahrenheit and maintaining the temperature at not less than 130 degrees during the period of the test,
- (f) a set of calipers in sound mechanical operating condition, with a screw-locking device, and
- (g) a water bath with a means of heating the water to a temperature of at least 130 degrees Fahrenheit and maintaining the temperature at not less than 130 degrees or more than 140 degrees Fahrenheit during the period of the test and a thermometer capable of measuring readily the temperature of the water.

WEIGHING OF MILK AND SAMPLING OF MILK FOR BABCOCK-TEST

69.(1) After milk delivered by a producer to a plant is graded, the milk grader shall

- (a) weigh the milk and record the weight to the nearest pound, and
- (b) take a sample of milk from
 - (i) each container after the milk is thoroughly mixed in the container, or
 - (ii) each quantity of milk weighed in one weighing thereof after it is thoroughly mixed in the weighing-tank.

(2) A sample of milk taken under clause *b* of subregulation 1 shall be, where milk is delivered

- (a) daily, at least 10 millilitres, and
- (b) other than daily, at least 20 millilitres.

(3) The milk grader shall make a composite sample of milk received from one producer by putting each sample of milk received from the producer in a period of not more than sixteen days into one container.

(4) Where a sample of milk is added to a composite sample the milk grader shall mix the sample with the composite sample.

(5) The milk grader shall add to each composite sample of milk such amounts of mercuric chloride, or other preservative equivalent for the purpose, as may be necessary to preserve the composite sample.

(6) A milk grader shall maintain each composite sample of the milk he is grading at a temperature of not lower than 40 degrees or higher than 60 degrees Fahrenheit until the composite sample is tested for milk-fat content.

(7) No person shall put into a sample of milk

- (a) subject to subregulation 5, any foreign substance, or
- (b) any milk other than other samples of milk from the same producer in accordance with this regulation.

70.(1) A milk tester shall, at the plant where the milk was accepted, test each composite sample of the milk for milk-fat content within five days after the last sample was added to the composite sample.

(2) The milk tester shall make each test for milk-fat content of milk by the Babcock-test.

(3) The milk tester shall maintain every composite sample of milk which he tests for milk-fat content at a temperature not lower than 40 degrees or higher than 60 degrees Fahrenheit for a period of at least twelve days after the last sample was added to the composite sample.

71. The milk-fat content of a composite sample is deemed to be the milk-fat content of the milk from which the samples were taken.

GRADES FOR CREAM

72. The grades for cream are

- (a) Special Grade, consisting of cream that
 - (i) is clean,
 - (ii) is without taint in flavour,
 - (iii) contains no foreign substance,
 - (iv) is not curdy or lumpy,
 - (v) is capable of being stirred to a uniform consistency,
 - (vi) at the time of grading has a content of lactic acid not exceeding 0.25 per cent of the cream,
 - (vii) has a milk-fat content of at least 30 per cent of the cream;
- (b) First Grade, consisting of cream that is not Special Grade, and that
 - (i) is not curdy or lumpy,
 - (ii) is capable of being stirred to a uniform consistency,
 - (iii) contains no foreign substance,
 - (iv) at the time of grading has a content of lactic acid not exceeding 0.60 per cent of the cream,
 - (v) has no flavour rendering it unfit for the making of First Grade butter; and

- (c) Second Grade, consisting of cream that is not Special Grade or First Grade, and that
- (i) has no odour or flavour of gasoline, oil, leaks, or any other odour or flavouring that renders the cream unfit for making at least Second Grade butter,
 - (ii) contains no insanitary or foreign substance,
 - (iii) at the time of grading has a content of lactic acid not exceeding 0.80 per cent of the cream.

73. Cream rejected at a plant shall be known as "rejected cream".

74. The cream grader at a plant shall reject cream delivered to the plant

- (a) that is not Special Grade, First Grade or Second Grade,
- (b) by a producer whose milk or cream has been rejected at a plant within a period of fifteen days preceding the delivery, unless the cream is at least First Grade Cream, or
- (c) in a container which is not
 - (i) metal,
 - (ii) in good condition,
 - (iii) free from leaks, rust, open seams and other defects, or
 - (iv) covered by a secure lid.

75. A cream grader who rejects cream at a plant shall

- (a) attach to the container in which the cream was delivered a rejection tag bearing the words "rejected cream",
- (b) state on the rejection tag the cause for the rejection,
- (c) add to the cream a harmless food colouring, and
- (d) return the cream in the container in which it was delivered to the producer as soon as practicable.

76.(1) A producer whose milk or cream is rejected at a plant shall not deliver cream to another plant within a period of fifteen days after such rejection or until he has shown to the operator of the plant at which the milk or cream was rejected that the milk or cream that he delivers is acceptable under these regulations.

(2) A producer whose milk or cream is rejected at a plant and who within fifteen days of the rejection delivers cream to any plant shall notify the operator of the rejection and the cause for the rejection given on the rejection tag.

(3) The operator of a plant shall reject cream delivered by a producer whose milk or cream was rejected at a plant within the preceding period of fifteen days unless the producer has complied with subregulations 1 and 2.

77. No person shall buy, sell, offer for sale, or ship or transport rejected cream as food, or in the preparation of food, for human consumption.

GRADING

78. No person shall remove cream delivered to a plant from its container, other than a cream grader for the purpose of grading, until the cream has been graded.

79. A cream grader shall

- (a) thoroughly mix, grade and weigh to the nearest pound, cream delivered to a plant, of each producer, and
- (b) where the cream in each container is tested separately for milk-fat content, take a sample of at least three times the amount of cream the cream tester requires to perform the test, or
- (c) where the cream of each delivery of two or more containers is tested, take aliquot samples of the cream in each container in such quantities that the samples when together make a total sample of at least two ounces.

80.(1) A cream tester shall, at the plant where the cream is accepted,

- (a) test each sample of cream for milk-fat content within 42 hours after the delivery of the cream to the plant, and
- (b) maintain each sample of cream at a temperature not lower than 40 degrees or higher than 60 degrees Fahrenheit until 2 p.m. on the day next following the date on which the test is made, but where the date on which the test is made is a Saturday he shall maintain the sample until 2 p.m. on the Monday next following.

(2) A field-man may require a cream tester to maintain samples of cream for such period of time longer than the time prescribed in subregulation 1 as he considers necessary for the purpose of a further test.

(3) The cream tester shall make each test for milk-fat content of cream by the Babcock-test.

EQUIPMENT FOR SAMPLING AND TESTING CREAM

81. The operator of a plant shall provide,

- (a) in addition to the equipment named in clauses a to g, both inclusive, of regulation 68, the following equipment for making Babcock-tests of cream:
 - (i) cream-weighing scales and 9-gram and 18-gram weights, and
 - (ii) a quantity of glymol or mineral oil having a specific gravity of 0.85 at a temperature of 68 degrees Fahrenheit,
- (b) containers of at least two-ounce capacity with close-fitting tops or stoppers to hold samples of cream of all producers delivering cream to the plant,
- (c) equipment for obtaining a sample of cream from each container of the cream received from a producer, and
- (d) a tank of sufficient size to be a tempering bath for samples of cream in preparation for a test for milk-fat content of the cream.

PROHIBITION

82. No person shall mix Second Grade cream received at a plant for manufacture into butter with Special Grade or First Grade cream.

83. No person shall put any foreign substance into a sample of cream, and no person other than the cream grader or cream tester shall add cream to a sample of cream.

PAYMENT FOR CREAM

84. The differential in payment for cream for manufacture into a milk product shall be

- (a) at least 1 cent more for Special Grade than for First Grade, and
- (b) at least 5 cents more for First Grade than for Second Grade cream

for each pound of milk-fat content.

85. Where a producer delivers cream to a plant and the operator of the plant declines to accept delivery, the operator shall record the date of the refusal and where graded, the grade given to the cream.

LABELLING SAMPLES

86.(1) A container in which a sample of milk or cream is placed shall be plainly labelled or marked with the name of, or a number to identify, the producer who delivered the milk or cream to the plant.

(2) No person shall put a sample of milk or cream

- (a) in a container that is not labelled, or
- (b) in a container other than one bearing the label for the producer who delivered the milk or cream to the plant.

RE-TESTING

87.(1) A field-man may test, or require a milk tester or cream tester at a plant to test in his presence any sample of milk or cream that has been tested for milk-fat content.

(2) Where a field-man finds that a test for milk-fat content made by a milk tester or cream tester is in error he shall report the particulars of the error in writing to the operator of the plant.

(3) Payment for milk or cream shall be made on the basis of the results of the re-test reported by the field-man.

88. Upon the request of a producer or his representative the operator of a plant shall

- (a) furnish to the producer a statement of the milk-fat content of the producer's milk or cream delivered to the plant before the samples are destroyed, and
- (b) re-test the milk or cream in the presence of the producer or person representing him.

CONTAINERS

89.(1) No person shall transport milk or cream for manufacture into a milk product except in a container

- (a) that is marked, branded, or labelled to identify
 - (i) the owner of the container, and
 - (ii) the owner of the contents,
- (b) in the case of cream, that shows the net weight to the nearest half-pound of the container without its lid,
- (c) that is free from rust, open seams and other mechanical defects, and
- (d) that is used for no other purpose.

(2) No person shall remove or conceal any mark, brand or label on a container, other than the owner thereof.

(3) No person shall use a container for transporting milk or cream for manufacture into a milk product except

- (a) the owner of the container, and
- (b) a producer to whom the container was supplied for transporting milk or cream to the plant of the owner of the container.

(4) Where the operator of a plant supplies a container to a producer for the purpose of transporting milk or cream to the plant, the producer shall

- (a) not transport milk or cream in the container to any place except the plant, and
- (b) when the container is no longer required to transport milk or cream, return promptly the container in good condition to the plant.

(5) Where milk or cream is transported in containers owned by the producer to a plant, the operator of the plant shall return promptly the containers in good condition to the producer.

(6) An operator of a plant shall not supply or return to a producer a container for the purpose of using it in transporting milk or cream to the plant unless the container has been thoroughly washed and sterilized.

TRANSPORTATION OF MILK AND MILK PRODUCTS
FOR MANUFACTURE INTO MILK PRODUCTS

90.(1) No person shall transport milk or cream to a plant in a vehicle

- (a) which is in an insanitary condition, or
- (b) which has been used for a purpose that may cause contamination of milk or cream, or containers thereof, subsequently transported in the vehicle.

(2) No vehicle that has not been used to transport milk of producers to a plant when these regulations come into force, and no other vehicle after the 1st of January, 1960, shall be used to transport milk from producers to a plant except a vehicle with a covered van body having rigid walls, and insulated roof and a solid floor, so that wind, dust and moisture cannot seriously affect the milk or containers thereof or permit extreme heat or freezing conditions within the shipping space of the vehicle, but this subregulation does not apply to a vehicle owned by a producer and used to transport his own milk to a plant when the milk and containers thereof are protected from extreme heat and freezing conditions, dust and contamination.

(3) No person shall deck containers of milk or cream in a vehicle used to transport it to a plant without decking boards which are supported from the body of the vehicle and so located that clearance is provided for the containers in each deck.

(4) Where a vehicle is used to transport milk to a cheese factory the driver of the vehicle shall deliver the milk to the plant not later than 10 a.m. on the day of delivery from the 1st of May to the 31st of October.

(5) The driver of a vehicle used to transport milk or cream to a plant shall deliver the milk or cream as promptly as possible.

(6) The operator of a plant shall accept or refuse to accept milk or cream delivered to the plant within two hours of its arrival at the plant.

91.(1) No person shall transport milk or cream for manufacture into a milk product in a tank-truck other than a tank-truck having a tank with an inside lining of stainless steel that is free from rust, open seams and other mechanical defects.

(2) No operator of a plant shall receive milk or cream delivered to the plant in a tank-truck other than a tank-truck having a tank with an inside lining of stainless steel that is free from rust, open seams and other mechanical defects.

RECORDS KEPT AT PLANTS

92.(1) The operator of every plant shall keep a record of

- (a) all milk and cream received at the plant showing the date received and the name of the producer and his number, if any, used for identification of the producer,
- (b) the rejection of any milk or cream and the cause for rejection,
- (c) the weights and grades of all milk and cream accepted at the plant for processing into milk products, and
- (d) the results of all tests made at the plant under these regulations.

(2) The operator of a plant shall compile a summary of the results of all

- (a) sediment tests,
- (b) Methylene Blue reduction tests, and
- (c) Resazurin reduction tests,

of all milk received from producers and showing the number of producers supplying milk in each class of test.

(3) When a milk grader, milk tester, cream grader or cream tester, as the case may be, weighs, grades or tests milk or cream he shall immediately make an accurate record of the weight, grade or test, as the case may be, in ink or indelible lead.

(4) The operator of a plant shall keep a record of the full name and address of each producer who ships milk or cream to the plant.

(5) The operator of a plant shall keep all records of weights, grades and tests of milk and cream made at his plant for at least one year.

STATEMENTS TO PRODUCERS

93.(1) Where milk of a producer is delivered to a plant and accepted by the plant the operator thereof shall furnish to the producer a statement for each payment period showing

- (a) the name and address of the plant, and
- (b) the name of and the plant number, if any, to identify the producer, and
- (c) the weight of the milk of each delivery, and
- (d) the total weight of milk delivered in each period covered by a Babcock-test, and
- (e) the milk-fat content of the milk in each period covered by a Babcock-test, and
- (f) the price paid for each one hundred pounds of milk having a milk-fat content of 3.5 per cent, and the amount of the differential in price for each variation of one-tenth of 1 per cent in the milk-fat content of the milk from the milk-fat content mentioned in clause e, or
- (g) the total number of pounds of milk-fat in the milk delivered by the producer and the price paid for each pound of milk-fat, in the payment period, and

(h) the total price of the milk, and

(i) amounts deducted from the price of the milk for haulage charges, licence fees or other purpose, and the purpose for which each amount is deducted, and

(j) the net price payable to the producer, and

(k) the grades of the milk.

(2) In the statement under subregulation 1 the grades of the milk shall be shown by means of the following notations:

(a) where the sediment test classification was grade A, B, or C, by the capital letter A, B, or C, as the case may be, and

(b) where the bacterial activity as determined by the Methylene Blue reduction test or the Resazurin reduction test was grade 1, 2, 3, or 4, by the figures 1, 2, 3 or 4, as the case may be, and in the case of milk graded as "at least grade 2", by the figure and symbol "2+".

94.(1) Where cream of a producer is delivered to a plant and accepted by the plant the operator shall furnish to the producer a statement for each payment period showing

(a) the name and address of the plant,

(b) the name of the producer,

(c) the weight, grade and milk-fat content of the cream in the container or containers of each delivery,

(d) the date of each delivery,

(e) the total number of pounds of milk-fat in each grade of the cream delivered by the producer,

(f) the price paid for the cream of each grade,

(g) the total price for the cream,

(h) amounts deducted from the price of the cream for haulage charges, licence fees or other purpose, and the purpose for which each amount is deducted,

(i) the net amount payable to the producer, and

(j) in the case of Second Grade cream, the reason or reasons for the grade.

(2) In a statement under subregulation 1 the grades of the cream shall be shown by means of the following notations:

(a) where the cream is Special Grade, by the letters SP,

(b) where the cream is First Grade, by the figure 1, and

(c) where the cream is Second Grade, by the figure 2.

95.(1) No person shall falsify any records or statements, or make any incorrect determination that may affect the price paid for milk or cream at a plant.

(2) Where any record or statement in respect of the price paid for milk or cream at a plant is changed, the person responsible for the change shall write in ink, or indelible lead, his initials at the place in the record or statement where the change was made.

PASTEURIZATION OF CREAM

96.(1) No person shall use cream in the manufacture of butter at a plant except cream pasteurized by heating the cream

- (a) to a temperature of at least 170 degrees Fahrenheit and maintaining that temperature for at least ten minutes, or
- (b) in a continuous pasteurizer to a temperature of at least 185 degrees Fahrenheit,

and cooling the cream immediately thereafter to a temperature not higher than that suitable for churning of the cream.

(2) When a field-man tests butter to determine whether the cream used in its manufacture was pasteurized he shall make a storch test.

(3) Where a storch test is made of a sample of butter and the butter serum retains its colour for at least 30 seconds, the cream used in the manufacture of the butter is deemed to have been pasteurized.

PASTEURIZATION OF MILK AT A CHEESE FACTORY

97.(1) Where milk delivered to a cheese factory for the purpose of making cheese is pasteurized it shall be pasteurized by heating the milk

- (1) to a temperature of 143 degrees Fahrenheit and maintaining that temperature for 30 minutes, or
- (b) to a temperature of 161 degrees Fahrenheit and maintaining that temperature for 16 seconds,

and cooling the milk immediately thereafter to a temperature not higher than that suitable for setting the milk.

PASTEURIZATION OF SKIM-MILK AND WHEY

98.(1) No operator shall deliver skim-milk or whey to a producer of milk or cream except pasteurized skim-milk or whey.

(2) Skim-milk and whey shall be pasteurized by heating the skim-milk or whey to a temperature of 155 degrees Fahrenheit and maintaining that temperature for a period of 30 minutes.

PASTEURIZATION OF ICE CREAM MIX

99.(1) No person shall sell or offer for sale ice cream mix, or use ice cream mix in the processing of ice cream, except pasteurized ice cream mix.

(2) Ice cream mix shall be pasteurized by heating the ice cream mix

- (a) to a temperature of 155 degrees Fahrenheit and maintaining that temperature for 30 minutes, or
- (b) to a temperature of 175 degrees Fahrenheit and maintaining that temperature for 16 seconds,

and cooling the ice cream mix immediately thereafter to a temperature not higher than 50 degrees Fahrenheit.

MILK IN STORAGE

100.(1) Where milk is accepted at a plant and is not used immediately in the processing of a milk product the milk shall be cooled to a temperature not higher than 50 degrees Fahrenheit and maintained in storage at that temperature until it is used in the manufacture of a milk product.

(2) Milk in storage under subregulation 1 shall not be used in the processing of a milk product where the milk on removal from storage does not comply with the standards required for milk to be accepted at the plant when delivered to it.

CREAM IN STORAGE

101.(1) Where cream of Special Grade or First Grade is accepted at a plant for the making of butter and is not used immediately, the cream shall be cooled to a temperature not higher than 50 degrees Fahrenheit and maintained in proper storage at that temperature until it is so used.

(2) Where cream has been in storage under subregulation 1 and is removed from storage, and fails to comply with the standards of at least First Grade cream, it shall not be churned for the making of butter with Special Grade or First Grade cream.

PROHIBITION

102. No stale or rancid cream, stale or rancid butter, or melted ice cream shall be used in the preparation of ice cream mix or the processing of ice cream.

103. No person shall deliver skim-milk, buttermilk or whey to a producer in a container used for delivering milk or cream to a plant.

REPORTS TO THE BOARD

104.(1) The operator of each plant shall make a report to the Board of the operation of the plant during each month of the year, before the 15th of the following month.

(2) The report of the operator of a cheese factory shall be in form 25.

(3) The report of the operator of a creamery shall be in form 26.

(4) The report of the operator of a processing plant or milk-receiving station shall be in form 27.

REVOCATION

105. Ontario Regulations 214/56 are revoked.

Applications to Parliament Private Bills

PUBLIC NOTICE

LEGISLATIVE ASSEMBLY OF ONTARIO

The attention of Municipal Officials, Solicitors and all other persons who may be interested in the preparation of Private Bills for submission to the Legislative Assembly of Ontario is directed particularly to the following Rules of the House governing the submission of such Bills:

RULES RE SUBMISSION OF PRIVATE BILLS

63.—(1) No petition for any Private Bill is received by the House after the first two weeks of each Session nor may any Private Bill be presented to the House after the first three weeks of each Session; nor may any report of any Standing or Select Committee upon a Private Bill be received after the first six weeks of each Session and no motion for the general suspension or modification of this Rule shall be entertained by the House unless after reference made thereof, at a previous sitting of the House, to the several Standing Committees charged with the consideration of Private Bills upon Report submitted by two or more of such committees.

64.—(1) Any person desiring to obtain a Private Bill shall deposit with the Clerk of the House at least eight (8) days before the meeting of the House a copy of such Bill together with a fee of \$150, and if such Bill is not deposited by that time the applicant shall pay \$10 for each and every day which intervenes between the said eighth day and the date of the filing of the Bill.

(2) After the first reading of the Bill and before its consideration by the Committee to which it is referred, the applicant in every case shall pay the cost of printing the Act in the Statutes.

(3) The following charges shall also be levied and paid in addition to the foregoing:

(a) When any rule of the House is suspended with reference to a Bill or the Petition therefor, for each suspension, \$50.

(b) When a Bill is presented to the House after the first three weeks of the Session and before the end of the fourth week, \$75.

(c) When a Bill is presented after the fourth week of the Session, \$100.

(4) In case of any Bill incorporating a company or increasing the capital stock of a company already incorporated, there shall be paid to the Clerk of the House, by or on behalf of the applicant, before the same is reported to the House, the same fee as would be payable to the Provincial Secretary in the case of an incorporation or increase of capital under the provisions of The Ontario Companies Act, less the sum of \$150 already paid to the Clerk of the House.

(5) When a Bill is for the purpose of confirming by-laws, bonds, debentures or other securities, or authority is asked to borrow money or to increase borrowing powers, the following additional fees shall be paid according to the amount of money involved:

On amounts less than \$10,000, \$25; on amounts over \$10,000 and up to \$25,000, \$50; on amounts over \$25,000 and up to \$40,000, \$75; on amounts over \$40,000 and up to \$75,000, \$100; on amounts over \$75,000 and up to \$125,000, \$125; on amounts over \$125,000 and up to \$175,000, \$150; on amounts over \$175,000 and up to \$250,000, \$200; on amounts over \$250,000 and up to \$350,000, \$250; and an additional fee of \$50 for every \$100,000 over \$350,000.

66. All applications for Private Bills properly the subject of legislation by the Legislative Assembly of Ontario, within the purview of "The British North America Act, 1867," shall require a Notice, clearly and distinctly specifying the nature and object of the application and, where the application refers to any proposed work, indicating generally the location of the work, and signed by or on behalf of the applicants such Notice to be published as follows, viz.:

A notice inserted in THE ONTARIO GAZETTE and in one newspaper published in the Municipality affected, or if there be no newspaper published therein, then in a newspaper in the next nearest municipality in which a newspaper is published.

Such notice shall be continued in each case for a period of at least six weeks, during the interval of time between the close of the next preceding Session and the consideration of the Petition.

If the application is by a Municipal Corporation for authority to issue debentures the notice shall set out the particulars of the existing debenture debt and the amount of rateable property of the Municipality according to the last revised assessment roll of the Corporation, and in brief and general terms, the object for which the new issue of debentures is required.

67. Before any Petition praying for leave to bring in a Private Bill for the erection of a Toll Bridge is received by the House, the person or persons intending to petition for such Bills shall, upon giving the Notice required by preceding Rule, also, at the same time and in the same manner, give Notice of the rates which they intend to ask, the extent of the privileges the height of the arches, the interval between the abutments or piers for the passage of rafts and vessels, and mentioning also whether they intend to erect a drawbridge or not, and the dimensions of the same.

68. Before any Petition praying for leave to bring in a Bill for the construction of Railways, Tramways or canals is received by the House, the person or persons petitioning for such Bill shall deposit with the Clerk the following documents:

1. A map or plan upon a scale of not less than half an inch to the mile, showing the location upon which it is intended to construct the proposed work, and showing also the line of existing or authorized works of a similar character within, or in any way affecting the district or any part thereof which the proposed work is intended to serve. Such map or plan to be signed by the Engineer or other party making the same.

2. A book of reference in which shall be clearly set out the following information in separate schedules, namely:

SCHEDULE A.—The name of each municipality within which the proposed works or any part thereof are intended to be constructed; the population of each such municipality as returned by the next preceding census, the rateable value of the property within each such municipality, as returned by the next preceding assessment rolls thereof; and this schedule may contain in a separate statement similar information as to the adjoining districts intended to be served by the proposed work.

SCHEDULE B.—A general description of the nature, extent and proposed character of the contemplated works, and an estimate of the probable cost thereof, distinguishing the general items of construction and the cost thereof respectively, as well as the nature, extent and probable cost of all engines and car stock or other outfit or equipment necessary to the use and operation of the proposed undertaking, such schedule to be signed by the Engineer, or other person preparing the same.

SCHEDULE C.—An exhibit showing the total amount of capital proposed to be raised for the purposes of the undertaking and the manner in which it is proposed to raise the same, whether by ordinary shares, bonds, debentures or other securities, and the amounts of each respectively.

SCHEDULE D.—An estimate of the probable revenues of the proposed undertaking showing the sources whence the same are expected to be derived; the annual earnings thereof respectively; the probable annual cost of operation or working expenditure, and the annual net revenue applicable to the payment of interest on the proposed investments, such schedules to be signed by the person preparing the same.

72. When any Bill for confirming any Letters Patent, or Agreement, is presented to the House, the copy of such Letters Patent, or Agreement, shall be attached to it.

74. Every Private Bill, when read a first time shall unless it be an Estate Bill or a Bill providing for the consolidation of a floating debt or for the consolidation or renewal of debentures (other than local improvement debentures) of a Municipal Corporation, shall stand referred to the proper Standing Committee, and all petitions before the House, for or against the Bill, are considered referred to such Committee.

75. Every Private Bill, in so far as it provides for the consolidation of a floating debt or for the consolidation or renewal of debentures (other than local improvement debentures) of a Municipal Corporation when a Bill has been read the first time, shall, without special reference, stand referred to The Ontario Railway and Municipal Board for their report; and a copy of such Bill and of the Petition on which the same is founded shall be forthwith transmitted by the Clerk of the House to the Board, in order that the Board may, after an inquiry into the allegations set out in the Bill, and into any other matters which the Board may deem necessary in connection therewith, report to the House whether or not it is reasonable that such Bill or part thereof relating to the matters aforesaid shall be passed; and what alterations, if any, should be made in the same, and the Board shall make such inquiry accordingly and shall sign the same; and the said Report, Bill and Petition shall be transmitted to the Clerk, and the Report shall be read by the Clerk at the Table and shall be entered on the Journals of the House, and the Bill, together with the Report, shall stand referred to the Standing Committee on Private Bills.

76. Every Estate Bill, when read a first time shall without special reference, stand referred to the Commissioners of Estate Bills, for their Report, and a copy of such Bill, and of the Petition on which the same is founded, shall be forthwith transmitted by the Clerk of the House to the said Commissioners, or one of them, in order that they, or any two of them, may, after perusing the Bill, without requiring any proof of the allegations thereof, report to the House their opinion thereon under their hands; and whether presuming the allegation contained in the preamble to be proved to the satisfaction of the House, it is reasonable that such Bill do pass into a law; and whether the provisions thereof are proper for carrying its purposes into effect, and what alterations or amendments, if any, are necessary in the same, and in the event of their approving the said Bill they are to sign the same; and the said Report, with the said Bill and Petition, are to be transmitted by the said Commissioners to the Clerk; and the Report shall be read by the Clerk at the Table and shall be entered on the Journals of the House; and the Bill, together with the report shall stand referred to the Standing Committee on Private Bills, which is not to consider the said Bill, before the delivery of the said Report, Bill and Petition to the Chairman of the said Committee.

77. In the event of the Commissioners of Estate Bills reporting that, in their opinion, it is not reasonable that the Bill submitted to them shall pass into law such Bill shall not be further considered.

RODERICK LEWIS
Clerk of Legislative Assembly
of Ontario.

Sheriff's Sale of Lands

UNDER AND BY VIRTUE of an Execution issued out of the Supreme Court of Ontario, to me directed, against the lands and tenements of Patrick H. Quinn, Defendant, at the suit of MacKenzie Giddens and Elwood M. Hill, Plaintiffs, I have seized and taken in execution all the right, title, interest and equity of redemption of Patrick H. Quinn, Defendant, in and to:

All and singular that certain parcel or tract of land and premises situate, lying and being in the Town of Cobourg, in the County of Northumberland and Province of Ontario, being composed of Town Lots numbers 5 & 10 in Block "D" as laid down on a plan of the Buck and McKay property, situate on the West side of George Street and on the North side of Seminary Street, made by John K. Roche, a surveyor, being part of Lot Number 17 in Concession "A" of the Township of Hamilton, now within the limits of the Town of Cobourg.

On the property is said to be a main building containing 4 apartments and in the rear, an annex containing 2 apartments.

The property is subject to two mortgages.

All of which said right, title, interest and equity of redemption of the said Patrick H. Quinn in said lands and tenements I shall offer for sale by public auction in my office in the Court House at the Town of Cobourg, on Monday, July 28th, A.D. 1958, at 3.00 o'clock in the forenoon.

Dated at Cobourg, this 10th day of April, A.D. 1958.

THE FARM PRODUCTS MARKETING ACT

O. Reg. 93/58.

Marketing of Grapes for Processing.
New and Revoking O. Regs. 163/54 and 164/54.
Made—14th April, 1958.
Filed—14th April, 1958.

REGULATIONS MADE BY THE BOARD UNDER THE FARM PRODUCTS MARKETING ACT

INTERPRETATION

1. In these regulations

(a) "dealer" means a person engaged in buying, selling or transporting grapes but does not include

(i) a producer who transports in a vehicle owned or hired by him only the grapes produced by him, or

(ii) a processor who bought the grapes under the plan and the regulations;

(b) "grapes" means grapes produced in Ontario which are used by a processor for processing;

(c) "local board" means The Ontario Grape Growers' Marketing Board;

(d) "processing" means the manufacture of wine, grape juice or grape products, and includes bottling, fermenting or processing with sugar or sulphur dioxide or any other chemical;

(e) "processor" means a person engaged in the business of processing grapes; and

(f) "producer" means a person engaged in the production of grapes.

APPLICATION OF REGULATIONS

2. These regulations apply to the regulating and the controlling of the marketing of grapes locally within Ontario.

LICENCES FOR PRODUCERS

3.(1) No person shall commence or continue to engage in the production of grapes except under the authority of a licence as a grower of grapes in form 1.

(2) Subject to regulation 8, every producer shall be deemed to be the holder of a licence as a grower of grapes in form 1.

LICENCES FOR PROCESSORS

4.(1) No person shall commence or continue to engage in the processing of grapes except under the authority of a licence as a processor of grapes.

(2) No licence as a processor of grapes shall be issued except upon application therefor in form 1.

(3) A licence as a processor of grapes shall be in form 2.

LICENCES FOR DEALERS

5.(1) No person shall commence or continue to engage in the dealing in grapes except under the authority of a licence as a dealer in grapes.

(2) No licence as a dealer in grapes shall be issued except upon application therefor in form 3.

(3) A licence as a dealer in grapes shall be in form 4.

LICENCES

6.(1) A licence in form 2 or form 4 expires with the 31st of March next following the date on which the licence is issued.

(2) A licence shall be issued without charge.

7.(1) The Board may refuse to grant a licence where the applicant is not qualified by experience, financial responsibility and equipment to engage in properly the business for which the application was made, or for any other reason which the Board may deem proper.

(2) The Board may suspend or revoke or refuse to renew a licence for which application was made for failure to observe, perform or carry out the provisions of the Act, the regulations, the plan or any order or direction of the Board or the local board.

LICENCE FEES

8.(1) Every producer shall pay to the local board licence fees at the rate of 50 cents for each ton or fraction thereof of grapes delivered to a processor and processed by the processor.

(2) The processor shall deduct the licence fees payable by the producer from the sum of money due to the person from whom the grapes were received.

(3) The processor shall forward to the local board the licence fees deducted not later than the 1st of December in any year.

(4) Subject to subregulations 5 and 6, processors who buy grapes shall forward payments for the grapes to the local board.

(5) Subject to subregulation 6, the local board shall within seven days of receipt of any payment from the processor forward payment for the grapes to the person who delivered the grapes to the processor.

(6) Where the processor issues a cheque payable to the person from whom the grapes were received, the processor shall send the cheque accompanied by a duplicate statement of account to the local board for transmission of

(a) the cheque, and

(b) one copy of the duplicate statement of account,

to the person named in the cheque as payee.

(7) Every cheque issued by a processor under subregulation 6 shall be negotiable without charge by the person named in the cheque as payee for the amount set out in the duplicate statement of account at the branch of a chartered bank located nearest to the place where delivery of the grapes was made to the processor.

DELEGATION OF POWERS

9. The Board delegates to the local board the power

(a) to stimulate, increase and improve the marketing of grapes by such means as it may deem proper;

(b) to co-operate with a marketing board, a local board or a marketing agency of any other province for the purpose of marketing grapes; and

(c) to do such acts and make such orders and issue such directions as are necessary to enforce the due observance and carrying out of the provisions of the Act, the regulations and the plan.

AUTHORIZATION TO LOCAL BOARD

10.(1) The Board authorizes the local board to use any class of licence fees and other moneys payable to it, for the purposes of paying the expenses of the local board, carrying out and enforcing the Act and the regulations and carrying out the purposes of the plan.

(2) The Board authorizes the local board to establish a fund in connection with the plan for the payment of any moneys that may be required for the purposes mentioned in subregulation 1.

11. The Board authorizes the local board to require the price or prices payable or owing to the producers for grapes to be paid to or through the local board.

12. The Board authorizes the local board to prohibit the marketing locally within Ontario of any class, variety or grade of grapes.

NEGOTIATING AGENCIES

13.(1) There shall be a negotiating agency consisting of six persons to be known as "The Negotiating Committee for Grapes for Processing", three of whom shall be appointed annually by the local board and three of whom shall be appointed annually by the processors.

(2) The local board and the processors shall appoint their respective members of The Negotiating Committee for Grapes for Processing and shall notify the Board in writing of their names and addresses not later than the first of August in each year.

(3) There shall be a negotiating agency consisting of six persons to be known as "The Negotiating Committee for Selling and Transporting of Grapes for Processing", three of whom shall be appointed annually by the local board and three of whom shall be appointed annually by the dealers.

(4) The local board and the dealers shall appoint their respective members of The Negotiating Committee for Selling and Transporting of Grapes for Processing and shall notify the Board in writing of their names and addresses not later than the first of August in each year.

(5) Subject to subregulations 6 and 7, the members of the negotiating agencies appointed under subregulations 2 or 4 shall be and remain members until the 1st of October of the year in which the members were appointed.

(6) Where a member of a negotiating agency appointed under subregulations 2 or 4 dies or resigns or is unavailable to act prior to the expiration of his term of membership, the local board or the processors or the dealers, as the case may be, who appointed him shall appoint a person for the unexpired term of the member who died, resigned or was unavailable to act.

(7) Where the local board or the processors or the dealers, as the case may be, fail to make an appointment under subregulation 6 within seven days after a vacancy occurs, the Board may appoint such persons as are necessary to complete the negotiating agency.

(8) Where the local board or the processors or the dealers, as the case may be, fail to appoint the persons under subregulations 2 and 4, the Board shall appoint such persons as are necessary to complete the negotiating agency.

14.(1) The Negotiating Committee for Grapes for Processing is empowered to adopt or settle by agreement

- (a) minimum prices for grapes or for any class, variety, grade or size of grapes;
- (b) terms, conditions and forms of agreements relating to the producing or marketing of grapes; and
- (c) any charges, costs or expenses relating to the production or marketing of grapes, other than charges by dealers for handling, transporting and selling grapes.

(2) The Negotiating Committee for Selling and Transporting of Grapes for Processing is empowered to adopt or settle by agreement, handling, transporting or selling charges by dealers for grapes which the dealers handle, transport or sell.

15. A meeting of a negotiating agency may be convened by a notice in writing given by the three members of the negotiating agency appointed by the local board, or by the processors, or by the dealers, to the other members of the negotiating agency at least seven days, but not more than ten days, before the date of the meeting stating the time and place of the meeting.

ARBITRATION

16.(1) Where a meeting of a negotiating agency is not held in accordance with the notice in regulation 15, or where a meeting is held and the negotiating agency does not arrive at an agreement respecting all matters which it is empowered to adopt or settle by agreement, on or before the 20th of August in any year, the matters in dispute shall be referred by the Board to an Arbitration Board.

(2) Where a negotiating agency decides before the 20th of August that an agreement on all matters which it is empowered to adopt or settle by agreement cannot be reached it shall so notify the Board.

(3) Where the negotiating agency does not arrive at an agreement under subregulations 1 or 2 it may submit in writing to the Board a statement or statements of the matters in dispute.

(4) The Arbitration Board shall consist of three members.

(5) One member may be appointed by the three members of the negotiating agency appointed by the local board, and one other member may be appointed by

(a) the three members of the negotiating agency appointed by the processors, or

(b) the three members of the negotiating agency appointed by the dealers,

as the case may be.

(6) Where two members are appointed to the Arbitration Board in accordance with subregulation 5, the two members so appointed may appoint a third member to the Arbitration Board, but where the two members fail to agree on the third member within seven days after the Board was notified under subregulation 2, or the 20th of August, as the case may be, the Board shall appoint the third member.

(7) Where the three members of the negotiating agency appointed by the local board, or

(a) the three members of the negotiating agency appointed by the processors, or

(b) the three members of the negotiating agency appointed by the dealers,

as the case may be, fail to appoint a member to the Arbitration Board in accordance with subregulation 5 within seven days after the Board was notified under subregulation 2, or the 20th of August, as the case may be, the Board shall appoint such members as are necessary to complete the Arbitration Board.

(8) The Board shall submit to the Board of Arbitration any statement or statements of the matters in dispute received from the negotiating agency under subregulation 3.

(9) The Arbitration Board shall meet forthwith after the appointment of the three members thereof and shall make an award in respect of the matters referred to it, or all matters which the negotiating agency is empowered to adopt or settle by agreement, as the case may be.

THE POWER COMMISSION ACT

O. Reg. 94/58.

General Regulations.

Amending O. Reg. 324/51.

Made—15th January, 1958.

Approved—23rd January, 1958.

Filed—16th April, 1958.

REGULATIONS MADE BY THE COMMISSION
UNDER THE POWER COMMISSION ACT

1. In these regulations "principal Regulations" means Ontario Regulations 324/51.

2.(1) Regulation 1 of the principal Regulations is amended by adding immediately after clause .3 the following clause:

.03 "aluminum-sheathed cable" means a cable consisting of one or more approved type insulated conductors assembled into a core and covered with a liquid-tight and gas-tight sheath of aluminum or aluminum alloy;

(2) Clause .7 of regulation 1 of the principal Regulations is revoked and the following substituted therefor:

.7 "armour" means a wrapping of galvanized interlocking steel strip or other suitable metal forming an integral part of the assembly of certain types of insulated cables, wires or cords;

(3) Sub-clause i of clause .9 of regulation 1 of the principal Regulations is amended by striking out "qualified" in the first line.

(4) Regulation 1 of the principal Regulations is amended by adding immediately after clause .46 the following clause:

.046 "extra-low-potential power-circuit" means a circuit other than a remote-control circuit or a signal circuit, operating at a potential not in excess of 30 volts supplied from a transformer or other device restricted to a rated out-put not in excess of 1000 volt-amperes but in which the current is not limited to the requirements for Class 2 remote-control circuits set out in subregulation 2 of regulation 393;

(5) Regulation 1 of the principal Regulations is amended by adding immediately after clause .84 the following clause:

.084 "M.I. cable" means a mineral-insulated cable having one or more bare solid conductors supported and insulated by a highly compressed refractory material and enclosed in a liquid-tight and gas-tight metallic sheathing;

(6) Clause .89 of regulation 1 of the principal Regulations is revoked and the following substituted therefor:

.89 "open" when applied to motors or other electrical machines or devices means that any moving parts and any windings or other live parts are exposed;

(7) Clause .112 of regulation 1 of the principal Regulations is revoked.

(8) Regulation 1 of the principal Regulations is amended by adding immediately after clause .113 the following clause:

.0113 "splitter box" means a metal troughing or box containing terminal blocks or bus bars having

(i) main and distribution terminals, and

(ii) all bare live-parts supported by insulating material;

3. Regulation 23 of the principal Regulations is amended by striking out "Where any electrical installation or part thereof is made in or upon any land, building or premises to which electric power or energy has not previously been supplied" in the first, second, third and fourth lines and inserting in lieu thereof "Where any electrical installation or part thereof to which electric power or energy has not previously been supplied is made in or upon any land, building or premises".

4. Subregulation 3 of regulation 26 of the principal Regulations is revoked and the following substituted therefor:

(3) In any case in which for a given purpose no standard electrical equipment of the exact size or rating required is procurable, equipment of the next larger size or rating shall be used unless permission of an inspector is obtained to use equipment of a smaller size or rating.

5.(1) Subregulation 2 of regulation 40 of the principal Regulations is amended by striking out "or" in clause c, and by adding thereto the following clauses:

(e) is M.I. cable; or

(f) is aluminum-sheathed cable.

(2) Regulation 40 of the principal Regulations is amended by adding thereto the following subregulations:

(3) Where thermal insulation made of or faced with metal is used

(a) a one-inch separation shall be provided between the thermal insulation and the knob and tube wiring;

(b) non-metallic sheathed cable may be in contact with the insulation; and

(c) all metal boxes and fittings shall be grounded or the thermal insulation shall be installed at least six inches from all boxes and fittings.

(4) Neither M.I. cable nor aluminum-sheathed cable shall be subjected to thermal insulation likely to have a corrosive action on the cable sheathing.

6. Regulation 43 of the principal Regulations is revoked.

7. Clauses a and b of subregulation 2 of regulation 45 of the principal Regulations are revoked and the following substituted therefor:

(a) a separate service is required for fire pumps, emergency lights, welding loads, X-ray loads or water heaters when supplied from a feeder controlled by a supply authority; or

(b) in respect of a building of large area requiring an unusually large electrical load, an inspector has authorized an additional service.

8.(1) Subregulation 2 of regulation 50 of the principal Regulations is revoked and the following substituted therefor:

(2) The cable shall be protected against mechanical injury

- (a) on the pole between a point at least 8 feet above ground level and a point at least 1 foot below ground level; and
- (b) at the point of entrance into the building; and
- (c) where the cable is less than 7 feet above ground in lanes and driveways used for commercial and industrial purposes, by suitable guards of not less than No. 10 U.S. sheet-metal gauge adequately secured to protect the cable.

(2) Regulation 50 of the principal Regulations is amended by adding thereto the following subregulation:

- (4) Where service conductors are buried in direct contact with the earth they shall be of a type approved for that purpose and shall be protected against mechanical injury
 - (a) by burial in a trench at least 18 inches below ground level and where the trench is installed in rock or stony ground by a layer of sand at least 3 inches in depth both above and below the conductors;
 - (b) by suitable material such as creosoted planking or a layer of concrete placed across the trench immediately above the conductors; and
 - (c) at the commencement and termination of underground runs to prevent mechanical injury to the conductors resulting from movements of soil and rock in proximity thereto caused by frost action.

9.(1) Clauses *a*, *b*, *c* and *d* of subregulation 1 of regulation 51 of the principal Regulations are revoked and the following substituted therefor:

- (a) in rigid conduit;
- (b) in busway;
- (c) in flexible conduit if the conductors are lead-sheathed;
- (d) in armoured cable type ACL;
- (e) in service entrance cable type ASE or type SE, either of which may be mounted in contact with the wall;
- (f) in single conductor M.I. cable larger than No. 4 B. & S. gauge or in multi-conductor M.I. cable in any size, either of which may be exposed and mounted in contact with the wall; or
- (g) in aluminum-sheathed cable when permitted by an inspector designated by the Commission for the purpose of this clause.

(2) Subregulation 2 of regulation 51 of the principal Regulations is amended by striking out "clause *d*" in the first line and inserting in lieu thereof "clause *e*".

(3) Regulation 51 of the principal Regulations is amended by adding thereto the following subregulation:

- (3) Where the conductors for a consumer's service run in one of the ways required by clauses *b*, *c*, *d*, *f* and *g* of subregulation 1 are less than 7 feet above ground on the exterior surfaces of walls in lanes or driveways they shall be protected by rigid steel conduit or an iron guard of at least No. 10 U.S. sheet-metal gauge either of which must be secured by bolts or lag screws at least $\frac{3}{8}$ inch in diameter and $2\frac{1}{2}$ inches long.

10. Subregulation 2 of regulation 52 of the principal Regulations is revoked and the following substituted therefor:

- (2) The neutral conductor of a consumer's service if No. 2 B. & S. gauge or smaller shall have a white covering and if larger than No. 2 B. & S. gauge shall be identified.

11. Regulation 54 of the principal Regulations is revoked and the following substituted therefor:

- 54.(1) Where supply service conductors are run aerially to a building, the supply end of the consumer's service shall be fitted with an approved weather-proof service fitting which shall be installed in a location satisfactory to both an inspector and the supply authority and, in any event, not less than 15 feet and not more than 30 feet above side-walk or ground level.
- (2) The service fitting shall be installed in such manner as to ensure that the supply service wires will be maintained at the ground clearance levels prescribed by subregulations 2 and 3 of regulation 1103.

12. Regulation 55 of the principal Regulations is amended by adding thereto the following subregulation:

- (2) Where single conductor M.I. cable larger than No. 4 B. & S. gauge is used, service fittings are not required but the upper end of the cable
 - (a) shall be bent to form a drip loop;
 - (b) shall have a weatherproof-seal housing; and
 - (c) shall conform to the requirement of subregulation 1 of regulation 263b.

13. Regulation 56 of the principal Regulations is amended by adding thereto the following subregulation:

- (2) When service conductors are run in service conduit or in similar enclosures in locations where, in the opinion of an inspector, condensation is likely to occur the conduit or enclosure shall be effectively drained or sealed.

14. Regulations 58 and 59 of the principal Regulations are revoked and the following substituted therefor:

- 58. The neutral conductor of a consumer's service shall not be bare unless
 - (a) the supply is single phase, alternating current and not more than 150 volts to ground;
 - (b) the neutral conductor of the supply system is grounded to a metallic water main or other grounding system, whether or not any grounds are made at the consumer's service; and
 - (c) the bare neutral conductor is run in the same protective conduit, armouring or covering as the other conductors of the consumer's service.

59. A bare neutral conductor of a consumer's service shall conform to the requirements of subregulation 6 of regulation 290.

15. Subregulation 2 of regulation 60 of the principal Regulations is revoked and the following substituted therefor:

- (2) Notwithstanding the provisions of clause *b* of subregulation 1, a service box may

- (a) be installed on the outer face of an external wall of a building; or
- (b) in rural districts where a group of buildings is to be served by one service, be installed on a pole;

but the service box shall be so located or protected that it shall not be liable to mechanical injury or harm from weather and no part of the service box shall, without the permission of an inspector, be less than 6 feet above the ground or floor directly beneath it.

16. Regulation 63 of the principal Regulations is amended by striking out "Subject to the provisions of regulation 61", in the first line.

17. Subregulation 2 of regulation 64 of the principal Regulations is revoked and the following substituted therefor:

- (2) Where over-current trip coils are used with circuit-breakers, one trip coil shall be installed on each ungrounded conductor of the circuit, but where the capacity of the transformers and the extent of the network supplying the service is sufficiently small, one trip coil in each phase of a 4-wire 2-phase ungrounded service may be used.

18. Regulation 68 of the principal Regulations is revoked and the following substituted therefor:

- 68. A low-potential 2- or 3-phase consumer's service may be subdivided into single-phase subservices provided the potential from any wire of a single-phase service to ground does not exceed 150 volts.

19. The principal Regulations are amended by adding thereto the following regulation:

- 75a. Conductors supplying other apparatus shall not be enclosed within enclosures housing circuit-breakers, or controllers or switches.

20. Clause *f* of regulation 78 of the principal Regulations is revoked and the following substituted therefor:

- (f) where mounted outdoors, be of weatherproof construction or in weatherproof enclosures.

21.(1) Subregulation 1 of regulation 79 of the principal Regulations is amended by striking out "unless special permission is obtained to do otherwise" in the last line.

(2) Subregulation 2 of regulation 79 of the principal Regulations is revoked and the following substituted therefor:

- (2) Notwithstanding subregulation 1, the supply authority may require a larger space or a space of different dimensions.

22.(1) Subregulations 2, 3 and 5 of regulation 82 of the principal Regulations are revoked and the following substituted therefor:

- (2) Conductors to be used in locations likely to be damp places shall be of the rubber-insulated, R, RH or RW, type or the thermoplastic-insulated, T, TW or TWH, type.
- (3) Conductors likely to be subjected to corrosive action shall be of the weatherproof, WP, type, the varnished-cloth insulated, V, type, the rubber-insulated, R, RH or RW, type or the thermoplastic-insulated, T, TW or TWH, type as may be directed by an inspector.

- (5) Where conductors are buried in direct contact with the earth, they shall be of a type approved for the purpose and shall be protected against mechanical injury in conformity with clauses *a*, *b* and *c* of subregulation 4 of regulation 50.

23. Regulation 83 of the principal Regulations is revoked and the following substituted therefor:

- 83.(1) Where conductors, other than those connected to a hoist, are installed in hoist-ways they shall be run

- (a) in rigid conduit,
- (b) in flexible conduit,
- (c) in M.I. cable,
- (d) in aluminum-sheathed cable, or
- (e) in electrical metallic tubing,

securely fastened to the hoist-way and, subject to subregulation 2, shall be so arranged that terminal outlets and junction boxes open outside the hoist-way.

- (2) Pull-boxes for supporting and pulling in conductors installed in long runs may open inside the hoist-way.
- (3) High-potential conductors shall not be installed in hoist-ways.

24. Clause *c* of regulation 85 of the principal Regulations is revoked and the following substituted therefor:

- (c) in the form of armoured cable, M.I. cable or aluminum-sheathed cable.

25. Subregulation 2 of regulation 86 of the principal Regulations is revoked and the following substituted therefor:

- (2) Where ungrounded conductors of No. 4 B. & S. gauge or larger enter a race-way in a cabinet, pull-box, junction box or auxiliary gutter, the conductors shall be
 - (a) protected by a substantial bushing providing a smoothly-rounded insulating surface, or
 - (b) separated from the race-way fitting by substantial insulating material securely fastened in place,

and, where conduit bushings are constructed wholly of insulating material, locknuts shall be provided inside and outside the enclosure to which the conduit is attached.

26. Regulation 87 of the principal Regulations is amended by adding thereto the following subregulations:

- (1a) Where it is not practicable to keep the electric wiring at least 6 feet from the lightning-conductors the neutral conductors shall be bonded to the lightning-conductors at the maximum elevation of the wiring.
- (1b) Where it is not practicable to keep the electric wiring at least 6 feet from the lightning-conductors and to bond the neutral conductors to the lightning-conductors as required in subregulation 1 and 1a the service neutrals shall be bonded to the lightning-conductors.

27. Subregulation 1 of regulation 90 of the principal Regulations is revoked and the following substituted therefor:

- (1) Where stranded conductors are held by wire-binding terminals or solderless connectors, the strands shall be confined so as to prevent short-circuits and grounds.

28. Regulation 91 of the principal Regulations is amended by adding thereto the following subregulation:

- (3) Where conductors are run in multiple they shall be
 - (a) of similar conductivity,
 - (b) of No. 1/0 B. & S. gauge, or larger,
 - (c) free of splices,
 - (d) of the same circular mil area,
 - (e) insulated with the same type of insulation,
 - (f) of the same length, and
 - (g) terminated at both ends so as to ensure equal division of the total current among the conductors.

29. Subregulations 2 and 3 of regulation 93 of the principal Regulations are revoked and the following substituted therefor:

- (2) Where used on metal surfaces, conductors of a thermoplastic-insulated, T, TW or TWH, type shall not be mounted on split knobs or cleats.
- (3) Conductors for use in damp places shall be of the rubber-insulated, R, RH or RW, type or the thermoplastic-insulated, T, TW or TWH, type.

30. Regulation 94 of the principal Regulations is amended by adding thereto the following subregulation:

- (5) Conductors shall be kept distant at least 1 inch from adjacent metal piping or other conducting material.

31. Regulation 107 of the principal Regulations is revoked and the following substituted therefor:

107. Conductors shall be of the rubber-insulated, R, RH or RW, type or the thermoplastic-insulated, T, TW or TWH, type.

32. Sub-clause ii of clause a of subregulation 1 of regulation 115 of the principal Regulations is revoked and the following substituted therefor:

- (ii) the moisture resisting, RW, TW or TWH, type run in conduit; or

33. Regulation 116 of the principal Regulations is revoked and the following substituted therefor:

- 116.(1) Where knob-and-tube wiring is connected to conductors in race-ways, armoured-cable or non-metallic sheathed cable, the junction shall be made
 - (a) in a box having a separately bushed hole for each conductor, or
 - (b) by means of a fitting without splice, tap or joint within the fitting.

- (2) Where the conductor is encased in flexible-tubing between the last support and the box specified in clause a of subregulation 1, the tubing shall be run into the box.

34. Regulation 125 of the principal Regulations is revoked and the following substituted therefor:

- 125.(1) Conductors shall not be run on or across the upper faces of ceiling joists, or the lower faces of rafters in attics or roof spaces, where the vertical distance between the joists and the rafters exceeds 3 feet.

- (2) Where conductors are run on or across the lower faces of basement joists they shall be protected in the manner prescribed by subregulation 1 of regulation 96 and regulation 97.

35. Subregulation 1 of regulation 128 of the principal Regulations is revoked and the following substituted therefor:

- (1) Notwithstanding regulation 127, where conductors or cables are supported within 6 inches of a non-metallic box, they need not be clamped to the box.

36. Regulation 134 of the principal Regulations is revoked and the following substituted therefor:

- 134.(1) Race-ways which are not metal race-ways, busways, or auxiliary gutters, may be of insulating material.
- (2) Race-ways, with the permission of an inspector, may be formed in concrete during the pouring and setting thereof where special means are used to ensure an inner surface sufficiently smooth to prevent damage to a protective sheath or insulation.
- (3) Race-ways and the armouring and lead-sheathing of cable shall be electrically and mechanically continuous throughout the run.
- (4) Where lead-sheathed armoured-cable type ACL is used, the lead sheath need not be bonded at outlet and junction boxes.

37. Subregulation 2 of regulation 135 of the principal Regulations is amended by striking out "No. 1 B. & S. gauge" in the first and second lines and inserting in lieu thereof "No. 4 B. & S. gauge".

38. Subregulation 1 of regulation 140 of the principal Regulations is revoked and the following substituted therefor:

- (1) Conductors for use under ordinary conditions shall be of the rubber-insulated, R, RH or RW, type, the thermoplastic-insulated, T, TW or TWH, type or varnished-cloth insulated, V, type.

39. Subregulation 2 of regulation 141 of the principal Regulations is amended by striking out "T or TW, type" in the second line and inserting in lieu thereof "T, TW or TWH, type".

40. Regulation 143 of the principal Regulations is amended by adding thereto the following subregulation:

- (1a) Conductors may be run in multiple in a race-way or enclosure where the conductors are
 - (a) of similar conductivity,
 - (b) No. 1/0 B. & S. gauge or larger,
 - (c) free of splices,
 - (d) of the same circular mil area,

- (e) insulated with the same type of insulation,
- (f) of the same length,
- (g) terminated at both ends so as to ensure equal division of the total current among the conductors, and
- (h) installed so that there are the same number of conductors from each phase.

(1b) Where a supply service includes a neutral conductor and conductors are run in multiple in accordance with subregulation 1a enclosures or race-ways shall each contain an identical neutral conductor.

41. Subregulation 1 of regulation 146 of the principal Regulations is amended by striking out "or TW, type" in the fourth line and inserting in lieu thereof "TW or TWH, type".

42. Regulation 147 of the principal Regulations is amended by striking out "TW, type" in the seventh line and inserting in lieu thereof "TW, or TWH, type".

43. Regulation 150 of the principal Regulations is revoked and the following substituted therefor:

- 150.(1) Subject to subregulation 2 no conduit having an internal diameter of less than $\frac{1}{2}$ inch, electrical trade size, shall be used.
- (2) Flexible conduit having an internal diameter of $\frac{7}{16}$ inch, may be used for the connection of equipment in runs not exceeding 5 feet in length.

44. Regulation 156 of the principal Regulations is amended by striking out "by special permission" in the first and second lines.

45. Subregulation 1 of regulation 161 of the principal Regulations, except Table 4, is revoked and the following substituted therefor:

- (1) Where electrical metallic tubing is used to contain rubber-insulated conductors, RF-32, FF-32, R, RH or RW, types, or thermoplastic-insulated conductors, TF, TFF, T, TW or TWH, types, operating at a potential of not more than 600 volts, tubing having an internal diameter of $\frac{1}{2}$ inch, $\frac{3}{4}$ inch, 1 inch, $1\frac{1}{4}$ inches, $1\frac{1}{2}$ inches or 2 inches, electrical trade size, shall not contain more conductors of a size shown in column 1 of Table 4 than the number prescribed in columns 2, 3, 4, 5, 6 and 7 respectively of the table.

46. The principal Regulations are amended by adding thereto the following regulation:

161a. Where electrical metallic tubing is used in circumstances referred to in clauses a, b, c and d of subregulation 1 of regulation 277 and which are not governed by regulations 161 and 162 the size of tubing used shall subject to regulations 159 and 160 be ascertained according to regulation 277.

47. Regulation 163 of the principal Regulations is amended by striking out "made up" in the second line.

48. The heading immediately before regulation 172 of the principal Regulations is struck out and the following substituted therefor:

USE OF RIGID AND FLEXIBLE CONDUIT, ARMoured-CABLE, LEAD-SHEATHED ARMoured-CABLE, M.I. CABLE AND ALUMINUM-SHEATHED CABLE

49. Regulation 172 of the principal Regulations is revoked and the following substituted therefor:

172.(1) Rigid conduit, flexible conduit, armoured-cable, M.I. cable or aluminum-sheathed cable shall be used for

- (a) branch-circuit wiring of stationary motors of 1 or more horsepower at 110 or more volts in places other than private residences,
- (b) wiring in buildings of fire-proof or mill construction,
- (c) subject to the provisions of regulation 119, wiring in
 - (i) hospitals, hotels, asylums, churches, halls, public institutions, and
 - (ii) other buildings used for public meeting or assembly having a floor area above ground level of at least 1,500 square feet,

(d) wiring in educational institutions having

- (i) two or more floors above ground level,
- (ii) four or more classrooms, or
- (iii) a floor area above ground level of more than 1,500 square feet,

(e) wiring from service boxes to meters except where equivalent protection is provided,

(f) wiring run on the exterior surfaces of buildings to electric signs located on or attached to the building,

(g) surface and concealed wiring in buildings having metal-lathed or metal-covered walls or ceilings where the conductors are not more than 1 inch from the metal at any place other than an outlet, and

(h) wiring for fire-escape lights and exit lights.

(2) Where flexible conduit is used under clause f of subregulation 1 the conductors shall be lead-covered and where armoured-cable is used it shall be lead-sheathed type ACL.

(3) Nothing in subregulations 1 or 2 shall prevent the use of surface race-ways, underfloor-race-ways, flexible conduit or armoured-cable where their use is specifically authorized by these regulations.

50. Subregulation 2 of regulation 175 of the principal Regulations is revoked and the following substituted therefor:

(2) Where the voltage between the conductors contained therein is not in excess of 300 volts and the voltage from each conductor to ground is not in excess of 150 volts, an approved metal moulding having a thickness of less than No. 20 U.S. sheet-metal gauge may be used for the extension of a previously approved wiring-system.

51. Subregulation 1 of regulation 180 of the principal Regulations is revoked and the following substituted therefor:

(1) Underfloor-race-ways shall be used only in normally dry locations and may be installed under the surface of concrete or other flooring material.

52. Subregulation 2 of regulation 189 of the principal Regulations is revoked and the following substituted therefor:

(2) Where

- (a) it is impossible to install the concrete pads required by regulation 181, and
- (b) a race-way crosses conduit, structural steel or other metal

armoured-cable or M.I. cable shall be used for branch-circuits.

53. Subregulation 2 of regulation 190 of the principal Regulations is revoked and the following substituted therefor:

- (2) Subregulation 1 shall not apply where the race-way contains only M.I. cable, armoured-cable or non-metallic sheathed cable.

54. Regulation 197 of the principal Regulations is revoked and the following substituted therefor:

- 197. Where a box is provided in a wall in a bathroom for a lamp-holder, fixture, convenience-outlet or wall-switch, the box shall be of metal and grounded.

55. Subregulation 1 of regulation 201 of the principal Regulations is revoked and the following substituted therefor:

- (1) Where the conductors are supported on or in close proximity to the exterior surfaces of buildings they shall be installed and protected so that they shall not be a hazard to persons or be exposed to mechanical injury and they shall not without the permission of an inspector be less than 15 feet from the ground.

56.(1) Subregulation 1 of regulation 202 of the principal Regulations is amended by striking out "6 inches" in the fifth line and inserting in lieu thereof "8 inches".

(2) Regulation 202 of the principal Regulations is amended by adding thereto the following subregulation:

- (4) Where conductors having a voltage of 220 volts or less and conductors of more than 220 volts but not exceeding 750 volts are mounted on the same pole, the conductors of higher voltage shall be mounted above, and kept distant at least 12 inches from, the conductors of lower voltage.

57. Subregulation 2 of regulation 204 of the principal Regulations is revoked and the following substituted therefor:

- (2) With the permission of an inspector the conductors may be less than 8 feet but not less than 6 feet above the highest point of a flat roof.

58. Regulation 205 of the principal Regulations is revoked and the following substituted therefor:

- 205. Conductors shall not be carried over buildings until the plans and specifications for the work are approved by an inspector.

59. Subregulation 1 of regulation 208 of the principal Regulations is revoked and the following substituted therefor:

- (1) There shall not be more than 12 outlets on a 2-wire branch-circuit which serves pendants or fixtures wired with flexible cord or fixture wire of less than No. 14 B. & S. gauge unless the connected load is known and

- (a) the load current does not exceed 12 amperes on a No. 14 B. & S. gauge circuit, or

- (b) the load current exceeds 12 amperes but does not exceed 20 amperes on a No. 14 B. & S. gauge circuit and M.I. cable is used.

60.(1) Subregulation 1 of regulation 211 of the principal Regulations is amended by inserting after "armoured-cable" in the third line "M.I. cable, aluminum-sheathed cable".

(2) Subregulation 4 of regulation 211 of the principal Regulations is revoked and the following substituted therefor:

- (4) Shallow boxes and plates shall not be used unless

- (a) it is not practicable to install outlet boxes, and

- (b) there are not more than 2 conductors.

61. Subregulation 1 of regulation 212 of the principal Regulations is amended by striking out "or" in the third line, and inserting after "open wiring" in the third line "or knob-and-tube wiring".

62. Subregulation 2 of regulation 213 of the principal Regulations is amended by striking out "No. 1 B. & S. gauge" in the first line and inserting in lieu thereof "No. 4 B. & S. gauge".

63. Regulation 217 of the principal Regulations is revoked.

64. Regulation 218 of the principal Regulations is revoked and the following substituted therefor:

- 218. The wiring contained in pull-in boxes, junction boxes, outlet boxes, cabinets and gutters shall be accessible and where any of the wiring devices are installed above false ceilings there shall be a vertical space of at least 3 feet between the false ceiling and the ceiling.

65. Subregulation 3 of regulation 225 of the principal Regulations is amended by striking out "by special permission" in the first line.

66. Subregulation 1 of regulation 228 of the principal Regulations is amended by adding at the end thereof "except that a flush device box of minimum dimensions of 2 7/8 inches in length, 1 13/16 inches in width and 2 7/16 inches in depth in which is installed a flush device or cable clamps may contain a maximum number of 6 No. 14 B. & S. gauge conductors".

67. Subregulation 1 of regulation 231 of the principal Regulations is amended by striking out "40 circuits" in the second line and inserting in lieu thereof "42 circuits".

68. Regulation 233 of the principal Regulations is amended by adding at the end thereof "or any longer interval for which it has been approved and which is clearly marked on the auxiliary gutter".

69. Subregulation 1 of regulation 235 of the principal Regulations is revoked and the following substituted therefor:

- (1) The aggregate cross-sectional area of the conductors and their insulation shall not exceed 20 per cent of the cross-sectional area of the gutter in which they are contained.

70. Regulation 241 of the principal Regulations is revoked and the following substituted therefor:

- 241.(1) Wire-ways, busways and fittings shall not be installed

- (a) in other than exposed dry locations unless they are approved for installation outside or in wet or damp locations,
- (b) in locations where they are subject to severe mechanical injury,
- (c) in locations where they are subject to corrosive vapours,
- (d) in hoistways,
- (e) in hazardous locations, or
- (f) in storage battery rooms.

(2) Approved types of busways and fittings may be used as risers or feeders in office buildings of fire-proof construction.

71. Regulation 243 of the principal Regulations is revoked and the following substituted therefor:

243. The conductors used in wire-ways shall be of the rubber-insulated, R, RH or RW, type, the thermoplastic-insulated, T, TW or TWH, type or the varnished-cloth insulated, V, type and shall not be exposed to temperatures exceeding those specified in Table 1.

72. Subregulation 2 of regulation 244 of the principal Regulations is revoked.

73. Subregulation 1 of regulation 245 of the principal Regulations is revoked and the following substituted therefor:

- (1) Wire-ways shall not contain more than 30 conductors exclusive of conductors used for signalling circuits or control circuits unless the permission of an inspector designated by the Commission for the purpose of this subregulation is obtained for the use of a greater number.

74. Regulation 246 of the principal Regulations is revoked and the following substituted therefor:

246. Rigid conduit, flexible conduit, surface raceways, armoured-cable, electrical metallic tubing, or where necessary cord assemblies approved for hard usage shall be used in extensions from wire-ways and busways and shall be connected to the wire-way or busway in a manner appropriate to the material used.

75. Regulation 250 of the principal Regulations is revoked and the following substituted therefor:

- 250.(1) Plug-in connectors and other devices for tapping off branch-circuits from busways shall be of an approved type and shall contain over-current devices appropriate to the requirements of the branch-circuits.
- (2) Where plug-in devices are not readily accessible the over-current devices shall be enclosed or guarded while connected to the supply.
- (3) A motor-circuit switch need not be furnished on a machine tool where
 - (a) the machine tool is supplied by busway,
 - (b) a plug-in device having a horse-power rating is used in the busway, and
 - (c) the means of operating the plug-in device is readily accessible to the operator of the machine tool.

- (4) Where bare conductors run in busways free from contact with combustible material are reduced in size over-current devices are not required at the points of reduction provided that the smaller conductors
 - (a) are not more than 50 feet in length; and
 - (b) have a current rating equal to at least one-third of the rating or setting of the last preceding over-current device on the line.

76. Regulation 253 of the principal Regulations is revoked and the following substituted therefor:

253. No conductor larger than No. O B. & S. gauge shall be installed in a cellular metal-floor race-way.

77. Regulation 263 of the principal Regulations is revoked and the following substituted therefor:

263. Bare conductors shall not be used as main risers or feeders in buildings unless

- (a) the building is fire-proof construction;
- (b) the conductors are placed in a chase, channel or shaft so located or guarded that the conductors are inaccessible;
- (c) the premises do not constitute a hazardous location;
- (d) where floors are pierced suitable cut-offs against the vertical spread of fire are provided; and
- (e) the mechanical and electrical features of the installation and the conductor supports are, in the opinion of an inspector, appropriate to the operating and maintenance conditions likely to occur.

78. The principal Regulations are amended by adding the following regulations:

USE OF M.I. COPPER-CLAD CABLE AND ALUMINUM-SHEATHED CABLE

263a.(1) M.I. copper-clad cable may be used for

- (a) wiring of consumers' service;
- (b) feeders and branch circuits;
- (c) exposed or concealed wiring in damp or dry places or in locations exposed to weather;
- (d) wiring in underplaster extensions;
- (e) wiring embedded in plaster, masonry, concrete or fill;
- (f) wiring in underground runs;
- (g) wiring exposed to oil or any other substance not having a deteriorating effect on the sheath.

(2) M.I. copper-clad cable shall not be used in locations where it is exposed to a substance having a deteriorating effect on the sheath.

263b.(1) When a length of M.I. copper-clad cable has been installed the ends of the cable shall be immediately insulated and sealed.

- (2) The insulation on the ends of the cable required by subregulation 1 shall not be exposed to a temperature in excess of 85 degrees centigrade and the current-carrying capacity of the conductors shall not exceed
- (a) the maximum current prescribed in column 5 of Table 9 for a single conductor of a size shown in column 1;
 - (b) the maximum current prescribed in column 4 of Table 11 for not more than 3 conductors of a size shown in column 1;
 - (c) 80 per cent of the maximum current prescribed in clause *b* where the cable contains 4, 5, 6 or 7 conductors.
- 263c.(1) The radii of bends in M.I. copper-clad cable shall be at least six times the diameter of the sheath.
- (2) The cable shall be bent so as not to damage the outer sheath.
- 263d. Where M.I. copper-clad cable is connected to other methods of wiring, the junction shall be made
- (a) in an approved box; or
 - (b) at or in a fitting having a separately bushed hole for each conductor.
- 263e.(1) An approved box shall be installed at every point of outlet or junction of M.I. copper-clad cable.
- (2) The cable shall be securely fastened to the box and where metal boxes are used fastened also to ensure the continuity of grounding connections.
- (3) Notwithstanding subregulations 1 and 2 where M.I. copper-clad cable is used and the other conditions specified in regulations 212 and 213 for the use of fittings and insulating bushings exist the provisions of regulations 212 and 213 shall apply to M.I. copper-clad cable.
- (4) Where single-conductor M.I. copper-clad cables enter a metal box of magnetic material through separate openings and the current in any conductor exceeds 100 amperes, adequate methods shall be employed to prevent overheating of the box by reason of induction.
- 263f. Boxes used with M.I. copper-clad cable shall be of the types approved for the locations in which they are used.
- 263g. M.I. copper-clad cable which is not fished shall be secured at intervals of 6 feet by staples, straps, hangers or similar fittings so as to prevent damage to the sheath.
- 263h.(1) Where M.I. copper-clad cable is run within 7 feet of the floor, or in any location where the cable may be subject to mechanical injury it shall be protected by guard strips.
- (2) Where M.I. copper-clad cable is run through studs, joists or other wooden members it shall run at least $1\frac{1}{4}$ inches from the nearest edge of the wooden members or shall be adequately protected from damage to the sheath from nails or screws.
- (3) Where M.I. copper-clad cable is installed immediately behind baseboards it shall be protected against mechanical injury from nails or screws.
- 263i. Where provided with fittings approved for the purpose M.I. copper-clad cable may be used in air-conditioning ducts and plenum chambers.
- #### ALUMINUM-SHEATHED CABLE
- 263j. Where aluminum-sheathed cable is adequately protected against mechanical injury it may be used for
- (a) wiring of consumers' service, with the permission of an inspector;
 - (b) feeders and branch circuits;
 - (c) exposed wiring in damp or dry places or in locations exposed to weather;
 - (d) concealed wiring in walls, ceilings and floors in dry locations where the cable is so located or protected as not to be exposed to injury from nails or screws;
 - (e) wiring in underground runs when protected with adequate corrosion-resistant material;
 - (f) wiring in locations referred to in Part XV, Part XXX and in battery-rooms;
 - (g) wiring in theatres, with the permission of an inspector, excepting in rooms where film is handled or projected.
- 263k. Aluminum-sheathed cable unless protected with corrosion-resistant material shall not be used in locations where substances having a deteriorating effect on the metal sheath may come in direct contact with the cable.
- 263l.(1) The maximum current which a single copper conductor run in aluminum-sheathed cable may carry shall be the same as that prescribed for a single copper conductor in a free-air run by subregulations 1 and 2 of regulation 271 for a conductor of the same size and insulation at the same temperature.
- (2) The maximum current which a single aluminum conductor run in aluminum-sheathed cable may carry shall be 84 per cent of that prescribed in subregulation 1 for a single copper conductor of the same size and insulation at the same temperature.
- (3) The maximum current which from 2 to 9, inclusive, copper conductors run in aluminum-sheathed cable may carry shall be the same as that prescribed in regulation 272 for copper conductors run in a race-way or cable for the number, size and insulation of the conductors and the temperature at which they are used.
- (4) The maximum current which from 2 to 9, inclusive, aluminum conductors run in aluminum-sheathed cable may carry shall be 84 per cent of that prescribed in subregulation 3 for the number of copper conductors of the same size and insulation at the same temperature.
- 263m.(1) Where aluminum-sheathed cable run in dry locations is connected to boxes and fittings the connection shall be by connectors which will not damage the sheath.
- (2) Where aluminum-sheathed cable run in damp locations is connected to a box or fitting the fitting shall be of a type approved for use in damp locations.

263n. Where aluminum-sheathed cable is bent during installation, the radius of the curve of the inner edge of the bends shall be at least

- (a) 10 times the external diameter of the sheath of cables where the external diameter does not exceed $\frac{3}{4}$ inch;
- (b) 12 times the external diameter of the sheath of cables where the external diameter exceeds $\frac{3}{4}$ inch but does not exceed $1\frac{1}{2}$ inches;
- (c) 15 times the external diameter of the sheath where the external diameter exceeds $1\frac{1}{2}$ inches.

263o. Provided the identified conductor conforms to the requirements for identified conductors in armoured-cable and non-metallic sheathed cable prescribed in regulation 294, aluminum-sheathed cable may contain an identified conductor as a conductor for which identification is not required by these regulations.

79. Clause *b* of subregulation 1 of regulation 271 of the principal Regulations is revoked and the following substituted therefor:

- (b) that prescribed in column 3 of the table where the conductor is of the rubber-insulated, RH, type or the thermoplastic-insulated, TWH, type;

80.(1) Clause *b* of subregulation 1 of regulation 272 of the principal Regulations is amended by adding "or the thermoplastic-insulated, TWH, type" at the end thereof.

(2) Regulation 272 of the principal Regulations is amended by adding thereto the following subregulations:

- (5) A neutral conductor carrying only the unbalanced current from other conductors shall not be counted for the purpose of determining the current-carrying capacity under this regulation.
- (6) Where a 3-wire circuit consists of 2-phase conductors and the neutral conductor of a 3-phase 4-wire circuit, the neutral shall not be considered as a neutral conductor within the meaning of subregulation 5.

81. Regulation 274 of the principal Regulations, except Table 13, is revoked and the following substituted therefor:

274.(1) Where a run of conduit or tubing contains only rubber-insulated, RF-32, FF-32, R, RH or RW type, or thermoplastic-insulated, TF, TFF, T, TW or TWH type, conductors, not more than 9 in number, all of the same size and operating at not more than 600 volts, the conduit or tubing shall be of the size prescribed in columns 2 to 10, both inclusive, of Table 13 for the number of conductors set forth in those columns, respectively, and for the relevant size of conductor shown in column 1 of the table.

(2) Where a service run of conduit

- (a) does not exceed 50 feet in length, and
- (b) does not contain more than the equivalent of 2 quarter-bends from end to end,

2 insulated conductors of No. 4 B. & S. gauge and one bare conductor of that gauge may be installed in a 1-inch conduit and 2 insulated conductors of No. 6 B. & S. gauge and one bare conductor of No. 8 B. & S. gauge may be installed in a $\frac{3}{4}$ -inch conduit.

(3) Where conductors between motors and controllers and conductors for stage pockets and border circuits, sign-flashers, elevator-control conductors and signal circuits are of the rubber-insulated, RF-32, FF-32, R, RH or RW type, or thermoplastic-insulated, TF, TFF, T, TW or TWH type and are in conduit, a single conduit shall not contain a number of conductors exceeding that specified in regulation 275.

82. Regulation 275 of the principal Regulations, except Table 14, is revoked and the following substituted therefor:

275. A conduit shall not contain more conductors of the rubber-insulated, RF-32, FF-32, R, RH or RW type or the thermoplastic-insulated, TF, TFF, T, TW or TWH type of a size shown in column 1 of Table 14 than the number specified in columns 2 to 8, both inclusive, of the table, for the size of the conduit used.

83.(1) Subregulation 3 of regulation 277 of the principal Regulations is amended by inserting after "RF-32" in the first line "FF-32".

(2) Subregulation 4 of regulation 277 of the principal Regulations is revoked and the following substituted therefor:

(4) A conductor of the thermoplastic-insulated, TF, TFF, T, TW or TWH type of a size shown in column 1 of Table 18 and rated at not more than 600 volts shall be deemed to have the cross-sectional area shown in column 3 of the table.

84. Regulation 278 of the principal Regulations is revoked.

85. Regulation 280 of the principal Regulations, except Table 19, is revoked and the following substituted therefor:

280.(1) The maximum current which a flexible cord of the tinsel-cord CT, CTJ, AT, ATJ, POSJ-tinsel or POT-tinsel type containing 1, 2 or 3 copper conductors may carry at a room-temperature of 86 degrees Fahrenheit shall be $\frac{1}{2}$ ampere.

(2) The maximum current which a flexible cord of the rubber-insulated PO, C, PD, P, PWP, K or E type or the armoured CA, PA or PAWP type containing 1, 2 or 3 copper conductors of a size shown in column 1 of Table 19, may carry at a room-temperature of 86 degrees Fahrenheit shall be that prescribed in column 2 of the table for the size of the conductor used.

(3) The maximum current which a flexible cord of the rubber-insulated S, SO, SJ, SJO, SV, SVO or POSJ type or the thermoplastic-insulated ST, SJT, SVT, POT or SPT-3 type containing 1, 2 or 3 copper conductors of a size shown in column 1 of Table 19, may carry at a room-temperature of 86 degrees Fahrenheit shall be that prescribed in column 3 of the table for the size of conductor used.

(4) Notwithstanding subregulation 3 the maximum current which a flexible cord of the rubber-insulated S, SO, SJ or SJO type or the thermoplastic-insulated ST or SJT type, containing an assembly of 2 conductors and 1 grounding conductor, may carry at a room-temperature of 86 degrees Fahrenheit shall be

- (a) 10 amperes where the conductors are of No. 18 B. & S. gauge;
 - (b) 13 amperes where the conductors are of No. 16 B. & S. gauge;
 - (c) 18 amperes where the conductors are of No. 14 B. & S. gauge.
- (5) The maximum current which a flexible cord of the rubber-and-asbestos-insulated AFS, AFSJ, HC, HPD, HSJ, HPN, AFSD, or AFSJO type containing 1, 2 or 3 copper conductors of a size shown in column 1 of Table 19, may carry at a room-temperature of 86 degrees Fahrenheit shall be that prescribed in column 4 of the table for the size of conductor used.
- (6) The maximum current which a flexible cord of the cotton-covered heat-resisting CFC, CFPO, or CFPD type, the asbestos-covered and heat-resisting, AFC, AFPO, or AFPD type or the cotton-and-thermoplastic-covered heat-resisting CTFC, CTFPO, or CTFPD type, containing 1, 2 or 3 copper conductors of a size shown in column 1 of Table 19, may carry at a room-temperature of 86 degrees Fahrenheit shall be that prescribed in column 5 of the table for the size of conductor used.
- (7) The maximum current which a flexible cord of the Christmas-tree X, CX, CXW, TX or CXWT type containing 1, 2 or 3 copper conductors of a size shown in column 1 of Table 19 may carry at a room-temperature of 86 degrees Fahrenheit shall be that prescribed in column 6 of the table for the size of conductor used.
- (8) Where a flexible cord of a type referred to in subregulations 1 to 7, both inclusive, contains 4, 5 or 6 conductors of a size shown in column 1 of Table 19, the maximum current which it may carry shall be 80 per cent of that prescribed for a cord of the same type containing 1, 2 or 3 conductors of the same size.
- (9) Every flexible cord of a type or size not referred to in subregulations 1 to 7, both inclusive, or in Table 19 shall have a current-carrying capacity not less than that of No. 18 B. & S. gauge copper wire.

86. Regulations 283 and 284 of the principal Regulations are revoked and the following substituted therefor:

283.(1) Flexible cord may be used only for

- (a) the uses specified in column 10 of Table 20;
- (b) the wiring of cranes and hoists;
- (c) connections of stationary equipment to facilitate its re-location with the permission of an inspector; and
- (d) the prevention of the transmission of noise and vibration.

- (2) Flexible cord shall not be used for the suspension of a device weighing more than 5 pounds.

284. Where a flexible cord is used to connect appliances or other devices to a source of supply no live parts at either end shall be exposed when the cord is plugged into the source of supply.

87. Subregulation 1 of regulation 286 of the principal Regulations is revoked and the following substituted therefor:

- (1) Flexible cords of the types indicated may be used on the portable appliances designated below:

- (a) Parallel cord of the PO-64 (Rayon) type for table, bedstead and pin-up lamps and clocks of the mantel type;
- (b) All-thermoplastic parallel cord of the POT-64 and POT-32 type of No. 20 B. & S. gauge and all-rubber parallel cord of the POSJ-64 type of No. 20 B. & S. gauge for clocks of the mantel type, wall clocks, indoor Christmas-tree lighting and similar decorative appliances when the cord is permanently attached to the appliance by the manufacturer;
- (c) All-thermoplastic parallel cord of the POT-64 type for desk fans of the 8 to 10 inch size;
- (d) All-rubber parallel cord of the POSJ-64 type for commercial intercommunication systems weighing less than 15 pounds, commercial testing devices weighing less than 15 pounds, domestic phonographs of the table type, domestic radios and television receivers of the table or mantel type, and domestic recorders weighing less than 15 pounds.

88. Regulation 288 of the principal Regulations is revoked and the following substituted therefor:

- 288.(1) Asbestos-covered tinsel cord AT type, cotton-covered tinsel cord CT type, rubber-jacketed tinsel cord, ATJ, CTJ and POSJ-tinsel types, and thermoplastic-jacketed tinsel cord POT-tinsel type shall be of No. 27 B. & S. gauge.
- (2) Christmas-tree cords of
- (a) the X and TX types shall be of No. 20 B. & S. gauge;
 - (b) the CXWT 4/64 type shall be of No. 14 or No. 12 B. & S. gauge.
- (3) Parallel cord PO-64 type, all-rubber parallel cord POSJ-64 type, all-thermoplastic parallel cord POT-64, type, reinforced cord P-64 type, moisture-proofed reinforced cord PWP-64 type, Christmas-tree cord CX and CXW types and vacuum-cleaner cord, SV, SVO and SVT types shall be of No. 18 B. & S. gauge.
- (4) Parallel cord PO-32 type, all-rubber parallel cord POSJ-32 type, all-thermoplastic parallel cord POT-32 type, reinforced cord P-32 type, moisture-proofed reinforced cord PWP-32 type, junior hard-service cords SJ, SJO and SJT types, rubber-jacketed heat-resisting cord AFSJ type, polychloroprene-jacketed heat-resisting cord AFSJO type, all-neoprene heater cord HPN type and Christmas-tree cord of the CXWT 3/64 type, shall be of No. 18 or No. 16 B. & S. gauge.
- (5) Notwithstanding subregulations 3 and 4 all-thermoplastic parallel cord of the POT-64 and POT-32 types and all-rubber parallel cord of the POSJ-64 type used as indicated by clause b of subregulation 1 of regulation 286 may be No. 20 B. & S. gauge.
- (6) Asbestos-covered heat-resisting cord AFC, AFPO and AFPD types, cotton-covered heat-resisting cord CFC, CTFC, CFPO, CTFPO, CFPD and CTFPD types, rubber-jacketed heat-resisting cord AFS type and polychloroprene-jacketed heat-resisting cord, AFSO type shall be not smaller than No. 18 and not larger than No. 14 B. & S. gauge.

- (7) Heater cord HC and HPI types, rubber-jacketed heater cord HSJ type, and all thermoplastic parallel cord SPT-3 type, shall be not smaller than No. 18 and not larger than No. 12 B. & S. gauge.
- (8) Hard-service cord S, SO and ST types shall be not smaller than No. 18 and not larger than No. 10 B. & S. gauge.
- (9) Lamp-cord C type, armoured-cord, CA type, twisted portable cord PD type, braided heavy-duty cord K type, elevator cable E type, armoured reinforced cord PA type, and armoured moisture-proofed reinforced cord PAWP type, shall be of No. 18 B. & S. gauge or larger.
- (10) Reinforced cord P-3/64 type, parallel cord PO-3/64 type and moisture-proofed reinforced cord PWP-3/64 type shall be of No. 14 B. & S. gauge or larger.

89. The principal Regulations are amended by adding thereto the following regulation:

289a.(1) The maximum current which a fixture wire of the rubber-insulated XF or the thermoplastic-insulated TXF type may carry at a room-temperature of 86 degrees Fahrenheit shall be 2 amperes.

(2) The maximum current which a fixture wire of the rubber-insulated RF/64 or FF/64 type may carry at a room-temperature of 86 degrees Fahrenheit shall be 5 amperes.

(3) The maximum current which a fixture wire of the rubber-insulated RF/32 or FF/32 type may carry at a room-temperature of 86 degrees Fahrenheit shall be

(a) 5 amperes where the conductor is of No. 18 B. & S. gauge, or

(b) 7 amperes where the conductor is of No. 16 B. & S. gauge.

(4) The maximum current which a fixture wire of the thermoplastic-insulated TF or TFF type may carry at a room-temperature of 86 degrees Fahrenheit shall be

(a) 6 amperes where the conductor is of No. 18 B. & S. gauge, or

(b) 8 amperes where the conductor is of No. 16 B. & S. gauge.

(5) The maximum current which a fixture wire of the cotton-covered CF, type, the cotton-and-thermoplastic-insulated CTF, type or the asbestos-covered AF type may carry at a room-temperature of 86 degrees Fahrenheit shall be

(a) 6 amperes where the conductor is of No. 18 B. & S. gauge,

(b) 8 amperes where the conductor is of No. 16 B. & S. gauge, or

(c) 17 amperes where the conductor is of No. 14 B. & S. gauge.

90. Regulation 290 of the principal Regulations is amended by adding thereto the following subregulations:

(5) Subject to regulations 58, 1135, and 1181 all neutral conductors shall be insulated.

(6) Where the neutral conductor is bare it shall be not smaller than No. 10 B. & S. gauge when a copper conductor is used, and No. 8 B. & S. gauge when an aluminum conductor is used.

(7) Subject to subregulation 6 bare neutral conductors shall

(a) be at least 2 sizes smaller than the live conductors when live conductors of the same material as the neutral conductor are used,

(b) be not smaller than the size of the live conductors when the live conductors are copper and the neutral conductor is aluminum,

(c) be at least 4 sizes smaller than the live conductors when aluminum live conductors are used and the neutral conductor is copper,

(d) be at least 62.8 per cent of the area of the end section of the live conductors when the live conductors are the same material as the neutral conductor but are larger than the range of the B. & S. gauge sizes, and

(e) be at least 39.5 per cent of the area of the end section of the live conductors when aluminum live conductors larger than the range of the B. & S. gauge sizes are used and the neutral conductor is copper.

91. Subregulation 1 of regulation 292 of the principal Regulations is amended by striking out "No. 4 B. & S. gauge" in the second line and inserting in lieu thereof "No. 2 B. & S. gauge".

92. Regulation 293 of the principal Regulations is revoked and the following substituted therefor:

293. Where the conductors are

(a) larger than No. 2 B. & S. gauge,

(b) have insulation other than rubber, or

(c) are run in M.I. copper-clad cable

the identification of the conductors shall be continuous or each continuous length of conductor shall, at the time of installation, be suitably labelled or otherwise clearly and permanently marked at each end so that it can be identified readily.

93. Regulation 298 of the principal Regulations, except Table 22, is revoked and the following substituted therefor:

298.(1) The conductors used as feeders for circuits supplying electric ranges and other non-portable domestic cooking appliances shall be deemed to have the connected load indicated as follows:

(a) for ranges having a rating of 12 kilowatts or less, the connected load is the maximum demand in kilowatts shown in Table 22;

(b) for ranges having a rating of more than 12 kilowatts but not more than 21 kilowatts, the connected load is that indicated in clause a plus 5 per cent thereof for each kilowatt or part of a kilowatt by which the rating of each range exceeds 12 kilowatts;

(c) for ranges having a rating of more than 21 kilowatts, the maximum nameplate rating; and

(d) for two or more ranges having ratings of not more than 21 kilowatts each and which are not all of the same rating the connected load is the maximum demand in kilowatts shown in Table 22 for the total number of ranges plus 5 per cent thereof for each kilowatt or part of a kilowatt by which the average rating of the ranges, computed by averaging the aggregate of the ratings of the individual ranges and using 12 kilowatts for any rating less than 12 kilowatts, exceeds 12 kilowatts.

(2) The conductors in a range branch-circuit shall be deemed to have a connected load of at least 8 kilowatts.

(3) The size of conductors used as feeders for circuits supplying commercial ranges shall be based upon the connected load.

(4) For the purpose of computing conductor sizes for this regulation in cases where the voltage is unknown a voltage of 115/230 volts shall be assumed.

94. Regulation 299 of the principal Regulations is amended by striking out "supply" in the second line and inserting in lieu thereof "consumer's".

95. Regulation 307 of the principal Regulations is revoked and the following substituted therefor:

307. In any circuit installation or condition not specifically covered by regulations 296 to 306, both inclusive, a demand factor of 100 per cent shall be employed.

96. Subregulation 2 of regulation 308 of the principal Regulations is revoked and the following substituted therefor:

(2) Larger demand factors and wattage requirements may be used.

97. Regulation 311 of the principal Regulations is revoked and the following substituted therefor:

311. Nothing contained in regulations 296 to 310, both inclusive, shall be deemed to authorize the use of service conductors or feeders smaller than No. 10 B. & S. gauge copper or No. 8 B. & S. gauge aluminum.

98. Regulation 317 of the principal Regulations is revoked and the following substituted therefor:

317.(1) All electrical equipment and ungrounded conductors shall be furnished with

(a) approved devices which open automatically the circuit supplying the equipment or ungrounded conductors when the current in the circuit reaches a value which produces a dangerous temperature on the equipment or ungrounded conductors,

(b) approved manually-operated devices which disconnect safely

(i) all ungrounded conductors of the circuit simultaneously at the point of supply, and

(ii) over-current devices, except where a 2-wire grounded neutral branch-circuit supplies only fixed lighting loads which are connected to the neutral, and

(c) an approved device capable of opening the electric circuit when in the opinion of an inspector it is necessary to provide low-voltage release or low-voltage protection.

(2) Where an over-current device is in that part of a circuit which is supplied through an unpolarized attachment plug it may be connected in the neutral conductor.

(3) The devices shall not be connected in any grounded conductor unless they disconnect all ungrounded conductors before or at the same time as they disconnect the grounded conductor.

99. Regulation 327 of the principal Regulations is revoked and the following substituted therefor:

327.(1) Standard cartridge fuses rated at more than 600 amperes shall not be used.

(2) High rupturing capacity fuses may be rated at more than 600 amperes.

(3) Standard cartridge fuses and high rupturing capacity fuses shall not be used in circuits operating at more than 750 volts.

(4) High rupturing capacity fuses of the type indicated may be used as follows:

(a) high rupturing capacity Form I fuses in place of standard fuses,

(b) high rupturing capacity Form II fuses for over-current protection where circuit overload protection is provided by standard fuses, circuit-breakers or overload devices,

(c) high rupturing capacity Form II fuses in place of standard fuses where these regulations permit the use of fuses rated at more than the ampere rating of the load provided that the ratings of the high rupturing capacity Form II fuses do not exceed 85 per cent of the maximum rating permitted for standard fuses.

100. Regulation 328 of the principal Regulations is revoked and the following substituted therefor:

328. Standard cartridge or plug fuses shall not be connected in parallel.

101. Subregulation 2 of regulation 332 of the principal Regulations is revoked and the following substituted therefor:

(2) Switches of special design approved for the purpose may be used to interrupt currents greater than 600 amperes at a voltage of 750 volts or less.

102. Subregulation 2 of regulation 337 of the principal Regulations is amended by striking out "and" at the end of clause a, and by adding the following clauses:

(c) switches which are immersed in a liquid where a suitable caution notice is attached to the outside of the enclosure; and

- (d) switches which are so designed that all live parts are inaccessible when the switch is in the open position.

103. Sub-clause ii of clause *c* of subregulation 2 of regulation 342 of the principal Regulations is amended by adding "or Table 11" at the end thereof.

104.(1) Subregulation 1 of regulation 344 of the principal Regulations is amended by striking out "as shown in Table 9" in the third and fourth lines.

(2) Clause *c* of subregulation 2 of regulation 344 of the principal Regulations is revoked and the following substituted therefor:

- (c) fixture wiring, flexible cord of No. 16, 18 or 20 B. & S. gauge or tinsel cord.

(3) Subregulation 3 of regulation 344 of the principal Regulations is revoked and the following substituted therefor:

- (3) Fixture wire, flexible cord of No. 16, 18 or 20 B. & S. gauge and tinsel cord shall be deemed to be protected by 15-ampere over-current devices.

(4) Regulation 344 of the principal Regulations is amended by adding thereto the following subregulation:

- (4) Fixture wire referred to in subregulation 2 of regulation 379 shall be deemed to be protected by 20-ampere over-current devices.

105. Regulation 352 of the principal Regulations is revoked and the following substituted therefor:

352.(1) Snap switches shall have the following ratings:

- (a) subject to clause *b* an ampere rating not less than the ampere rating of the load for non-inductive loads;

- (b) a "T" rating for tungsten filament lamp loads and for combination tungsten filament lamp loads and non-inductive loads except where

- (i) the switches are used in branch-circuit wiring systems in private homes, in rooms in multiple-occupancy dwellings used as living quarters, in private hospital rooms, hotel rooms, in attics or basements or in similar locations not used as public rooms or places of assembly, and

- (ii) the switch controls permanently connected fixtures or lighting outlets in one room, one continuous hallway, an attic or basement, and

- (iii) the switch is rated at not less than 10 amperes for a potential of 125 volts, 5 amperes for a potential of 250 volts or in the case of a 4-way type switch 5 amperes for a potential of 125 volts or 2 amperes for a potential of 250 volts;

- (c) an ampere rating at least twice the ampere rating of the load for inductive loads unless the switches are approved as part of an assembly or for the purpose for which they are used.

- (2) Canopy switches controlling tungsten filament lamp loads shall have a "T" rating or an ampere rating at least 3 times the ampere rating of the load.

106. Subregulation 1 of regulation 358 of the principal Regulations is revoked and the following substituted therefor:

- (1) Subject to regulations 347, 361 and 362, every motor shall be protected by over-current devices which do not protect any other motor.

107. Regulation 359 of the principal Regulations is revoked and the following substituted therefor:

359. Where fuses are used to provide over-current protection for a motor branch-circuit, the fuse-holders shall be of a size sufficient to accommodate fuses having the values required by regulation 358, but when fuses having time delay characteristics appropriate for the starting characteristics of the motor are used the fuse-holders may be of a smaller size.

108. Regulation 361 of the principal Regulations is revoked and the following substituted therefor:

361. Two or more motors may be grouped under the protection of a single set of over-current devices where the over-current devices are not rated or set at more than 15 amperes, or the motors are used on or with a machine tool or a wood-working machine and the control equipment is so arranged that all contacts which open motor primary circuits are enclosed

- (a) in an enclosure forming part of the machine base and having no openings to the floor or to the foundation on which the machine rests, or

- (b) in a separately mounted enclosure having hinged doors with substantial catches and a wall-thickness of at least

- (i) 14 U.S. sheet-metal gauge if constructed of sheet iron or steel,

- (ii) 3/32 inch if constructed of malleable cast-iron, or

- (iii) 3/8 inch if constructed of other cast metal.

109. Subregulation 1 of regulation 362 of the principal Regulations is amended by striking out "regulation 346" in the fifth line and inserting in lieu thereof "regulation 347".

110. Regulation 379 of the principal Regulations is revoked and the following substituted therefor:

- 379.(1) Receptacles, to which fixture wire or flexible cord, smaller than No. 14 B. & S. gauge, is connected shall not be connected to a circuit protected by over-current devices rated or set at more than 15 amperes for potentials up to 125 volts or 10 amperes for potentials between 125 volts and 250 volts.

- (2) Medium-base lamp-holders and fluorescent-type lighting fixtures in which the fixture-wiring and the ballast are enclosed in a metal race-way shall not be connected to a circuit protected by over-current devices rated or set at more than 20 amperes for potentials up to 125 volts or 10 amperes for potentials between 125 volts and 250 volts.

111. Subregulation 1 of regulation 401 of the principal Regulations is amended by striking out "regulation 343" in the last line and inserting in lieu thereof "regulation 342".

112. Subregulation 6 of regulation 408 of the principal Regulations is revoked and the following substituted therefor:

- (6) Where the conductors of a Class 2 remote-control or signal circuit are installed in a hoist-way, the conductors shall be installed in rigid conduit, electrical metallic tubing or M.I. copper-clad cable.

113. Regulation 425 of the principal Regulations is amended by adding thereto the following subregulation:

- (3) Single-conductor metal-sheathed cables run in ducts of insulating material shall
 - (a) each be installed in a separate duct; and
 - (b) have their sheaths isolated from ground except at the supply end where the sheaths shall be bonded together and grounded.

114. Subregulation 2 of regulation 428 of the principal Regulations is amended by adding "or" at the end of clause *a*, by revoking clauses *b* and *c* and by adding thereto the following clause:

- (b) metal frames of electrically-heated devices where an inspector is satisfied that the frames are permanently and effectively insulated from ground.

115.(1) Subregulation 2 of regulation 431 of the principal Regulations is revoked and the following substituted therefor:

- (2) Where it is impractical to ground the metal frames of electrically-heated appliances, the grounding may be dispensed with where an inspector is satisfied that the frames are permanently and effectively insulated from ground.

(2) Subregulation 3 of regulation 431 of the principal Regulations is revoked.

116. Regulation 434 of the principal Regulations is revoked and the following substituted therefor:

- 434. The grounding conductor may be connected to the grounded circuit-conductor in the service box on the supply side of the service-disconnecting means.

117. Clause *c* of subregulation 2 of regulation 439 of the principal Regulations is revoked and the following substituted therefor:

- (c) by any other means of grounding satisfactory to an inspector.

118. Subregulation 1 of regulation 441 of the principal Regulations is amended by adding "or" at the end of clause *a* and by striking out clause *c*.

119. Regulation 442 of the principal Regulations is amended by striking out "without special permission" in the fourth line and inserting in lieu thereof "without the permission of an inspector".

120. Subregulation 1 of regulation 452 of the principal Regulations is revoked and the following substituted therefor:

- (1) Artificial ground-electrodes shall consist of metal pipes, conduit or rods driven into earth, metal plates buried in the earth or other pipes approved for the purpose.

121. Regulation 457 of the principal Regulations is amended by adding thereto the following subregulations:

- (6) Any conductor of M.I. copper-clad cable may be used as a grounding conductor provided it is permanently marked at the time of installation so that it can be readily distinguished from the other conductors.

- (7) The sheaths of M.I. copper-clad cable and aluminum-sheathed cable may be used as grounding conductors for exposed non-current-carrying metal parts.

122. Regulation 458 of the principal Regulations is amended by adding thereto the following subregulation:

- (4a) Where a grounding-conductor is smaller than No. 6 B. & S. gauge it shall be installed and protected in the same manner as the circuit conductors.

123. Regulation 480 of the principal Regulations is revoked and the following substituted therefor:

- 480. Where, in the opinion of an inspector designated by the Commission for the purpose of this regulation, the duty cycle is such as to require electric welders to be treated on an individual basis the inspector may require the welders to be so treated.

124. Regulation 481 of the principal Regulations is revoked and the following substituted therefor:

- 481.(1) The supply conductors for an individual transformer arc-welder shall have a current-carrying capacity of not less than

- (a) 100 per cent of the rated primary current of an automatically operated welder; or
- (b) 80 per cent of the rated primary current of a manually operated welder.

- (2) The supply conductors of a group of transformer arc-welders shall have a current-carrying capacity equal to the sum of

- (a) 100 per cent of the rated primary current of the two largest welders in the group;
- (b) 85 per cent of the rated primary current of the third largest welder in the group;
- (c) 70 per cent of the rated primary current of the fourth largest welder in the group; and
- (d) 60 per cent of the aggregate rated primary current of all remaining welders in the group.

- (3) Where a high-operating duty cycle for individual arc-welders is not possible the current-carrying capacity of the supply conductors of a group of transformer arc-welders may, with the permission of an inspector, be calculated on lesser percentages than those specified in subregulation 2.

125. Clauses *b* and *c* of regulation 486 of the principal Regulations are revoked and the following substituted therefor:

- (b) "actual primary current" means the current drawn from the supply circuit during each welder operation at the particular heat tap and control setting; and
- (c) "duty cycle" means a percentage which expresses the relation between the time during which a welder is loaded and the total time required for one complete operation.

126. Regulation 494 of the principal Regulations is amended by adding thereto the following subregulation:

- (2) An oil burner installation shall be provided with a separate circuit controlled by a motor-circuit switch or a circuit-breaker located
 - (a) at the door-way of the furnace-room, or
 - (b) where there is no furnace-room, in an accessible location which would not expose an operator to injury in the event of a furnace failure.

127. Subregulation 2 of regulation 502 of the principal Regulations is revoked and the following substituted therefor:

- (2) Where the transformers are immersed in a liquid that will burn in air they shall be installed
 - (a) in vaults;
 - (b) in steel cubicles; or
 - (c) in a sub-station building used for no other purpose.

128.(1) Subregulation 1 of regulation 503 of the principal Regulations is amended by striking out "air-cooled" in the third line and inserting in lieu thereof "dry-core".

(2) Subregulation 3 of regulation 503 of the principal Regulations is amended by striking out "air-cooled" in the first line and inserting in lieu thereof "dry-core".

129. Regulation 505 of the principal Regulations is amended by adding thereto the following subregulations:

- (3) Where the transformers, switches or circuit-breakers are installed on the ground or on poles or other elevated structures, in proximity to the exterior surface of buildings constructed of combustible material or buildings of non-combustible material having unprotected openings or exterior trim consisting of combustible material, the buildings shall be protected in accordance with the requirements set out in column 3 of Table 50 applicable to the rating and the distance from the building of the transformers, switches and circuit-breakers, set out in columns 1 and 2 respectively of Table 50.
- (4) Where transformers, switches and circuit-breakers are installed on the ground they shall be placed on a concrete mat suitably curbed and drained or in a curbed area filled with coarse crushed stone.

TABLE 50
[regulation 505(3)]

	Column 1	Column 2	Column 3
	Rating	Distance from Building	Requirements
1.	0-75 KVA	Not exceeding 10 feet Exceeding 10 feet	Protection of all combustible surfaces with non-combustible material; windows shall have wired glass panes and metal sashes, and shall be non-opening. None
2.	75 KVA-333 KVA	Not exceeding 10 feet Exceeding 10 feet but not exceeding 20 feet Exceeding 20 feet	All openings shall be bricked up; all combustible material shall be replaced by non-combustible material. Protection of all combustible surfaces with non-cumbustible material; windows shall have wired glass panes and metal sashes and shall be non-opening. None
3.	Over 333 KVA	Not exceeding 20 feet Exceeding 20 feet but not exceeding 30 feet Exceeding 30 feet	All openings shall be bricked up; all combustible material shall be replaced by non-combustible material. All combustible material shall be replaced by non-combustible material; windows shall have wired glass panes and metal sashes, and shall be non-opening. None

130.(1) Subregulation 1 of regulation 507 of the principal Regulations is amended by striking out "air-cooled" in the first line and inserting in lieu thereof "dry-core".

(2) Clause *a* of subregulation 1 of regulation 507 of the principal Regulations is revoked.

131. Subregulation 1 of regulation 512 of the principal Regulations is amended

(a) by striking out "air-cooled" in the ninth and tenth lines and inserting in lieu thereof "dry-core", and

(b) by striking out "by special permission" in the last line.

132.(1) Subregulation 3 of regulation 514 of the principal Regulations is amended by striking out "ventilating outlets" in the fifth line and inserting in lieu thereof "ventilating openings".

(2) Subregulation 4 of regulation 514 of the principal Regulations is amended by striking out "ventilating outlets" in the third line and inserting in lieu thereof "ventilating openings".

133.(1) Clause *b* of regulation 526 of the principal Regulations is revoked and the following substituted therefor:

(b) the conductors supplying the electrical condenser shall have a minimum current-carrying capacity of 135 per cent of the rated current of the condenser but such current-carrying capacity shall not be less than 33 1/3 per cent of that of the motor-circuit conductors.

(2) Subregulation 2 of regulation 527 of the principal Regulations is amended by striking out "special permission" in the last line and inserting in lieu thereof "the permission of an inspector".

134. Regulation 531 of the principal Regulations is amended by adding thereto the following subregulation:

(4) Where access to the switchboard equipment can be had from the front only and maintenance replacements can be made from the front the switchboard may be installed against the wall provided in the opinion of an inspector there is adequate clearance in front of the switchboard to permit safe operation.

135.(1) Subregulation 1 of regulation 541 of the principal Regulations is revoked and the following substituted therefor:

(1) Electrical wiring in a storage-battery room shall be run

- (a) as bare conductors;
- (b) as open wiring;
- (c) in rigid conduit;
- (d) in electrical metallic tubing;
- (e) as M.I. copper-clad cable; or
- (f) as aluminum-sheathed cable.

(2) Regulation 541 of the principal Regulations is amended by adding thereto the following subregulation:

(5) Where M.I. copper-clad cable or aluminum-sheathed cable is used where it may be in direct contact with acid or acid spray it shall be adequately protected from corrosion.

136. Regulation 543 of the principal Regulations is revoked and the following substituted therefor:

543. Lightning arresters shall be installed in every distributing sub-station.

137. Subregulation 2 of regulation 553 of the principal Regulations is revoked and the following substituted therefor:

(2) Incandescent lamps may, with the permission of an inspector, be used as resistors in series with other devices.

138. Subregulation 2 of regulation 556 of the principal Regulations is revoked and the following substituted therefor:

(2) Where every appliance is provided with an integral temperature-limiting device, the pilot-light may, with the permission of an inspector, be dispensed with.

139. The principal Regulations are amended by adding the following regulation:

575a.(1) Except as provided in subregulation 2 the voltage of circuits used to supply the installations shall not exceed 150 volts to ground.

(2) Lighting branch-circuits in industrial and commercial establishments where a trained maintenance staff is available may have a voltage in excess of 150 volts but not exceeding 600 volts to ground when the lighting branch-circuits supply fixtures equipped with

(a) mogul-base screw-shell lamp-holders only; or

(b) lamp-holders of other types approved for specific purposes which are located at least 8 feet above floor level and do not have a switch control as an integral part of the fixture.

(3) The voltage between conductors supplying incandescent lamps in residential premises shall not exceed 150 volts.

140. Subregulation 2 of regulation 586 of the principal Regulations is revoked and the following substituted therefor:

(2) Every lighting fixture shall be so constructed and installed that conductors in the fixtures and in the outlet box are not subjected to temperatures greater than those for which the conductors are approved.

141. Regulation 587 of the principal Regulations is revoked and the following substituted therefor:

587.(1) Every lighting fixture, lamp-holder and rosette shall be securely supported.

(2) Every lighting fixture shall be supported from a fixed outlet in accordance with regulation 211.

(3) Where a lighting fixture weighs more than 6 pounds or exceeds 16 inches in any dimension, it shall not be supported by the screw-shell of the lamp-holder.

(4) Where a lighting fixture weighs more than 25 pounds it shall not be supported by an outlet box mounted on a bar hanger.

(5) Where a lighting fixture weighs more than 50 pounds, it shall be supported independently of the outlet box.

142. Regulation 593 of the principal Regulations is revoked and the following substituted therefor:

593.(1) No lighting fixture shall be used as a race-way for circuit conductors unless the fixture is approved for that use, but the conductors of a 2-wire, 3-wire or 4-wire branch-circuit supplying a fixture may be carried through an installation of lighting fixtures if, in the case of 3-wire or 4-wire branch-circuits, they are controlled by a switch or circuit-breaker which can be manually operated to simultaneously interrupt all ungrounded conductors.

(2) Where the lighting fixtures referred to in subregulation 1 are fluorescent, the ballasts and transformers in the installation shall be deemed to be a source of heat with temperatures exceeding 60 degrees centigrade and 140 degrees Fahrenheit and the conductors supplying the fixtures shall be of the slow-burning, SB, type and shall not be exposed to temperatures exceeding 90 degrees centigrade or 194 degrees Fahrenheit.

(3) Where a lighting fixture weighs more than 10 pounds it shall be installed so that the connections between the fixture conductors and the circuit conductors are accessible for inspection without removing the fixture supports.

143. Subregulations 1 and 2 of regulation 595 of the principal Regulations are revoked and the following substituted therefor:

(1) Where a rigid lighting fixture or lamp-holder is located at a height of less than 7 feet above the floor and is readily accessible the fixture or lamp-holder shall be protected from mechanical injury by a guard.

(2) A short, flexible drop-light or lighting fixture may be used without the guard required by subregulation 1.

144.(1) Subregulation 4 of regulation 603 of the principal Regulations is revoked and the following substituted therefor:

(4) The connection of the asbestos-covered or equivalent conductors with the branch-circuit conductors shall be made in the junction-box.

(2) Subregulation 6 of regulation 603 of the principal Regulations is revoked.

145. Subregulation 1 of regulation 610 of the principal Regulations is revoked and the following substituted therefor:

(1) Electric-lighting equipment shall be considered as grounded when it is mechanically and electrically connected in a permanent and effective manner to

(a) metal race-way,

(b) the armour of armoured-cable,

(c) the sheath of M.I. copper-clad cable,

(d) the sheath of aluminum-sheathed cable,

(e) the grounding-conductor in non-metallic sheathed cable, or

(f) a separate grounding-conductor not smaller than No. 14 B. & S. gauge,

but the race-way, armour, grounding-conductor or sheaths shall be grounded in a manner specified in Part VII.

146. Regulation 611 of the principal Regulations is amended by inserting after "lamps" in the third line "or fixtures".

147. Regulation 613 of the principal Regulations is revoked and the following substituted therefor:

613. The identified grounded supply-conductor shall be connected to permanently connected lamp-holders at the screw-shell binding-post which shall also be identified.

148. Regulation 617 of the principal Regulations is revoked and the following substituted therefor:

617. Where a metal lamp-holder is attached to a flexible cord the inlet for the flexible cord shall be equipped

(a) with an insulating bushing, or

(b) with a metal grommet where the lamp-holder is provided with a side outlet.

149. Regulation 633 of the principal Regulations is revoked and the following substituted therefor:

633.(1) Where lighting branch-circuits supply ballasts, transformers or auto-transformers, the load of the branch-circuits shall be computed on the basis of the total amperes of the units and not on the watts of the lamps.

(2) Where gas-tube fixtures are wired with conductors smaller than No. 14 B. & S. gauge, the aggregate capacity of the fixtures connected to any 2 wires of a lighting branch-circuit protected by a 20-ampere over-current device shall not be more than 15 amperes.

150.(1) Subregulation 1 of regulation 640 of the principal Regulations is revoked and the following substituted therefor:

(1) The secondary conductors of an electric-discharge lighting system shall be gas-tube-sign cable approved for the purpose and for the voltage of the circuit and not more than 20 feet of which shall be run in metal race-way from

(a) a single transformer, or

(b) either side of a mid-point grounded transformer.

(2) Subregulation 2 of regulation 640 of the principal Regulations is amended by striking out "1038" in the second line and substituting in lieu thereof "1038a".

151. Regulation 643 of the principal Regulations is revoked and the following substituted therefor:

643.(1) Those parts of lamp installations in an electric-discharge lighting system which must be removed for lamp replacement shall be hinged or fastened by an approved method.

(2) Lamp terminals and lamp-holders shall be so designed that the lamp can be replaced with a minimum exposure of bare live parts but protection against space discharge shocks need not be provided where lamps are replaced by a trained maintenance staff.

152. Subregulation 1 of regulation 644 of the principal Regulations is amended by striking out "1/4 inch" in the fourth line and inserting in lieu thereof "1 inch".

153. Part XI of the principal Regulations is revoked and the following substituted therefor:

PART XI

ELECTRIC CRANES & HOISTS

645. This Part applies to electric cranes and hoists.

646. In this Part "contact-conductor" means a bare conductor from which the current for supplying cranes or hoists is collected by moving contacts or shoes.

CONTACT-CONDUCTORS

647. Where rigid contact-conductors are run along runways, mono-rail tracks or bridges and consist of hard copper, aluminum, steel or other suitable material in appropriate cross-sections they shall

- (a) be provided with insulating supports at intervals of at least 80 times the vertical dimension of the conductor but in any case not exceeding 15 feet;
- (b) have a maximum air-gap separation of at least 1 inch from adjacent conductors and collectors; and
- (c) have all sections mechanically joined to provide a continuous electrical connection.

648.(1) Flexible contact-conductors shall be secured at their ends by strain insulators.

- (2) Flexible contact-conductors shall not be smaller than
 - (a) No. 4 B. & S. gauge where the strain insulators are less than 60 feet apart, and
 - (b) No. 2 B. & S. gauge where the strain insulators are more than 60 feet apart.
- (3) Every flexible contact-conductor shall be so mounted on insulators that at its maximum displacement the conductor is not within 1½ inches to ground or to other live conductors.

649.(1) Where 2 or more main flexible contact-conductors are carried along runways they shall be separated from each other by

- (a) at least 6 inches where the conductors are run in the same horizontal plane,
- (b) at least 8 inches where the conductors are not run in the same horizontal plane.

(2) The separation required by clause *a* of subregulation 1 may be reduced to 3 inches where the conductors supply mono-rail hoists.

(3) Bridge contact-conductors shall be separated from one another by at least 2½ inches.

(4) Where the span of bridge contact-conductors exceeds 80 feet insulating saddles shall be placed at intervals not exceeding 50 feet.

650.(1) Where main flexible contact-conductors are carried along runways they shall be supported by insulating supports at intervals of not more than 20 feet.

(2) Where necessary the intervals between insulating supports may be increased to a maximum of 40 feet provided that the separation between the conductors required by regulation 649 is increased proportionately.

651.(1) Where mono-rail, tram-rail tracks or crane-runway tracks are used as a conductor of current for one phase of a 3-phase alternating-current system which furnishes power to the carrier, crane or trolley

- (a) the conductors supplying the other 2 phase of the power supply system shall be insulated;
- (b) the power for all phases shall be obtained from an insulating transformer;
- (c) the potential shall not exceed 300 volts;
- (d) the rail which serves as a conductor shall be grounded at the transformer only; and
- (e) all sections of the track shall be mechanically joined to provide a continuous electrical connection.

(2) Notwithstanding clause *d* of subregulation 1 fittings may be used to attach the rail to the building.

652. Where a crane or hoist is operated by more than one motor a common return conductor of proper current-carrying capacity may be used.

653.(1) Contact-conductors shall be

- (a) isolated by elevation; or
- (b) provided with suitable guards so that persons in contact with the ground or with conducting material connected to the ground cannot inadvertently touch the conductors.

(2) Contact conductors shall not be used as feeders for any equipment other than the crane or cranes which they serve.

CONDUCTORS OTHER THAN CONTACT-CONDUCTORS

654.(1) Subject to subregulation 2 conductors other than contact-conductors shall

- (a) be of any approved rubber-, or thermo-plastic-insulated type where run in any location;
- (b) be of V, A-1, or A-4 type where run in dry locations.

(2) The conductors shall be of the types specified for the following locations:

- (a) conductors which connect to a resistor, types A-7 or A-11;
- (b) conductors in locations exposed to severe external heat
 - (i) in dry places, types A-7 or A-11, but where the external heat does not exceed 90 degrees centigrade types SB or A-4 may be used;
 - (ii) in damp places types RW or A-2, provided that where RW type conductors are grouped they shall be taped with flame-retarding covering.

654a. Flexible conductors, other than contact-conductors, provided where practicable with cable-reels or take-up devices, may be used to connect motors to the power supply.

654b.(1) Subject to subregulations 2 and 3 conductors other than contact-conductors shall be enclosed in metal race-ways.

(2) Where it is not practicable to install a terminal box short lengths of exposed conductors may be run from conduit, or other outlet fittings to collectors, resistors, magnetic brakes, motors or other equipment provided that the conductors are protected from mechanical injury during the operation of the crane or hoist.

(3) Where a pendant push-button station is so supported as to protect the conductors from strain the station may be supplied from exposed multiple-conductor cables.

654c. Where a crane or hoist is operated by more than one motor a common return conductor of proper current-carrying capacity may be used.

CONTROL AND PROTECTION OF CIRCUITS

654d.(1) The main contact-conductors shall be controlled by a fused motor-circuit switch or a circuit-breaker.

(2) Where cranes or hoists are operated from cages or cabs a general-use switch may be used as a controlling device instead of the devices specified by subregulation 1.

(3) The controlling device shall be

- (a) arranged to lock in the open position;
- (b) located so that the crane or hoist and the contact-conductors are visible from the device; and
- (c) readily accessible and operable from the ground or floor.

654e.(1) Where cranes or hoists are operated from cages or cabs the conductors supplying the electrical equipment in the cage or cab from the contact-conductors shall be controlled by a fused motor-circuit switch or a circuit-breaker mounted

- (a) in the cage or cab; or
- (b) on the bridge in such a location as to be operable from the cage or cab when the trolley is at either end of the bridge.

(2) The controlling devices prescribed by subregulation 1 shall be rated or set at not less than

- (a) 50 per cent of the combined short-time ampere-rating of the motors; or
- (b) 75 per cent of the combined short-time ampere-ratings of those motors required for one single crane or hoist motion.

654f. A limit-switch shall be provided for the upper limit of travel of crane-hoists.

654g.(1) Subject to subregulation 2 where a crane or hoist is operated by more than one motor each motor shall be protected by an over-current device in accordance with Part V.

(2) Where 2 motors operate a single hoist, carriage, truck or bridge and are controlled as a unit by one controller the 2 motors and their leads may be protected by a single over-current device which shall be located in the cage or cab where there is one.

HAZARDOUS LOCATIONS AND GROUNDING

654h. Where a crane or hoist operates over combustible material the resistor shall be located in conformance with subregulation 2 of regulation 790.

654i. Motor frames, tracks, controller enclosures and the entire frame of every crane or hoist shall be grounded in conformance with Part VII.

154. Regulation 655 of the principal Regulations is revoked and the following substituted therefor:

655. This Part applies to electrically-operated elevators, including passenger elevators, freight elevators, escalators and dumb-waiters.

155. Subregulation 1 of regulation 661 of the principal Regulations is revoked and the following substituted therefor:

(1) Where the conductors of an elevator-wiring system, other than travelling cables or conductors used in Class 1 or Class 2 signal systems, are located in a hoistway, they shall be installed in rigid conduit, electrical metallic tubing, or where the cable sheath is not exposed to mechanical injury, in M.I. copper-clad cable or aluminum-sheathed cable, but flexible conduit or armoured-cable may be used between riser- and limit-switches, interlocks, push-buttons or similar devices.

156. Regulation 668 of the principal Regulations is amended by adding thereto the following subregulation:

(2) A separate lighting branch-circuit shall be installed for every passenger elevator-car.

157. Regulation 677 of the principal Regulations is amended by adding thereto the following subregulation:

(3) Every elevator shall be equipped with brakes which brake automatically to stop the car by the operation of a spring or the force of gravity when the operating device is in the "Stop" position and do not release until power has been supplied to the motor.

158. Regulation 679 of the principal Regulations is amended by adding thereto the following subregulations:

(2) Machine rooms shall be provided with artificial light the illumination of which shall be based on not less than $\frac{1}{2}$ of one watt for each square foot of floor area.

(3) The lighting switch installed for machine-room lighting shall be located within easy reach of the machine-room door.

(4) The elevator service switch and the lighting switch shall be of the enclosed type and shall where practicable be installed on the lock-jamb side of the machine-room door.

159. Regulation 680 of the principal Regulations is revoked and the following substituted therefor:

680.(1) There shall be a working space of at least 24 inches behind and 30 inches in front of the live parts of each elevator controller.

(2) Notwithstanding subregulation 1 auxiliary equipment may be placed immediately in front of or behind a controller provided the spacing required by subregulation 1 is maintained in front of or behind the auxiliary equipment respectively.

(3) Where controllers are enclosed in cabinets having swinging doors or removable sections the working space required by subregulation 1 may be measured from the controllers when the doors are opened or the sections are removed.

(4) The requirements of subregulation 1 do not apply to

- (a) controllers totally enclosed in cabinets and mounted on the wall;
- (b) controllers mounted on, over or against the elevator mechanism provided there is reasonable access to the controllers; or
- (c) enclosed escalator controllers provided the controllers can be readily removed for maintenance purposes.

(5) Where controllers are mounted on panels there shall be a clear passageway of at least 18 inches from front to rear on at least one side of the panel or group of panels.

160. The principal Regulations are amended by adding the following regulation:

PREVENTION OF EXCESSIVE OVER-SPEED

685a. Where a dry-plate, or other type of rectifier incapable of absorbing electrical energy, is used to transform alternating current to direct current for the operation of an elevator motor a device shall be installed capable of absorbing a sufficient amount of energy regenerated by the motor to prevent the elevator from attaining a speed greater than 125 per cent of its speed in the up direction carrying its authorized load.

161. Regulation 689 of the principal Regulations is amended by adding thereto the following subregulation:

(3) Where equipment is approved for use in atmospheres containing a particular kind of gas or vapour those locations shall be classified according to the kind of gas or vapour present.

162. Regulation 694 of the principal Regulations is revoked and the following substituted therefor:

694. Electrical equipment designed for use in a hazardous location shall be so marked as to indicate the class and the group, or the particular kind of gas or vapour, for which the equipment has been approved.

163. Regulation 697 of the principal Regulations is amended by inserting after "electrical-wiring system" in the sixth line "and the electrical equipment in the hazardous location".

164. Regulation 700 of the principal Regulations is revoked and the following substituted therefor:

700. Subject to regulation 708 dry-core transformers other than the explosion-proof type shall not be installed in a Class I Division 1 location.

165. Subregulation 2 of regulation 703 of the principal Regulations is amended by adding at the end thereof "but where they are approved for a particular gas or vapour general-purpose enclosures may be used".

166.(1) Subregulation 2 of regulation 704 of the principal Regulations is revoked and the following substituted therefor:

(2) Every explosion-proof threaded joint shall have at least 5 full threads engaged and running threads shall not be used for coupling lengths of conduit.

(2) Regulation 704 of the principal Regulations is amended by adding thereto the following subregulations:

(4) A wiring method which is not explosion-proof and which consists of electrical wiring and electrical equipment approved for use in an atmosphere containing the particular gas or vapour present and which is installed, maintained and operated in accordance with the conditions of approval may be used as an alternative to the wiring method required by subregulation 1.

(5) Where the wiring method referred to in subregulation 4 is used it shall be sealed in accordance with regulation 705 where it connects with the rigid conduit and explosion-proof equipment required by subregulation 1.

167. Regulation 707 of the principal Regulations is amended by inserting after "group" in the fifth line "or for the particular gas or vapour".

168. Regulation 708 of the principal Regulations is revoked and the following substituted therefor:

708. Every control transformer having a rating in excess of 1 kilowatt and every impedance coil and resistor used as or in conjunction with control equipment for motors, generators or electric appliances in a Class I Division 1 location and the switching mechanism, if any, used with it, shall be provided with an explosion-proof enclosure approved for the class and group of the location.

169. Subregulation 1 of regulation 715 of the principal Regulations is amended by inserting after "group" in the fifth line "or for the particular gas or vapour".

170. Subregulation 1 of regulation 718 of the principal Regulations is revoked and the following substituted therefor:

(1) Dry-core transformers shall not be installed in Class I Division 2 locations.

171. Subregulation 2 of regulation 719 of the principal Regulations is amended by inserting after "group" in the fourth line "or for the particular gas or vapour".

172. Subregulation 1 of regulation 722 of the principal Regulations is revoked and the following substituted therefor:

(1) The wiring method in Class I Division 2 location shall be rigid conduit with, except where general-purpose enclosures are permitted by regulations 718 to 738, both inclusive, boxes, box-assemblies and fittings having

(a) threaded joints for conduit connection with at least 3 full threads engaged;

(b) tightly-fitting covers or other effective means of preventing the escape of sparks or burning material; and

(c) no holes for attachment screws, or any other opening through which sparks or burning material may escape or adjacent combustible material may be ignited.

173. Clause *b* of regulation 726 of the principal Regulations is amended by inserting after "type" in the last line "provided it is unfused".

174. Regulation 731 of the principal Regulations is revoked and the following substituted therefor:

731.(1) Every lamp in a Class I Division 2 location shall be installed in a fixture which

(a) in the case of a portable lamp is of the explosion-proof type approved for use in the class and group of the location;

(b) in the case of a fixed lighting fixture is

(i) protected from mechanical injury by its location or by suitable guards,

(ii) enclosed or otherwise safeguarded against the discharge of sparks or other burning material, and

(iii) not capable of attaining a surface temperature during normal operation in excess of 80 per cent of the ignition temperature of the gas or vapour present;

(c) in the case of a pendant fixture is suspended by a threaded rigid-conduit stem or by other approved means.

(2) Where the stem required by clause *c* of subregulation 1 is longer than 12 inches, flexibility shall be ensured by the use of a fitting or flexible connector suitable for the purpose installed not more than 12 inches from the point of attachment to the supporting box or fitting.

(3) The starting and control equipment for mercury-vapour and fluorescent lamps shall comply with the requirements of regulation 729.

(4) Where a switch is part of the assembled fixture or of an individual lamp-holder, it shall be of a type approved for the class and group of the location.

175. Subregulation 1 of regulation 736 of the principal Regulations is amended by inserting after "provided" in the sixth line "the equipment is approved for the use with the particular gas or vapour of the location".

176. Subregulation 1 of regulation 740 of the principal Regulations is amended by striking out "Air-cooled" in the first line and inserting in lieu thereof "Dry-core".

177. Regulation 743 of the principal Regulations is revoked and the following substituted therefor:

743.(1) The wiring method in a Class II Division 1 location shall be rigid conduit with threaded boxes and fittings approved for the class and group of the location.

(2) Where it is necessary to use flexible connections and provided the prevailing dust is electrically non-conductive, flexible conduit welded or brazed to connectors or nipples, or type S flexible cord with bushed fittings at each end, shall be used.

(3) Where a flexible cord permitted under subregulation 2 is used in locations where it may be exposed to oil or other corrosive conditions the flexible cord shall be of a type approved for use under those conditions.

(4) The flexible cord shall contain an additional conductor for grounding.

178. Subregulation 2 of regulation 754 of the principal Regulations is revoked and the following substituted therefor:

(2) Where under clause *c* of subregulation 1 current-breaking contacts are immersed in oil, or the interruption of current occurs in a chamber sealed against the entrance of dust, and provided that the prevailing dust is electrically non-conductive, the enclosure may be of a general-purpose type.

179. Regulation 759 of the principal Regulations is amended by striking out "air-cooled" in the first line and inserting in lieu thereof "dry-core".

180. Clauses *c*, *d*, and *e* of subregulation 1 of regulation 784 of the principal Regulations are revoked and the following substituted therefor:

(c) lead directly to a source of clean air outside the building in the case of suction vent-pipes;

(d) lead directly outside in the case of exhaust vent-pipes;

(e) be screened at the outer end to prevent the entrance of small animals or birds; and

(f) be protected against mechanical damage and against rust or other corrosive agent.

181. Regulation 790 of the principal Regulations is revoked and the following substituted therefor:

790.(1) No crane which operates in a Class III Division 1 location shall be operated on a system having a grounded conductor.

(2) Where a crane operates in a Class III Division 1 location the resistors shall be placed in

(a) a well-ventilated cabinet

(i) constructed of non-combustible material; and

(ii) so constructed that it will not emit flames or molten metal, or

(b) a cage or cab the sides of which are constructed of non-combustible material from the floor to at least 6 inches above the top of the resistors.

(3) The feeders for every crane operating in a Class III Division 1 location shall be equipped with a recording ground-detector and shall be protected by a relay which automatically opens the feeder circuit-breaker when the insulation of the system falls below 1000 ohms.

(4) Where a crane operates in a room used for the storage of ignitable fibres, the bare conductors shall be screened so as to prevent the escape of sparks or hot particles and the moving current-collectors shall be so designed as to minimize sparking at sliding contacts.

(5) Where the distance of travel of crane referred to in subregulations 1 to 4 permits, the current shall be supplied to the crane through type S flexible conductors equipped with an approved type of reel or take-up device.

182. The principal Regulations are amended by adding thereto the following regulation:

811a. In this Part "floor level" means

- (a) the actual level of the floor where it is constructed at or above grade level; or
- (b) where the floor is constructed below grade level the level the floor would be if it had been constructed level with the bottom of outside doors or other openings in the building at or above grade level.

183. Regulation 811 of the principal Regulations is amended by inserting after "installed in" in the second line "aircraft hangars".

184. Regulation 812 of the principal Regulations is amended by inserting after "parts of" in the first line "aircraft hangars".

185. Regulation 815 of the principal Regulations is revoked and the following substituted therefor:

815.(1) Where generators, motors, controllers and similar equipment having commutators, collector rings, or make-and-break or sliding contacts are located 18 inches or more above the floor level of an aircraft hangar, a garage, service station or filling station, they shall

- (a) be of the totally-enclosed type, or
- (b) have wire screens or perforated metal with openings of not more than 5/100 inch in one dimension placed at the commutator or brush ends of the motors and generators so as to prevent the discharge of particles.

(2) Where cut-outs, switches, receptacles, fixed lamp-holders, charging panels or other electrical equipment which tends to produce arcs or sparks are installed in an aircraft hangar, a garage, service station or filling station within 18 inches above the floor level, they shall be of a type approved for use in Class I locations under Part XIII.

186. Regulation 816 of the principal Regulations is amended by adding thereto the following subregulation:

- (2) Where gasoline pumps are supplied by wiring buried directly in the earth armoured-cable of the lead-sheathed rubber-insulated ACL type shall be used and shall be secured to the junction-box on the pump by a connector of the lead-gland type.

187. Regulation 817 of the principal Regulations is revoked and the following substituted therefor:

817.(1) In garages, service stations, filling stations and aircraft hangars

- (a) the flexible cord for pendent lamps shall be of type K, type S, type SO or type ST;
- (b) the flexible cord for portable lamps and equipment shall be type S, type SO or type ST;
- (c) the flexible cord for battery charging shall be type S, type SO or type ST.

(2) Every flexible cord and every device used with a flexible cord in a garage, service station, filling station or aircraft hangar shall conform to clause *d* of subregulation 1 of regulation 431, clause *b* of subregulation 1 of regulation 441 and subregulation 2 of regulation 441.

188. Subregulation 1 of regulation 818 of the principal Regulations is amended by inserting after "used in" in the second line "an aircraft hangar".

189.(1) Subregulation 1 of regulation 819 of the principal Regulations is amended by inserting after "outlet in" in the second line "an aircraft hangar".

(2) Subregulation 3 of regulation 819 of the principal Regulations is amended by striking out "4 feet" in the second line and inserting in lieu thereof "18 inches".

190.(1) Subregulation 1 of regulation 820 of the principal Regulations is amended by inserting after "pendent lamp in" in the second line "an aircraft hangar".

(2) Subregulation 2 of regulation 820 of the principal Regulations is amended by inserting after "used in" in the first line "an aircraft hangar".

(3) Subregulation 3 of regulation 820 of the principal Regulations is amended by inserting after "used in" in the first line "an aircraft hangar".

191. Regulation 821 of the principal Regulations is amended by inserting after "equipment in" in the first line "an aircraft hangar".

192. Regulation 828 of the principal Regulations is amended by adding thereto the following subregulations:

- (5) M.I. copper-clad cable may be used in a Category 1 location but where the cable is secured to a wall it shall be secured so as to give at least one-quarter inch clearance from the wall.
- (6) Aluminum-sheathed cable may be used in a Category 1 location provided it is adequately protected by corrosion-resisting material for the location in which it is installed.

193. Regulation 829 of the principal Regulations is revoked and the following substituted therefor:

829.(1) Subject to subregulations 2, 3, 4, 5, 6, 7 and 8 conductors used in Category 2 locations shall be

- (a) of the rubber-insulated, R or RW, type;
- (b) of the weather-proof WP type;
- (c) of the varnished-cloth, V, or asbestos-varnished-cloth type;
- (d) run in M.I. copper-clad cable; or
- (e) run in aluminum-sheathed cable.

(2) The weatherproof type shall be used only for conductors run as open wiring.

(3) In a wet location, the varnished-cloth, V, or asbestos-varnished-cloth types shall not be used unless lead-covered.

(4) M.I. copper-clad cable shall not be used in locations where the corrosive action is likely to have a deteriorating effect on the sheath.

(5) Aluminum-sheathed cable shall not be used unless it is adequately protected by corrosion-resisting material for the location in which it is installed.

(6) Where the vapours likely to be present are of such nature that a conductor of a type specified in subregulation 1 would not afford adequate protection, an inspector may require the use of any other type.

(7) Non-metallic sheathed cable shall not be used in a Category 2 location other than a dairy barn, chicken house or other farm building.

(8) Surface metal race-ways, under-floor-race-ways, bare conductors, armoured-cable, wire-ways, busways and split knobs shall not be used in a Category 2 location.

194. Regulation 839 of the principal Regulations is amended by inserting after "cable" in the first line "other than the N.M.W. type".

195. Regulation 840 of the principal Regulations is revoked and the following substituted therefor:

840. Non-metallic sheathed cable other than the N.M.W. type shall not be installed in root-houses.

196. Regulation 841 of the principal Regulations is amended by inserting after "cable" in the first line "other than the N.M.W. type".

197. Subregulation 1 of regulation 842 of the principal Regulations is amended by inserting after "cable" in the first line "other than the N.M.W. type".

198. Regulation 844 of the principal Regulations is amended by inserting after "rigid conduit" in the first line "or M.I. copper-clad cable".

199. Regulation 849 of the principal Regulations is amended by inserting after "rigid conduit" in the second line "or M.I. copper-clad cable".

200. Regulation 862 of the principal Regulations is revoked and the following substituted therefor:

862. The flexible cord used on portable projection equipment shall be of the S, SJ, SO, ST or K type.

201. Regulation 864 of the principal Regulations is amended by adding thereto the following subregulation:

(2) Every projection room shall be provided with an exhaust fan capable of completely changing the air once in every three minutes and so arranged that it may be controlled both inside the projection room and from a nearby point outside the projection room.

202. Subregulation 2 of regulation 868 of the principal Regulations is revoked and the following substituted therefor:

(2) The storage-battery leads shall be of the rubber-insulated, R, RH or RW, type or the thermoplastic-insulated, T, TW or TWH, type.

203. Subregulation 1 of regulation 871 of the principal Regulations is revoked and the following substituted therefor:

(1) The source of electrical energy shall be

- (a) a self-excited generator;
- (b) a primary battery; or
- (c) a rectifier.

204. Regulation 879 of the principal Regulations is revoked and the following substituted therefor:

879.(1) Organ lofts shall be illuminated by means of rigid conduit, M.I. copper-clad cable or aluminum-sheathed cable and dust-tight fixtures.

(2) Every conductor used for illumination shall be completely enclosed within the conduit, M.I. copper-clad cable, aluminum-sheathed cable or fitting.

(3) A receptacle shall be provided in the organ loft for the supply of current to an approved portable hand-lamp.

205. Regulation 903 of the principal Regulations is revoked and the following substituted therefor:

903. The conductors for outline lighting shall be run

- (a) as open wiring;
- (b) in rigid conduit;
- (c) in metal troughs;
- (d) as lead-sheathed armoured-cable;
- (e) as M.I. copper-clad cable; or
- (f) as aluminum-sheathed cable.

206. Regulation 912 of the principal Regulations is revoked and the following substituted therefor:

912. Miniature lamp-holders shall not be used without the permission of an inspector.

207. Subregulation 2 of regulation 913 of the principal Regulations is amended by striking out "15" in the third line and inserting in lieu thereof "12".

208. Clause c of subregulation 1 of regulation 916 of the principal Regulations is revoked and the following substituted therefor:

(c) flexible conduit, armoured-cable, M.I. copper-clad cable or aluminum-sheathed cable may be used with the permission of an inspector.

209. The principal Regulations are amended by adding the following regulations:

916a. Wiring for border-, stage-pocket or remote-control circuits may be run

- (a) in rigid conduit or steel E.M. tubing provided the size of conduit or tubing in relation to the number of conductors used meets the requirements of regulation 277; and
- (b) in auxiliary gutters and metal race-ways provided the sum of the cross-sectional areas of the conductors, including insulation and covering, is not more than 20 per cent of the interior cross-sectional area of the gutter or race-way.

916b. A maximum of 30 aisle-light outlets may be supplied from one branch-circuit provided that the size of the lamp bulb which can be used with each outlet is limited by the use of barriers or other devices to 25 watts or less.

210.(1) Subregulation 1 of regulation 925 of the principal Regulations is revoked and the following substituted therefor:

(1) Every portable switchboard shall be supplied by means of an approved flexible cord of type K, S, SO or ST cable terminating within the switch-board enclosure in an externally-operated, enclosed, fused master-switch.

(2) Subregulation 3 of regulation 925 of the principal Regulations is revoked and the following substituted therefor:

(3) The cable and the flexible cord shall be of sufficient current-carrying capacity to carry the total load-current of the switchboard.

211. Regulation 932 of the principal Regulations is amended by adding thereto the following subregulations:

- (7) Foot, border, proscenium or portable strip-lighting fixtures shall be adequately insulated for the temperatures to which they are exposed but the insulation shall in all cases be adequate for exposure to a temperature of 125 degrees centigrade or 257 degrees Fahrenheit.
- (8) Subject to subregulation 9 conductors used for the wiring of border-lights shall be
 - (a) the all-asbestos insulated types A-7, A-11 or A-16 (a); or
 - (b) the asbestos-varnished-cambric insulated types A-1, A-9, A-15 or A-17.
- (9) Where conductors used for the wiring of border-lights are exposed to temperatures not exceeding 90 degrees centigrade or 194 degrees Fahrenheit the asbestos-varnished-cambric types A-3 or A-4 or the slow-burning SB type may be used.

212. Regulation 961 of the principal Regulations is amended by adding "or steel E.M. tubing" at the end thereof.

213. Subregulation 2 of regulation 971 of the principal Regulations is amended by adding "only to authorized persons" at the end thereof.

214. Clause *a* of regulation 980 of the principal Regulations is amended by inserting after "vaults" in the first line "and store-rooms".

215. Subregulation 1 of regulation 981 of the principal Regulations is revoked and the following substituted therefor:

- (1) Vaults and store-rooms for the storage of furs or silks shall be wired with rigid conduit, M.I. copper-clad cable or aluminum-sheathed cable.

216.(1) Subregulation 1 of regulation 982 of the principal Regulations is amended by inserting after "vaults" in the first line "and store-rooms".

(2) Subregulation 2 of regulation 982 of the principal Regulations is amended by adding "and store-rooms" at the end thereof.

(3) Subregulation 3 of regulation 982 of the principal Regulations is amended by inserting after "vaults" in the second line "and store-rooms".

217. Subregulation 1 of regulation 983 of the principal Regulations is amended by inserting after "vaults" in the second line "and store-rooms".

218.(1) Subregulation 1 of regulation 984 of the principal Regulations is amended by inserting after "vaults" in the first line "and store-rooms".

(2) Subregulation 2 of regulation 984 of the principal Regulations is amended by adding "and store-rooms" at the end thereof.

219. Regulation 985 of the principal Regulations is revoked and the following substituted therefor:

- 985.(1) Lighting branch-circuits in vaults and store-rooms shall be controlled by a double-pole switch located outside the vault or store-room but near the entrance thereto.

(2) Every switch which controls a lighting circuit shall be equipped with a red pilot-lamp located outside the vault or store-room readily visible to persons in the workroom used in connection with the vault or store-room.

(3) Where a master switch is arranged to control the wiring in several vaults or store-rooms or more than one circuit in one vault or store-room, only one pilot light shall be required for the master switch.

220. Regulation 986 of the principal Regulations is amended by inserting after "vaults" in the first line "or store-rooms".

221. Subregulation 3 of regulation 987 of the principal Regulations is revoked and the following substituted therefor:

- (3) Every motor within a vault or store-room and every motor which operates a refrigeration unit used in connection with a vault or store-room shall be so arranged as to shut down automatically when a fire- or smoke-detection system or an automatic sprinkler-system goes into operation within the vault or store-room.

222. Regulation 988 of the principal Regulations is amended by inserting after "vault" in the second line "or a store-room".

223. The heading immediately before regulation 989 of the principal Regulations is struck out and the following substituted therefor:

VAULTS, STORE-ROOMS OR -AREAS AND ISOLATED BUILDINGS

224. Subregulation 1 of regulation 989 of the principal Regulations is amended by adding after "vaults" in the first line "store-rooms or areas".

225. Part XXIV of the principal Regulations, except Tables 35 and 36, is revoked and the following substituted therefor:

PART XXIV

HIGH-POTENTIAL INSTALLATIONS

GENERAL

991.(1) This Part shall apply to electrical installations operating at potentials of more than 750 volts, other than electrical equipment used

- (a) in connection with X-ray and high-frequency installations; or
- (b) for sign- or outline-lighting, radio- or signalling-transmission, or cold-cathode lighting.

(2) This Part shall be supplementary to and not exclusive of any other Part.

992. No person shall proceed with a high-potential installation unless the plans thereof have been filed with the Commission under regulation 22 and the approval of the Commission thereto obtained.

993. Service equipment shall

- (a) be installed in a location satisfactory to an inspector and the supply authority; and
- (b) where installed within a building be installed at the point where the service conductors enter the building.

- 994.(1) The electrical equipment shall be accessible for safe operation but otherwise inaccessible.
- (2) A permanent notice reading
- (a) Danger — High Voltage; or
- (b) Danger ————— Volts
- shall be displayed in a conspicuous position on vaults, enclosures or equipment rooms.
- (3) Permanent notices shall be posted at each single-pole isolating switch and fuse cut-out warning against their use as circuit-load-interrupter switches while they are carrying current.
- (4) Where isolating switches are group-operated they shall be so interlocked that they cannot be operated while carrying any load current.

- 995.(1) Where supply voltages do not exceed 4,000 volts, auto-transformers may be used.
- (2) Where low-potential circuits are supplied by an auto-transformer used in a high-potential installation, regulation 265 shall apply.

CONDUCTORS

- 996.(1) Service conductors in locations other than sub-stations and transformer vaults shall be
- (a) single- or multiple-conductor, lead-covered or other cable having suitable moisture-resisting covering, and
- (b) armoured or installed in rigid conduit or duct.
- (2) Where the service conductors are within a building they shall be installed only in fire-resisting, electrical-equipment rooms or vaults.
- (3) Compliance with subregulation 2 is not required where
- (a) the service entrance-equipment consists of metal-enclosed switch-gear operating at less than 15,000 volts between conductors and transformers are installed in accordance with regulations 502 to 521, both inclusive; or
- (b) conductors are installed in accordance with subregulation 1 of regulation 999.
- (4) Service-conductors connecting a customer's station and the supply authority's equipment shall be
- (a) capable of withstanding a short-circuit current without damage to the conductors or their insulation; or
- (b) acceptable to the supply authority.
- 997.(1) Service-conductors may be carried into a building through suitable lead-in devices, but the conductors shall be so located or guarded as to be inaccessible from the ground or from a window, flat roof, balcony or other place of vantage.
- (2) The service-conductors
- (a) shall be not smaller than No. 6 B. & S. gauge; and
- (b) shall have a mechanical strength equivalent to that of hard-drawn copper.

998. Subject to regulation 999 where conductors other than service conductors operate at more than 15,000 volts and are installed within a building they shall be installed only in transformer vaults, sub-stations, fire-resisting motor rooms or other similarly protected spaces.

- 999.(1) Service-conductors and other conductors may be installed in conduit or ducts run under a building or within a wall of concrete or masonry, but the conduit or duct shall be surrounded throughout the entire length of its run by not less than 2 inches of concrete or masonry.

- (2) Underground ducts shall be drained.

- 1000.(1) Except where otherwise permitted in this Part feeder and branch-circuit conductors shall be

- (a) single- or multiple-conductor cable approved for the purpose, and
- (b) armoured or installed in rigid or flexible conduit.

- (2) The cables shall be sheathed in metal but, in normally dry locations where there is no risk of flooding, cables having other approved absorption-resisting covering may be installed.

- (3) Where single-conductor cables are completely encircled by an enclosure consisting of magnetic material all the cables of a circuit shall be grouped within the same enclosure.

1001. Cable having approved insulation but which is not sheathed in metal shall be suitably shielded where it is necessary to confine the dielectric stress or to prevent corona damage to the insulation.

1002. Bare conductors may be used in central stations, sub-stations, motor- and generator-rooms, transformer-vaults, electrical-equipment vaults and outdoor distribution circuits.

- 1003.(1) This regulation applies to all conductors which are not sheathed or enclosed in metal, other than overhead lines.

- (2) Conductors other than those for apparatus and devices shall be so spaced as to maintain

- (a) an air-gap clearance between live parts and adjacent surfaces, other than insulation and the bases of conductor-supports, of at least that prescribed in column 2 or 3 of Table 35 for indoor or outdoor installations respectively at the voltage between phase conductors shown in column 1 of the table; and

- (b) an air-gap clearance between live parts of at least that prescribed in column 2 or 3 of Table 36 for indoor or outdoor installations respectively at the voltage between phase conductors shown in column 1 of the table.

- (3) Conductors of different voltages shall be so spaced as to maintain a minimum air-gap clearance between them equal to the aggregate of their individual clearances between live parts and adjacent surfaces ascertained in accordance with subregulation 2.

- (4) Where conductors are connected to apparatus or devices having terminal spacings less than those required by Tables 35 and 36 the conductors shall be fanned out to the required spacings.

(5) All conductors shall be mounted on suitable supports.

(6) Conductors and their supports, including insulators, shall have such strength and stability as to ensure the maintenance of the required clearance under all operating and short-circuit conditions.

(7) Conductors and other bare live parts shall be

(a) accessible only to authorized persons; and

(b) isolated by elevation above ground level the number of feet prescribed in column 2 of Table 51 for indoor installations at the voltage shown in column 1 of the table; and

(c) isolated by elevation above ground level the number of feet prescribed in columns 2 and 3 of Table 52 for outdoor installations in light or heavy snow areas respectively at the voltage between conductors shown in column 1 of the table; and

(d) screened by barriers of equivalent height to the elevation prescribed by clause *b* which are spaced from the conductors and other bare live parts so that the clearances prescribed by clause *a* of subregulation 2 may be maintained.

(8) Where splices or taps are required between lengths of insulated conductor or cable they shall be enclosed by insulation equal to the insulation on the conductor or cable.

(9) Where cables or conductors are installed outdoors and emerge from conduit a pothead or equivalent device shall be provided where the cables or conductors emerge to protect them from moisture and mechanical injury.

TABLE 51

From	To	Feet
750	2,500	8
2,501	7,500	8
7,501	30,000	9
30,001	70,000	10
70,001	100,000	12

TABLE 52

[regulation 1003 (7) (c)]

Voltage between phase conductors in outdoor installations		Minimum Elevation Above Ground Level	
Column 1		Column 2	Column 3
		Light Snow Area	Heavy Snow Area
From	To	Feet	Feet
750	34,500	10	12
34,501	46,000	12	14
46,001	115,000	18	20
115,001	230,000	20	22

1004.(1) Where conductors or cables sheathed or enclosed in metal are joined provision shall be made for the continuity of the sheath by

(a) bonding of the potheads,

(b) a continuous wiped joint over the splice or tap, or

(c) use of a metal splice or tap-box.

(2) Cables sheathed or enclosed in metal shall be terminated by means of potheads.

1005.(1) Lead covering, shielding, metal armour, conduit and fittings shall be thoroughly bonded together and grounded.

(2) Where single conductor metal-sheathed cables are installed in separate ducts of insulating material the cables shall be isolated from each other and from grounded material except at the supply end where they shall be bonded together and grounded.

1006.(1) High-potential conductors shall not be installed in elevator hoist-ways.

(2) The conductors may be installed in conduit embedded in the masonry walls of the hoist-way, but the conduit shall be surrounded throughout the entire length of its run by not less than 2 inches of masonry.

1007. Where one or more transformers supply only buildings under the same ownership or occupation, the primary conductors may be considered as service conductors, but

(a) they shall be provided with a switch or circuit-breaker capable of interrupting the full current on the service;

(b) the circuit-breaker shall be capable of operation by the consumer from within the buildings served; and

(c) the high-potential service equipment shall be inaccessible.

1008.(1) Where closely-grouped open conductors with insulating coverings are subject to arcs or heat caused by short-circuits in nearby conductors, the open conductors shall have a flame-retarding insulation or a flame-retarding outer covering.

- (2) Where the coverings are conductive they shall be stripped back from the terminals a sufficient distance to prevent leakage of current.

CONTROL AND PROTECTIVE EQUIPMENT

1009.1 Every supply service shall be equipped with over-current protection acceptable to the supply authority installed as closely as possible to the point where the electrical equipment provided by the supply authority makes connection with the consumer's electrical equipment and arranged to protect all ungrounded conductors of the service.

- (2) Subject to subregulations 3 and 4 the over-current protection shall consist of

(a) a circuit-breaker having adequate interrupting capacity; or

(b) fuses of adequate interrupting capacity where they are preceded by a gang-operated, visible-break, load interrupter switch capable of

(i) making and interrupting the full load rating of the switch, and

(ii) being safely closed when there is a fault on the system.

- (3) Fuses of adequate interrupting capacity may be installed in an out-of-doors installation where they are preceded by a gang-operated horn-gap switch interlocked with the circuit-breakers on the secondary side of the transformer installation so that the switch cannot be operated under load and is capable of

(i) interrupting the charging current of the transformer installation, and

(ii) being safely closed when there is a fault on the system.

- 4 Where the total load on the service consists solely of transformers and does not exceed 100 kva per phase and the potential between phases does not exceed 5,000 volts a single-pole disconnecting fuse of adequate interrupting capacity may be used.

1010.(1) Circuit-breakers shall

(a) be of the trip-free type, and

(b) incorporate means for indicating whether they are open or closed.

- 2 Circuit-breakers installed in-doors for potentials of more than 15,000 volts shall be installed in separate vaults each of which conforms to regulations 512 to 521, both inclusive.

- 3 Circuit-breakers installed in vaults shall be capable of being operated from without the vault.

- 4 Circuit-breakers shall be so located that the operator is protected from injury which might be caused by faulty operation of the breaker.

1011.(1) Subject to subregulation 2, oil circuit-breakers shall

(a) be mounted

(i) well away from the control panel in a fire-proof switch room or motor room; or

(ii) in a vault which conforms to regulations 512 to 521, both inclusive; or

(b) be of the metal-clad type.

- (2) Oil circuit-breakers for potentials of from 5,000 volts to 15,000 volts shall

(a) conform to clause b of subregulation 1; or

(b) be isolated from other electrical apparatus.

1012.(1) A group-operated isolating switch shall be installed on the supply side of each service circuit-breaker and shall

(a) visibly disconnect all ungrounded conductors of the service simultaneously,

(b) be interlocked so as to be incapable of being operated under load, and

(c) be capable of being locked in the open position.

- 2 Where circuit-breakers are installed at locations other than service entrances, a group-operated isolating switch shall be installed on the supply side of each circuit-breaker and shall be interlocked to prevent the operation of the switch under load.

- 3 Where there is a possibility of feed-back an isolating switch shall be installed on both the supply side and load side of all circuit-breakers and shall be so interlocked that they cannot be operated under load.

- (4) Metal-clad draw-out equipment may be used in place of the isolating switch required by subregulations 2 and 3.

1013.(1) Where oil-immersed isolating switches are used, they shall be mechanically or electrically interlocked with the circuit-breaker or circuit-breakers so that the switch cannot be opened or closed until the circuit-breakers are open.

- (2) Every oil-immersed isolating switch shall be equipped with

(a) a position indicator operated from the contact bars; or

(b) inspection ports through which the positions of the contacts are visible.

1014. Every isolating switch of the air-break type, whether located at a service-entrance point or elsewhere, shall be isolated by elevation or rendered otherwise inaccessible.

1015. Every operating unit and all apparatus and every branch- and feeder-circuit shall be protected against over-current by a circuit-breaker or fuses having a rating sufficient for the voltage employed and for the maximum current which is required to be interrupted.

1016.(1) (a) Where fuses are used for the protection of individual feeder- or branch-circuits they shall be installed at the point where the circuits receive their supply.

- (b) Fuses shall not be used for the protection of individual transformers or groups of transformers operating as a unit unless the transformers are supplied by a common feeder which is protected at the point where it receives its supply by a manually-operated or remote-control circuit-breaker.

(2) Fuses shall be so located that

- (a) the blowing of the fuse does not cause injury to persons or damage to equipment or property;
- (b) they are accessible to authorized persons only; and
- (c) they can be readily inserted or removed.

1017.(1) Fuse cut-outs shall not be used to interrupt load currents.

- (2) A notice warning against the use prohibited by subregulation 1 shall be installed near every fuse cut-out.

1017a.(1) Outside installations shall be surrounded by a suitable metallic or wooden fencing which is

- (a) six feet high,
- (b) topped by 3 strands of barbed wire, and
- (c) spaced at least 8 feet from the electrical equipment.

- (2) Where it is desirable to erect the fencing closer to the electrical equipment than is permitted by clause c of subregulation 1 the fencing shall be increased 1 foot in height for each foot or part thereof it is erected closer than 8 feet to the electrical equipment.

- (3) Where the installation consists of metal-clad equipment all the conductors of which are either located underground or enclosed in metal, clause c of subregulation 1 and subregulation 2 do not apply.

- (4) In no case shall the fencing be closer than 3½ feet to the electrical equipment.

- (5) Gates in the fencing shall be kept locked and the keys shall be made available to authorized personnel only.

1017b.(1) Overhead conductors shall have a vertical clearance from buildings of 15 feet.

- (2) Overhead conductors supplying a structure or building shall be so spaced as to provide

- (a) a clearance between phase conductors at the voltage between the conductors shown in column 1 of Table 53 of at least that prescribed in columns 2 or 3 of Table 53 for horizontal and vertical spacing respectively;

- (b) a clearance above property accessible to vehicles of at least that prescribed in column 2 of Table 54 for the voltage between phase conductors shown in column 1 of the table;

- (c) a clearance above property accessible only to pedestrians of at least that prescribed in column 3 of the table;

- (d) a horizontal clearance from other buildings prescribed in column 2 of Table 55 for the voltage between phase conductors shown in column 1 of the table.

- (3) Where a span exceeds 175 feet in length 1/10 of a foot shall be added to each of the clearances specified by subregulation 1 for each foot that the span exceeds 175 feet.

- 1017*e*. Horn-gap switches shall be mounted in a horizontal position and be capable of being locked in the open position.
- 1017*f*. Where transformers are mounted on a wooden structure the minnum top diameter of the poles supporting the structure shall be 8 inches.
- 1017*g*.(1) The primary in a wye-delta connected transformation may be operated with a floating neutral if the supply authority so permits, provided
- (a) a supply neutral connected to a transformer neutral shall be grounded, and
 - (b) a transformer neutral shall not be grounded unless the supply neutral is connected to it.
- (2) The two transformer neutral conductors in a wye-wye connected transformation shall be
- (a) interconnected by as short a lead as possible,
 - (b) grounded to the station ground, and
 - (c) connected to the neutral of the supply system where the supply system is a grounded system.
- 1017*h*. Adequate emergency exit or exits shall be provided from any room wherein electrical equipment is installed and in which it is possible for persons to be trapped.

GROUNDING

- 1017*i*.(1) Every station shall be grounded by means of an electrode consisting of at least 3 ground rods 10 feet long and $\frac{3}{4}$ inch in diameter, or alternative devices approved for the purpose, suitably interconnected by a soft-drawn copper conductor not smaller than No. 2/0 B. & S. gauge.
- (2) Where lightning arresters rated at from 10,000 volts to 69,000 volts are installed on a supporting structure, at least 2 of the ground rods or alternative devices shall be located directly below the supporting structure.
- (3) (a) Where a station operates at a capacity not exceeding 1500 kva the electrode shall have a resistance to ground of not more than 15 ohms.

- (b) Where a station operates at a capacity exceeding 1500 kva but not exceeding 10,000 kva the electrode shall have a resistance to ground of not more than 10 ohms.
 - (c) Where a station operates at a capacity exceeding 10,000 kva the ground electrode shall have a resistance to ground of not more than 2 ohms.
- (4) Where a continuous-metal water main located on the premises supplied with electrical power or energy by the station is used in connection with the premises and is located at any point within 200 yards of the station the ground electrode shall be connected to the water main by a soft-drawn copper grounding conductor not smaller than No. 2/0 B. & S. gauge.
- (5) Where a continuous-metal water main is located on lands adjacent to the premises supplied with electrical power or energy by the station the ground electrode may be connected to the water main by a soft-drawn copper grounding conductor not smaller than 2/0 B. & S. gauge if the water main has a lower resistance to ground than the ground electrode.
- (6) Means shall be provided for isolating the copper grounding conductor connected to water mains under subregulations 4 and 5 for testing purposes.
- (7) (a) Lightning arresters rated at less than 10,000 volts shall be connected to the electrode by copper conductors not smaller than No. 4 B. & S. gauge.
- (b) Lightning arresters rated at more than 10,000 volts but not exceeding 30,000 volts shall be connected to the electrode by copper conductors not smaller than No. 2 B. & S. gauge.
 - (c) Lightning arresters rated at more than 30,000 volts but not exceeding 69,000 volts shall be connected to the electrode by copper conductors not smaller than No. 2/0 B. & S. gauge.
 - (d) The copper conductors required by clauses *a*, *b* and *c* shall be as short as possible.
 - (e) Line sky-wires shall be connected to the electrode by copper conductors which are equivalent in current-carrying capacity to the sky-wire.
 - (f) Neutral conductors shall be connected to the electrode by copper conductors which are equivalent in current-carrying capacity to the neutral conductors.
 - (g) Means shall be provided for isolating the copper grounding conductors required by clauses *e* and *f* for testing purposes.
 - (h) The supporting legs of all metal structures shall be connected to the electrode by copper conductors not smaller than No. 2/0 B. & S. gauge.
- (8) The following non-current-carrying metal parts of the station shall be connected to the electrode by copper conductors of the gauge indicated:
- (a) Transformers, generators, motors, circuit-breakers and current transformers by a No. 2/0 B. & S. gauge copper conductor;

- (b) Frames of gang-operated switches located within the station enclosure, frames of disconnecting switches, and bases of fuses, unless they are mounted on a metal structure the supporting legs of which are grounded in conformance with clause *h* of subregulation 7 and continuity of bonding is ensured, by a No. 2/0 B. & S. gauge copper conductor;
- (c) Gradient-control devices required by subregulation 1 of regulation 1017j by a No. 2/0 B. & S. gauge copper conductor;
- (d) Cable sheaths, race-ways, pipe work, screen guards, switchboards and potential transformers by a No. 4 B. & S. gauge copper conductor;
- (e) Meter and relay cases by a No. 10 B. & S. gauge copper conductor;
- (f) Exposed metal work on buildings within the station enclosure by a No. 2/0 B. & S. gauge copper conductor.

1017j.(1) Where a gang-operated switch is installed outdoors a gradient-control device shall be installed.

(2) The device shall

- (a) (i) be at least 4 feet wide and 6 feet long,
- (ii) consist of steel wires .25 of an inch in diameter welded into meshes not larger than 6 inches wide and 8 inches long,
- (iii) be buried to a depth of 3 inches in a minimum of 6 inches of building sand which shall after installation of the device be treated so as to discourage vegetation,
- (iv) if installed within the station enclosure have an approved connector stud for one No. 3/0 B. & S. gauge copper conductor and two No. 2/0 B. & S. gauge copper conductors welded to the device at a junction of 2 cross-wires forming the mesh referred to in sub-clause (ii),
- (v) be so located that the operator shall stand directly above the mat while operating the switch;

OR

(b) consist of 3 ground rods which shall

- (i) be installed to form the vertices of a 6-foot equilateral triangle one side of which shall be adjacent to the structure on which the switch is installed,
- (ii) be interconnected with a No. 2/0 B. & S. gauge copper conductor which where the device is installed within the station enclosure shall in turn be connected to the station ground electrode by two separate No. 2/0 B. & S. gauge soft-drawn copper conductors, and

- (iii) be so located that the operator shall stand inside the triangle while operating the switch.

1017k.(1) Where a gang-operated switch is installed inside the station enclosure

- (a) the operating rod of the switch shall be connected to the handle base by a No. 3/0 B. & S. gauge copper conductor consisting of approximately 425 strands which shall connect to and terminate on a 3/0 B. & S. gauge copper conductor which in turn shall connect to and terminate on
 - (i) the approved connector stud of the gradient-control device, required by sub-clause iv of clause *a* of subregulation 2 of regulation 1017j, or
 - (ii) one of the ground rods comprised in the gradient-control device referred to in clause *b* of subregulation 2 of regulation 1017j.

(2) Where a gang-operated switch is installed outside the station enclosure

- (a) it shall be so located that the gradient-control device is at least 10 feet outside the enclosure;
- (b) a ground rod 10 feet long and $\frac{3}{4}$ inch in diameter shall be installed
 - (i) at each of the four corners of a gradient-control device described in clause *a* of subregulation 2 of regulation 1017j, and
 - (ii) at each angle of the gradient-control device described in clause *b* of subregulation 2 of regulation 1017j.
- (c) the operating rod of the switch shall be connected to the handle base by a 3/0 B. & S. gauge copper conductor consisting of approximately 425 strands which shall connect to and terminate on a No. 3/0 B. & S. gauge copper conductor which in turn shall connect to and terminate on one of the ground rods required by clause *b*;
- (d) if the system neutral conductor is present at the switch location the switch frame shall be connected to the neutral conductor by a copper conductor having a current-carrying capacity at least equal to the neutral conductor;
- (e) if the system neutral conductor is not present at the switch location the switch frame shall be connected to one of the ground rods installed in connection with or as part of the gradient-control device.

(3) No part of the grounding system required by subregulation 2 shall be interconnected with the fence or station ground electrodes.

1017l. Grounding conductors mounted on wooden poles shall be protected by a wooden moulding.

1017m.(1) Subject to the provisions of regulation 1017n fence enclosures of outdoor stations shall be grounded independently of the station ground electrode in the following manner:

- (a) at least four ground rods 10 feet long and $\frac{3}{4}$ inch in diameter, one of which shall be located at each gatepost on the hinge side, shall be spaced as uniformly as possible around the fence at the fence posts with the distance between any two rods not exceeding 40 feet;
 - (b) a soft-drawn copper conductor at least No. 2/0 B. & S. gauge shall connect each ground rod to
 - (i) the fence post if it is metal,
 - (ii) the fence rails if they are metal,
 - (iii) all other metal fence fabrics, and
 - (iv) the barbed wire on top of the fence;
 - (c) an additional No. 2/0 B. & S. gauge grounding conductor shall interconnect the gate fabric and the barbed wire at the top of the gate.
- (2) Where any building wall having exposed metal work forms part of the station enclosure
- (a) ground rods 10 feet long and $\frac{3}{4}$ inch in diameter, one of which shall be located at each junction of the fence and building, shall be spaced as uniformly as possible along the wall with the distance between any two rods not exceeding 40 feet;
 - (b) two soft-drawn copper conductors at least No. 2/0 B. & S. gauge shall be connected to each ground rod located at the junction of the fence and building, one of which shall make the connections required by clause *b* of subregulation 1 and the other shall be run up the wall to connect from above to the exposed metal work of the building.
- (3) A continuous grounding path along the fence shall be ensured by interconnecting
- (a) metal fence panels, rails and posts by a soft-drawn copper conductor not smaller than No. 2/0 B. & S. gauge;
 - (b) adjoining metal fence rails across each joint by a soft-drawn copper conductor not smaller than No. 2/0 B. & S. gauge;
 - (c) the two gate posts if they are of metal by an underground soft-drawn copper conductor not smaller than No. 2/0 B. & S. gauge;
 - (d) the grounding conductors prescribed by clauses *b* and *c* of subregulation 1 with a No. 3/0 B. & S. gauge extra-flexible copper conductor.
- 1017*n*. Two electrodes shall respectively connect the fence on opposite sides of the enclosure to the station ground electrode where
- (a) the fence or the open gate are within 5 feet of the station electrode, the structure on which the switch is located, any building within the enclosure or the gradient-control device; or
 - (b) the wall of a building having exposed metal work forms a part of or is located within 5 feet of an outdoor station enclosure.

226. Part XXV of the principal Regulations, including Table 37, is revoked and the following substituted therefor:

PART XXV

X-RAY INSTALLATIONS

- 1018.(1) This Part shall apply to X-ray installations operating at any frequency and shall be supplementary to and not exclusive of any other Part.
- (2) Nothing in this Part shall be construed as specifying safeguards against X-ray radiation.
- 1019.(1) High-voltage parts shall be
- (a) mounted within enclosures of grounded metal or insulating material, or
 - (b) installed in a room or enclosure used for no other purpose and provided with a suitable switch
 - (i) to control the circuit supplying the X-ray equipment, and
 - (ii) so arranged that it is open at all times except while the door of the room or enclosure is locked from the outside.
- (2) Conductors in the high-voltage circuits shall be of the shock-proof type.
- (3) High-voltage leads on fluoroscope tables shall be
- (a) adequately insulated; or
 - (b) provided with barriers to prevent inadvertent contact.
1020. Where an X-ray machine is equipped with a milliammeter it shall be
- (a) connected, where practicable, in the grounded lead; and
 - (b) guarded if connected in the high-voltage lead.
- 1021.(1) Permanently installed X-ray apparatus supplied by branch-circuits protected by over-current devices rated or set at not more than 30 amperes may be supplied through a suitable plug and heavy-duty cable or cord.
- (2) All transportable X-ray apparatus shall be connected to its power supply by suitable temporary connections and heavy-duty cable or cord.
- 1022.(1) A disconnecting means of adequate capacity shall be provided in a location readily accessible from the X-ray control.
- (2) Where apparatus requires a 115-volt branch-circuit protected by over-current devices rated or set at not more than 30 amperes the disconnecting means may consist of a plug and receptacle of proper size.
- 1023.(1) Part IX shall not apply to transformers and capacitors forming part of an X-ray installation.
- (2) Capacitors shall be provided with an automatic means for discharging and grounding the plates when the transformer primary is disconnected from the source of supply.

- (3) Subregulation 2 shall not apply to capacitors where all current-carrying parts of the capacitors and of the conductors connected therewith are
- located at least 8 feet from the floor and are inaccessible to unauthorized persons, or
 - located within 8 feet from the floor in enclosures of grounded metal or insulating material.
- 1024.(1) The low-voltage circuit of the step-up transformer supplying stationary equipment shall contain a circuit-breaker which
- has no exposed live parts,
 - protects the radiographic circuit against faults under all operating conditions,
 - is installed as a part of the equipment or immediately adjacent thereto, and
 - is manually operable unless one other manually operable switch is provided in the low-voltage circuit of the step-up transformer as part of the equipment or immediately adjacent thereto.
- (2) Branch-circuit over-current devices having a rating or setting lower than the current rating of the circuit-breaker shall be added for the protection of fluoroscopic and therapeutic circuits where the design of the step-up transformer requires their addition for adequate protection of those circuits.
- (3) Subregulations 1 and 2 shall apply to the low-voltage circuit of the step-up transformer supplying portable equipment except that
- the circuit-breaker shall be located in or on the equipment, and
 - no circuit-breaker is required where the high-voltage parts including the X-ray tube are located within the same metal enclosure which is provided with a means of grounding.
1025. In addition to the requirements of regulation 1024 medical X-ray equipment
- of the radiographic type shall be provided with a timer controlled by a switch designed to open automatically except when held closed manually;
 - of the fluoroscopic type shall be provided with a switch designed to open automatically except when held closed manually;
 - of the therapeutic type shall be provided with a timer which is not of the repeating type.
- 1026.(1) In addition to the requirements of regulation 1024 industrial X-ray equipment of the radiographic and fluoroscopic types shall be provided with a timer or a manual switch to open and close the circuit.
- Where switches operated by foot pressure are used the contact button shall be provided with a shield to guard against accidental closing unless the equipment is of the fully enclosed shock-proof type.
 - Where switches operated by foot pressure are used with radiographic type equipment the switch shall automatically return to the "OFF" position when foot pressure is released.
1027. Where more than one piece of equipment is operated from the same high-voltage circuit each piece of equipment or each group of equipment as a unit shall be provided with a high-voltage switch or equivalent disconnecting means.
1028. The non-current-carrying metal parts of tube stands, fluoroscopes and other apparatus shall be grounded in conformity with Part VII.
1029. X-ray apparatus used in anaesthetizing areas in hospitals shall conform to regulation 1223.
- 227.** Subregulation 1 of regulation 1031 of the principal Regulations is revoked and the following substituted therefor:
- This Part shall apply to electrical installations for high-potential luminous-discharge-tube signs and outline lighting and shall be supplementary to and not exclusive of any other Part.
- 228.** Regulation 1032 of the principal Regulations is revoked and the following substituted therefor:
- WIRING
- 1032.(1) The conductors shall be installed
- as open work;
 - as concealed conductors on insulators;
 - in rigid or flexible conduit; or
 - with the permission of an inspector, in electrical metallic tubing.
- The conductors may be run from the ends of tubing to the grounded mid-point of the transformers but the transformers shall have terminals at the mid-point.
 - Where the transformer is of the mid-point grounded type, the connections between the high-voltage terminals of the transformers and the line ends of the tubing shall be as short as possible.
 - Bare conductors shall be installed inside grounded metal enclosures.
 - Where conductors are subject to mechanical injury or are located within reach of ground, roof or window, they shall be
 - lead-covered and approved for the purpose,
 - installed in metal troughing, or
 - otherwise suitably guarded.
- 229.** Regulation 1033 of the principal Regulations is amended by adding thereto the following sub-regulation:
- Uninsulated conductors shall be solid and not smaller than No. 10 B. & S. gauge.
- 230.** Regulation 1035 of the principal Regulations is revoked and the following substituted therefor:
- 1035.(1) Where conductors are run as open work they shall be mounted on non-combustible, non-absorptive insulators.
- Where porcelain insulators are used they shall be glazed on all exposed surfaces.

- (3) Subject to subregulation 4 there shall be a separation of at least 2 inches at all times between the conductors and between the conductors and other objects.
- (4) Where the conductors are guarded there shall be a separation of at least 1½ inches between the conductors and the guard unless the guard is non-conductive and non-combustible, in which case no separation is specified.

231. Subregulation 2 of regulation 1036 of the principal Regulations is revoked and the following substituted therefor:

- (2) Concealed conductors shall be installed in channels lined with non-combustible material and used for no other purpose except that primary circuit conductors may be run in the same channel.

232. Subregulation 1 of regulation 1038 of the principal Regulations is revoked and the following substituted therefor:

- (1) Where conductors are in contact with the grounded metal of race-ways the conductors shall be lead-covered unless their insulation is resistant to corona.

233. The principal Regulations are amended by adding the following regulation:

- 1038a. Not more than 20 feet of cable from a single transformer shall be run in rigid or flexible conduit or in electrical metallic tubing.

234. Regulation 1044 of the principal Regulations is revoked and the following substituted therefor:

- 1044.(1) Circuits which supply mercury-vapour and gas-tube lamps and their transformers shall be controlled by an externally-operated switch suitable for the conditions of installation and capable of opening all ungrounded conductors.

- (2) The switches shall be located within sight of the installations which they control unless they can be locked in the open position.

- (3) Where snap switches are used they shall

- (a) be of a type approved with the assembly; or
- (b) have a current rating of not less than twice the current requirement of the lamps or transformers.

235. Regulation 1046 of the principal Regulations is amended by striking out "of the sign" in the fourth and fifth lines.

236. Regulation 1051 of the principal Regulations is amended by adding "even on the breakage of the gas-tube" at the end thereof.

237. Regulation 1055 of the principal Regulations is revoked and the following substituted therefor:

- 1055. Where doors or covers accessible to the general public give access to the uninsulated parts of indoor signs or outline lighting they shall

- (a) be provided with an interlock switch which will disconnect the primary circuit on the opening of the doors or covers, or
- (b) be so fastened that the use of ordinary tools will not open them.

238. Regulation 1062 of the principal Regulations is revoked and the following substituted therefor:

- 1062. Where communication circuits are used by an electrical or communication utility in the exercise of their functions as a utility they shall not be subject to the approval of an inspector, but where the communication circuit derives power for operation from a supply circuit, the transformer or other current-limiting device used at the junction of the communication circuit and the supply circuit shall be subject to the approval of an inspector.

239. Regulation 1075 of the principal Regulations is revoked and the following substituted therefor:

- 1075. Outside communication-system conductors shall not be attached to the upper surfaces of roofs or be run within 6 feet measured vertically of a roof unless the permission of an inspector is secured or the building is a garage or other auxiliary building of 1 storey.

240. Regulation 1087 of the principal Regulations is revoked and the following substituted therefor:

- 1087. Where power conductors are to be laid underground or under water, the contractor shall, before work is begun, submit to an inspector designated by the Commission for the purpose of this regulation, and obtain his written approval of, the plans of the circuits of which the power conductors form part and of the specifications for the material and equipment for the circuits.

241. Regulation 1096 of the principal Regulations is amended by adding thereto the following subregulation:

- (5) Every pole shall have at the top a minimum circumference of 15 inches.

242. Subregulation 4 of regulation 1103 of the principal Regulations is revoked and the following substituted therefor:

- (4) Where an overhead secondary line other than a service line enters a building and the height of the building is insufficient to permit the clearance required by subregulations 2 and 3, the service fitting shall be installed at the highest practicable level unless an inspector considers it necessary to install it at a lower level, but in no case shall it be lower than 9 feet above ground level.

243.(1) Subregulation 1 of regulation 1124 of the principal Regulations is revoked and the following substituted therefor:

- (1) Where the voltage of power conductors is more than 750 volts the conductors shall be dead-ended as shown in items 1 or 2 of Specification 13 but

- (a) where one of the conductors is a grounded neutral, the insulator may be dispensed with on that conductor, and
- (b) where the voltage exceeds 3000 volts to ground, two 6-inch insulators shall be used in series.

(2) Subregulation 2 of regulation 1124 of the principal Regulations is amended by striking out "5000" in the first line and inserting in lieu thereof "3000".

244. Regulation 1134 of the principal Regulations is revoked and the following substituted therefor:

- 1134. Where, by reason of special circumstances, the use of a span longer than that permitted by Table 40 is necessary, an inspector may

permit the use of a longer span subject to such conditions as to materials and methods of construction and support as he may consider necessary.

245. Subregulation 2 of regulation 1135 of the principal Regulations is amended by striking out "service" in the first line.

246. Regulation 1137 of the principal Regulations is amended by adding thereto the following subregulation:

- (2a.) Where insulators are required on a primary service line having a copper conductor with weather-proof covering and the voltage exceeds 3000 volts to ground the covering shall be removed from the conductor for a distance of 12 inches and that portion of the conductor which is bare shall be centrally located on the insulator and tied in the manner prescribed by subregulation 4.

247. Regulation 1142 of the principal Regulations is revoked and the following substituted therefor:

1142. Where a secondary service line requires more than 1 pole, the line shall not be dead-ended on a building other than a house, barn or shed to which a dead-end rack of a type shown in Specification 31 or 32 can be attached to the timber framing by 2 machine bolts of at least $\frac{1}{2}$ inch diameter backed by washers.

248. Clauses *a* and *b* of regulation 1158 of the principal Regulations are revoked and the following substituted therefor:

- (a) of the rubber-covered, R, RH or RW, type or the thermoplastic-insulated, T, TW or TWH, type; and
(b) not smaller than No. 8 B. & S. gauge copper conductors or No. 6 B. & S. gauge aluminum conductors.

249. Subregulation 2 of regulation 1162 of the principal Regulations is revoked and the following substituted therefor:

- (2) The bonding jumper shall be bonded to the service switch enclosure.

250. Clause *a* of regulation 1164 of the principal Regulations is revoked and the following substituted therefor:

- (a) an insulated single conductor of not less than No. 8 B. & S. gauge; or

251. Subregulation 2 of regulation 1166 of the principal Regulations is revoked and the following substituted therefor:

- (2) Metal guards or conduit shall not be used as protection for the grounding conductor in locations accessible to livestock.

252. Regulation 1172 of the principal Regulations is revoked and the following substituted therefor:

- 1172.(1) Where lightning-conductors are installed on a building, electric wiring not in metal enclosures shall be kept at least 6 feet from the lightning-conductors and where that is not practicable the neutral conductors shall be bonded to the lightning-conductors at the maximum elevation of the wiring.
(2) Where it is not practicable to keep the electric wiring at least 6 feet from the lightning-conductors or to bond the neutral conductors to the lightning-conductors as required by subregulation 1, the service neutrals shall be bonded to the lightning-conductors.

- (3) Metal enclosures of circuit conductors shall where practicable be kept at least 6 feet from the lightning-conductors and where this is not practicable shall be bonded to the lightning-conductors.

253. Subregulations 2 and 3 of regulation 1179 of the principal Regulations are revoked and the following substituted therefor:

- (2) Where service boxes and meters are protected completely against rain and snow they may be installed on verandas.

254. Subregulation 1 of regulation 1181 of the principal Regulations is revoked and the following substituted therefor:

- (1) Where the conductors are run overhead they shall be of hard-drawn or medium-hard-drawn copper.

255. Subregulations 2 and 3 of regulation 1190 of the principal Regulations are revoked and the following substituted therefor:

- (2) Where a service box supplies more than 2 branch-circuits, over-current devices shall be installed on the load side of the main switch or circuit-breaker.
(3) The over-current devices shall be mounted in an approved enclosure separate from that of the main switch or circuit-breaker except that an approved panelboard may be used in which the main switch or circuit-breaker is in the same enclosure with the branch-circuit over-current devices.

256. Clause *c* of subregulation 3 of regulation 1191 of the principal Regulations is revoked and the following substituted therefor:

- (c) by any other means permitted by an inspector.

257. Subregulation 3 of regulation 1192 of the principal Regulations is revoked and the following substituted therefor:

- (3) The neutral conductor of the branch-circuit shall not be used as a grounding conductor without the permission of an inspector designated by the Commission for the purpose of this subregulation.

258. Subregulation 3 of regulation 1194 of the principal Regulations is amended by striking out "head" in the last line and inserting in lieu thereof "fitting".

259. Clause *c* of regulation 1195 of the principal Regulations is revoked and the following substituted therefor:

- (c) by any other method permitted by an inspector.

260. Subregulation 4 of regulation 1197 of the principal Regulations is revoked and the following substituted therefor:

- (4) Where an inspector permits the installation of metal conduit or armoured-cable, a metal box and fittings shall be used.

261.(1) Subregulation 1 of regulation 1199 of the principal Regulations is amended by inserting after "non-metallic sheathed cable" in the first line "other than NMW type".

- (2) Subregulation 2 of regulation 1199 of the principal Regulations is amended by inserting after "non-metallic sheathed cable" in the first line "other than NMW type".

262. Regulation 120 of the principal Regulations is revoked and the following substituted therefor:

1200. Non-metallic sheathed cable other than NMW type shall not be installed in root-houses.

263. Regulation 1201 of the principal Regulations is amended by inserting after "non-metallic sheathed cable" in the first line "other than NMW type".

264. Regulation 1204 of the principal Regulations is revoked and the following substituted therefor:

1204. Receptacles installed in stables, barns and outbuildings shall be of the 3-pole type specified by subregulation 1 of regulation 198.

265. Part XXIX of the principal Regulations is revoked and the following substituted therefor:

PART XXIX

ELECTRICAL WIRING AND EQUIPMENT IN STORAGE AND ANAESTHETIZING AREAS IN HOSPITALS

1205. This Part shall apply to electrical installations and electrical equipment in storage and anaesthetizing areas in hospitals and shall be supplementary to and not exclusive of any other Part.

1206. In this Part

(a) "storage area" means any room in which combustible anaesthetics or disinfectants are stored;

(b) "anaesthetizing area" means any area of a hospital where combustible anaesthetics are administered to patients;

(c) "combustible anaesthetic" means a mixture of cyclopropane, divinyl ether, ethyl chloride, ethyl ether, ethylene, vinethene or vinyl ether, with air, oxygen, or nitrous oxide.

1207.(1) Electrical wiring and equipment in storage areas shall conform to the requirements for Class I, Division 1, Hazardous Locations under Part XIII.

(2) The air in every storage area shall be changed at least twice an hour by means of the force of gravity exhausting the air from the area to the exterior of the building.

1208. Fixed electrical wiring and equipment in anaesthetizing areas

(a) installed within 5 feet above the floor shall conform to the requirements for Class I, Division 1, Hazardous Locations under Part XIII;

(b) installed more than 5 feet above the floor shall conform to the requirements of Part III, but fixed devices, appliances, fixtures or equipment incorporating sliding contacts, arcing or sparking parts and over-current protective devices shall be

(i) totally enclosed, or

(ii) so constructed as to prevent the falling of hot particles.

1209.(1) Surgical lighting fixtures suspended from the ceiling in anaesthetizing locations shall be so installed that

(a) in any position of use, sliding contacts and arcing or sparking parts do not extend to within 5 feet of the floor;

(b) the light source is suitably protected against mechanical injury;

(c) boxes, box assemblies or fittings used with the fixtures are supported so that the support will not become disengaged from its fastening when adjustments are made to the fixture;

(d) the fixtures are suspended by suitable rigid stems or other approved means:

(e) where the rigid stems are longer than 12 inches flexibility is provided by means of a fitting or flexible connector approved for the purpose installed not more than 12 inches from the point of attachment to the supporting box or fitting.

(2) Boxes, box assemblies or fittings used with the fixtures shall be approved for the purpose.

(3) Where integral or appended switches are used they shall be approved under Part XIII for Class I, Group C locations.

1210. Service equipment, switchboards or panel-boards shall not be installed in storage areas or anaesthetizing areas.

1211. The exposed non-current-carrying metal parts of all electrical equipment shall be grounded.

1212. Wherever bonding is necessary bonding jumpers with copper fittings or other approved means shall be used and the lock-nut bushing or double-lock-nut types of contact shall not constitute proper bonding.

1213. Control devices, motor controllers, thermal cutouts, switches, relays, auto-transformer switches and contactors, resistance and impedance devices and all other apparatus which tends to create arcs, sparks or high temperatures shall not be installed unless they are approved under Part XIII for Class I, Group C locations.

1214. Every receptacle and attachment plug installed within 5 feet above the floor shall conform to the requirements of regulation 713 and shall be a part of

(a) a unit device having an explosion-proof interlocking switch arranged so that the plug cannot be withdrawn or inserted when the switch is in the "ON" position, and the switch cannot be turned "ON" until the plug is securely inserted, or

(b) an approved device in which the current is broken in an explosion-proof enclosure before the plug can be removed from the receptacle.

1215. No switch installed within 5 feet above the floor shall be used unless it is approved as a complete assembly for a Class I, Group C hazardous location under Part XIII.

1216.(1) Lamps installed in a fixed position within 5 feet above the floor shall be enclosed in a manner approved for use in explosive atmospheres.

(2) Where the lamps are exposed so that breakage may occur they shall be protected by substantial metal guards or other approved means.

1217. Lamps of the pendent type shall not be installed unless
- they are supported by and supplied through hangers of rigid conduit, or
 - their flexibility is ensured by the use of a fitting or flexible connector in conformance with subregulation 2 of regulation 710.
1218. Film-viewing boxes installed within 5 feet above the floor
- shall be approved for a Class I, Group C hazardous location under Part XIII; or
 - shall be of a type which excludes the atmosphere of the room from the box.
1219. Where all or part of the apparatus and equipment of a signalling or communication system is installed within 5 feet above the floor it shall conform to the requirements of regulation 715.
1220. Every flexible cord used with portable lamps or portable electrical appliances shall
- conform to the requirements of regulation 712,
 - be continuous and without switches from the appliance to the attachment plug, and
 - be of sufficient length to reach any position where the portable lamp or appliance is to be used.
1221. All portable electrical equipment shall be provided with a storage device wherein the shortest radius of bend to which the cord may be subjected is 3 inches.
1222. Every piece of suction, pressure or insufflation equipment shall be of a type approved for use in explosive atmospheres unless
- it is of the aspirator type, and
 - operated by compressed air or water jet.
1223. Suction apparatus shall be provided with means for liberating exhaust gases so that the gases are dispersed without making contact with a possible source of ignition.
- 1224.(1) X-ray equipment shall be provided with an approved method of eliminating electrostatic accumulation.
- Control devices and switches used for X-ray equipment shall conform to the requirements of regulations 707 and 708.
1225. Every receptacle and attachment plug on a low-voltage circuit shall be of a type which does not permit connection with circuits of higher voltage.
266. The principal Regulations are amended by adding thereto the following Parts:
- PART XXX**
- OUTDOOR FLOODLIGHTING INSTALLATIONS**
1226. This Part shall apply to that portion of a permanent installation of outdoor floodlights which is connected on the load side of the service equipment, where the floodlights are
- mounted on poles and the wattage of the lamps is 300 watts or more, and shall be supplementary to and not exclusive of any other Part.
1227. In this Part "pole" includes tower.
1228. Mogul-base lamp-holders shall be used on floodlighting installations.
1229. Authorized persons may replace lamps but all other maintenance work shall be done by qualified persons.
1230. Where electrical equipment intended for installation indoors is used it shall be installed in a weather-proof enclosure acceptable to an inspector.
- 1231.(1) Underground wiring shall be
- run as M.I. copper-clad cable or aluminum-sheathed cable with suitable corrosion-resistant protection; or
 - of the TW, TWH, TWU, RW, RWU or USE types or lead-covered cable run
 - in rigid steel conduit, or in aluminum conduit where there is suitable protection against corrosion, or
 - in non-metallic underground conduit.
- (2) Underground wiring buried directly in the earth shall be of the TWU, RWU or USE types, armoured-cable type ACL, lead-covered cable, M.I. copper-clad cable or aluminum-sheathed cable with suitable corrosion-resistant protection and shall be provided with
- mechanical protection above the conductors consisting of creosoted planking, a layer of concrete or other acceptable material, and
 - where in rocky or stony ground, a layer of sand at least 3½ inches deep both above and below the conductors.
- (3) Underground wiring shall be mechanically protected where it enters and leaves underground runs to ensure that it will not be injured by ground movements caused by frost.
- 1232.(1) All electrical equipment on the pole shall be controlled by one switch which can be locked in the "OFF" position.
- Each pole shall be provided with a prominent sign warning persons against climbing the pole until the switch is in the "OFF" position, unless all conductors and live parts other than those used for pole-top wiring are guarded against accidental contact
 - by the conductors being run in rigid or flexible metal conduit,
 - by the conductors being run up inside of steel poles,
 - by the conductors and live parts being at least 3 feet distant from the ladder or steps,
 - by the provision of barriers between the conductors and live parts, and the ladder, adequate to prevent contact by the climber, or

- (e) by the conductors being M.I. copper-clad cable or aluminum-sheathed cable.
- (3) Conductors run up inside of steel poles shall be so supported as to prevent injury to the conductors and undue strain on the conductors where they leave the pole.
- (4) Where vertical conductors, cables and grounding conductors are within 8 feet of locations accessible to unauthorized persons they shall be provided with a protective covering providing adequate mechanical protection.
- (5) Where grounding conductors from lightning arresters are mounted on wooden poles the protective covering referred to in subregulation 4 shall consist of wood moulding or other insulating material providing equivalent protection.
- 1233.(1) Where there is more than one branch-circuit on a pole top the feeders shall be run to a distribution panelboard which shall be weather-proof or installed in a weather-proof enclosure.
- (2) The panelboard required by subregulation 1 is not required where
 - (a) there are two only branch-circuits on a 115/230 volt circuit with a common neutral conductor, and
 - (b) there are three only branch-circuits on a 120/208 volt 3-phase 4-wire circuit.
- 1234. Pole-top branch-circuits shall be fused at not more than 100 amperes.
- 1235. Pole-top branch-circuit wiring, other than leads, shall be approved with the floodlight to which they are connected and shall be run
 - (a) as lead-covered cable, or the rubber-insulated R, RH or RW type or the thermoplastic-insulated T, TW or TWH type cable installed in rigid conduit;
 - (b) as insulated or uninsulated open wiring provided that
 - (i) the wiring is supported on suitable insulators,
 - (ii) the wiring is controlled by a switch capable of being locked in the "OFF" position, and
 - (iii) the pole is provided with a prominent sign warning persons against climbing the pole unless the switch is in the "OFF" position; or
 - (c) as M.I. copper-clad cable or aluminum-sheathed cable.
- 1236. Open taps and joints may be made in pole-top open wiring provided the joint or tap is insulated with insulation equivalent to the insulation on the conductors joined, but there shall be no joints or splices concealed within conduit.
- 1237.(1) Where transformers are mounted on floodlight poles
 - (a) all live parts shall be guarded in conformance with regulation 1232;
 - (b) the bottoms of the transformers shall be at least 16 feet above that grade level which is accessible to unauthorized persons.
- (2) Where transformers are located on platforms on the ground they shall be surrounded by a suitable metallic or wooden fencing which meets the requirements of regulation 1017a.
- 1238. Every transformer shall have the over-current protection required by Part IX and Part XXIV.
- 1239.(1) Where switches controlling floodlights are installed on the primary side of a transformer they shall be capable of making and interrupting the full load current of the transformer.
- (2) Where switches controlling floodlights are installed on the secondary side of a transformer they shall have an ampere rating of at least 125 per cent of the full load ampere rating of the floodlights.
- (3) Switches shall be adequately guarded or remotely operated so that they are operated without exposing the operator to the risk of contact with live parts.
- (4) All switches shall be capable of being locked in the "OFF" position.
- 1240.(1) Wiring systems operating at potentials of 300 volts or less between conductors shall be grounded in accordance with Part VII.
- (2) The supply authority or an inspector may require the grounding of wiring systems operating at potentials of 300 volts or more.
- (3) Grounding conductors shall meet the requirements of regulation 457.
- 1241. The secondary grounded circuit conductor may be grounded by an interconnection to the primary grounded circuit conductor, provided the primary grounded circuit conductor is grounded at the transformer and interconnection is made only at the transformer.
- 1242.(1) Non-current-carrying metal parts of installations located within 8 feet of areas accessible to unauthorized persons shall be grounded.
- (2) Non-current-carrying metal parts of electrical equipment at the pole top other than isolated metal parts shall be bonded together, and where they are within reaching distance of any grounded metal shall be grounded.
- (3) Non-current-carrying metal parts of electrical equipment bonded together may be grounded to the grounded circuit conductor provided there is not more than one point of interconnection on each pole.
- (4) The size of the grounding conductor and the bonding conductor shall be ascertained in accordance with regulation 460.
- 1243. Lightning arresters installed on a floodlight installation shall meet the requirements of regulations 477 and 478 but a common grounding conductor and a common electrode system may be used for grounding primary and secondary neutrals and lightning arresters.
- 1244. Floodlights, secondary wiring, conduit fittings, and distribution panelboards shall be approved for the installation, and other pole top equipment shall be acceptable to an inspector.

1245. Where it is necessary to climb the pole to replace lamps permanent climbing steps shall be provided, the lowest permanent step of which shall be not less than 12 feet from the base of the pole and otherwise out of reach.
1246. Where floodlights are mounted more than 30 inches from the centre line of the pole suitable safety platforms equipped with a railing or similar device shall be provided for the protection of persons replacing the lamps.

PART XXXI

FIXED ELECTRIC SPACE-HEATING SYSTEMS

1247. This Part shall apply to the installations of fixed electrical radiant-heating equipment and shall be supplementary to and not exclusive of any other Part.
1248. In this Part
- (a) "fixture" means any electrical radiant-heating unit, or group of units so assembled as to form a complete unit, which when installed is readily accessible without removing or damaging any part of the building structure;
 - (b) "cable" means a heating conductor intended to be buried in or concealed behind concrete, plaster or other finished surface and includes the non-heating leads connected thereto; and
 - (c) "heating area" means the heat-conducting medium adjacent to
 - (i) the cable, or
 - (ii) the heating element of the fixture.
1249. Radiant-heating equipment shall not be installed in those locations classified as hazardous locations under Part XIII or in locations where it is subject to damp or corrosive atmosphere, unless it is approved and marked for the particular location.
1250. Connections to cables and fixtures shall be made in terminal fittings or boxes and the equipment shall be so installed that the connections between branch-circuit conductors and equipment conductors are accessible without disconnecting any part of the wiring.
1251. Branch-circuit conductors supplying cables and fixtures shall have a current-carrying capacity not less than that of a No. 14 B. & S. gauge copper conductor.
1252. (1) Branch-circuits supplying cables and fixtures shall be used for no other purpose.
- (2) Each branch-circuit shall be provided with manually-operable devices whereby all ungrounded conductors of the circuit may be disconnected simultaneously at the point of supply.
1253. (1) Temperature-control devices shall have a current-rating at least equal to the sum of the current-ratings of the equipment they control.
- (2) Single-pole thermostatic devices may be used only on single-phase branch-circuits which are supplied from a grounded neutral system in which the voltage to ground does not exceed 150 volts.
1254. Two or more fixtures or cables may be grouped on a single branch-circuit provided that the sum of the ratings of all the fixtures and cables so grouped does not exceed 1.5 kilowatts at a voltage of 110 volts and the circuit is protected by over-current devices rated or set at not more than 15 amperes.
1255. Each fixture having a rating of 1.5 kilowatts or more, at a voltage of 110 volts shall be separately supplied from a branch-circuit of proper capacity.
1256. In residential premises including apartment buildings
- (a) branch-circuits which supply energy to fixtures shall be protected by over-current devices rated or set at not more than 30 amperes;
 - (b) the maximum load which may be connected to the branch-circuits referred to in clause a shall be 5 kilowatts; and
 - (c) the voltage of any feeder supplying energy to fixtures or cables shall not exceed 150 volts to ground.
1257. Recessed fixtures shall be installed in accordance with regulations 591 and 603.
1258. (1) Cables shall be manufactured in continuous lengths.
- (2) Each cable unit shall be approved as a continuous assembly which shall have permanent markings not over 3 inches from each end of the heating portion of the cable indicating
 - (a) the manufacturer's name,
 - (b) the catalogue number, and
 - (c) the cable rating in volts and watts or volts and amperes.
 - (3) The non-heating leads shall have a distinctive colouring to indicate the voltage for which the cable is approved.
 - (4) The colouring referred to in subregulation 3 shall be
 - (a) yellow for 120 volts,
 - (b) blue for 210 volts, and
 - (c) red for 230 volts.
1259. (1) Cables shall be so installed that they are not in any way damaged during installation.
- (2) The entire length of the cable shall be installed within the heating area.
 - (3) Shortened lengths of the heating portion of the cable shall not be installed.
 - (4) Splices shall not be made in cables, other than those made by the manufacturer to secure the heating portion of the cable to the non-heating leads.
 - (5) Any cable which does not retain the markings and colour prescribed by regulation 1258 shall be deemed to have been shortened unless it is demonstrated to the satisfaction of an inspector that the characteristics of the approved cable remain unchanged.
1260. The insulation on the cable shall be approved for the voltage rating of the cable and the temperature at which it operates.

1261. Branch-circuits which supply energy to cables shall be protected by over-current devices rated or set at not more than 15 amperes.
1262. Cables shall be so designed and installed that
- (a) the heating portion of the cable does not operate at a temperature exceeding 90 degrees centigrade or 194 degrees Fahrenheit;
 - (b) the non-heating leads do not operate at a temperature exceeding 60 degrees centigrade or 140 degrees Fahrenheit;
 - (c) the total wattage of cables installed in any heating area shall not exceed 25 watts per square foot over any part of the area; and
 - (d) they are kept separate from each other by a distance of at least 1½ inches.
- 1263.(1) Cables shall not
- (a) be installed in or behind any wall or in any other location where they are subject to mechanical injury either during or after installation;
 - (b) be run closer than 8 inches to
 - (i) any lighting fixture outlet, or
 - (ii) any outlet to which heat-producing electrical equipment is connected and used in the immediate vicinity of the outlet; or
 - (c) be installed in or concealed behind any surface having wood lath, wood paneling or similar combustible material.
- (2) The heating portion of cables shall not be run through walls, partitions or similar structures.
- 1264.(1) Cables to be installed in cement or plaster shall be secured in place on the cement base or the undercoat at intervals not exceeding 2 feet.
- (2) Cables may be secured by
- (a) adhesive tape, cotton tape, or other similar means acceptable to an inspector, or
 - (b) staples driven directly over the cable provided the staples used
 - (i) are acceptable for the purpose, and
 - (ii) are fastened by means of a driving device which will not damage the cable.
- (3) Materials used in securing the cable shall be suitable for the temperatures at which the cable operates.
- (4) Cables shall be installed so as to ensure a minimum clearance of 1 inch from any combustible or conductive material.
- 1265.(1) Cables installed in spaces between joists in ceilings or attics shall be attached to adequate supports at the level of the lower face of the joists.

- (2) The heating portion of the cable shall be run parallel to the joists with a separation of at least 1 inch from any combustible material.
 - (3) Where it is necessary for the heating portion of the cable to cross from one space to another the cables shall be run through the joists in sleeves of non-combustible non-absorptive material securely fastened in place not more than 1 inch above the lower face of the joist.
 - (4) In no case shall the heating portion of the cable be installed more than 1 inch above the ceiling finish.
 - (5) The heating portion of the cable shall not be run in or through any thermal insulation.
 - (6) The heating portion of the cable shall be covered with at least ½ inch of sand or equivalent heat-radiating material.
1266. In any area where cable is installed thermal insulation of the inert incombustible non-conducting type approved for the location only may be used.
- 1267.(1) Non-heating conductors supplying cables shall, subject to subregulation 2, be run in metal race-way or flexible tubing.
- (2) In underfloor installations the conductors shall be run from the cable to the box or terminal fitting required by regulation 1250 in rigid conduit which
- (a) shall have a bushing or equivalent fitting at its upper and lower end, and
 - (b) shall terminate at its lower end in a 90-degree bend.
- 1268.(1) Where radiant-heating installations are controlled by automatic-thermostatic-control devices
- (a) conductors used solely as feeders for the heating installation shall be of sufficient capacity to carry a load in amperes not less than that computed by applying to the maximum heating load shown in column 1 of Table 23A the minimum demand factor prescribed in column 2 of the table;
 - (b) conductors used as feeders for the heating installation and other electrical equipment shall be of sufficient capacity to carry a load in amperes calculated in accordance with clause a plus the combined loads of the other electrical equipment calculated in accordance with Part IV.
- (2) Where automatic-thermostatic-control devices are not installed the demand factor for heating loads shall be 100 per cent.

TABLE 23A (regulation 1268)	
Column 1	Column 2
Maximum Connected Heating Load in Kilowatts	Minimum Demand Factor
0 — 10	100%
11 — 15	85%

PART XXXII

INDUCTION AND DIELECTRIC HEATING EQUIPMENT

1269. This Part shall apply to installations of induction and dielectric heating equipment and shall be supplementary to and not exclusive of any other Part.
1270. In this Part
- (a) "generating equipment" means the equipment used to change the voltage, the frequency or both the voltage and the frequency of power used to supply induction and dielectric heating equipment;
 - (b) "motor-generator equipment" means equipment wherein a motor drives the generating equipment;
 - (c) "stand-by current" means the current which the equipment consumes when it is connected to the supply but is not supplying power to the work applicator; and
 - (d) "therapeutic equipment" means equipment the out-put frequency of which is not less than 2 mega-cycles per second.
- 1271.(1) Branch-circuits supplying the generating equipment and motor-generator equipment shall comply with Parts I, III, IV and V.
- (2) Branch-circuits, generating equipment and motor-generator equipment operating at more than 750 volts shall comply with Part XXIV.
- 1272.(1) The conductors which supply the generating equipment of individual installations of induction or dielectric heating equipment shall have a current-carrying capacity of at least 100 per cent of the nameplate current-rating of the equipment.
- (2) The conductors which supply the generating equipment of two or more installations of induction or dielectric heating equipment shall have a current-carrying capacity of at least 100 per cent of the sum of the nameplate current-ratings of the equipment, except that where two or more installations are supplied from the same feeder and simultaneous operation of the installations is impossible the feeder shall have a current-carrying capacity of at least 100 per cent of the sum of the nameplate current-ratings of the units capable of simultaneous operation plus 100 per cent of the stand-by current of the remaining equipment.
1273. Over-current devices rated or set at not more than 200 per cent of the nameplate current-rating of induction or dielectric generating equipment shall be provided for the equipment.
- 1274.(1) A readily accessible disconnecting means shall be provided to isolate the generating equipment or motor-generator equipment from the supply circuit.
- (2) The current-carrying capacity of the disconnecting means shall be at least 100 per cent of the nameplate current-rating of the equipment.
- (3) Where a supply circuit supplies only one installation of induction or dielectric heating equipment the supply circuit switch may be used as the generating equipment or motor-generator equipment disconnecting means.
1275. Every out-put circuit including all high frequency component parts of the heating equipment shall be guarded with the actual generating equipment as one complete assembly so that
- (a) the work applicator is so guarded by protective cages, adequate shielding or equivalent devices that safe operation of the heating equipment is assured, and
 - (b) when the connections between the generating equipment and the work applicator exceed 2 feet in length the connections are enclosed or guarded with non-combustible material.
1276. The generating equipment out-put circuit shall be directly connected to ground.
1277. Induction and dielectric heating equipment shall not be installed in those locations classified as hazardous locations under Part XIII unless the equipment is designed and approved for use therein.
1278. Panels on which controls are mounted shall be of the dead-front type.
1279. Enclosures shall be provided and so constructed that
- (a) parts operating at potentials of more than 30 volts are not readily accessible;
 - (b) parts operating at 31 to 750 volts are not accessible through doors, panels or covers unless
 - (i) a key or tool is required to open doors, panels or covers and there is attached thereto a caution reading "Disconnect supply circuit before opening", or
 - (ii) shields or barriers are provided so that all operating adjustments may be made and controls may be reached without access to live parts; and
 - (c) parts operating at potentials of more than 750 volts are not accessible through doors, panels or covers unless they are provided with interlocks which remove all potentials of over 30 volts when the doors are open.
1280. Where enclosures contain voltages in excess of 250 volts alternating-current or direct-current, warning labels indicating danger shall be attached to the doors, access panels or at another convenient place on the equipment in addition to the caution required by sub-clause (i) of clause b of regulation 1279.
1281. Switches operated by foot pressure shall be adequately shielded to prevent inadvertent closing.
1282. Where remote controls are used to apply power a local-remote switch shall be provided and interlocked to prevent the application of power from other than the selected control point.
- 1283.(1) Where portability is not essential the heating equipment shall be permanently installed.
- (2) Where portability is essential the power supply cord shall be a 3-conductor cord, of the SJ type or better, having a current-carrying

capacity at least equal to the marked rating of the equipment and shall be provided with an approved 3-prong attachment plug cap.

- (3) Where the equipment is rated at 115 volts, 15 amperes or less and is intended for use in offices or homes a 2-conductor cord of the type permitted by subregulation 2 and a 2-prong parallel-blade cap may be used as an alternative to the cord and cap required by subregulation 2.

PART XXXIII

SOUND-RECORDING AND REPRODUCTION

- 1284. This Part shall apply to installations of electrical equipment and wiring used for sound recording and reproduction, centralized distribution of sound, public systems, voice recording systems and electronic organs and shall be supplementary to and not exclusive of any other Part.
- 1285.(1) Conductors of different wiring systems may be grouped in the same enclosure, or in the same flexible cord or cable, provided
 - (a) supply conductors are properly identified and used solely for the supply of power to the equipment to which the conductors so grouped are connected;
 - (b) input leads to a motor-generator or rotary-converter are run separately from the out-put leads;
 - (c) the flexible cords and cables are of types S, SJ, K, P or other types approved for the purpose;
 - (d) terminals for conductors are marked to show what their connections are; and
 - (e) terminals for conductors other than power-supply conductors are separated from the terminals of the power-supply conductors by a spacing at least as great as that between the power-supply terminals.

- (2) Where the conductors are grouped in accordance with subregulation 1 and are not separated by a lead sheath or other continuous metallic covering, they shall be insulated individually or in groups by insulation at least equivalent to that on the supply conductors.

- (3) The conductors grouped in flexible cords may be as small as No. 26 B. & S. gauge provided they are not in direct electrical connection with the power-supply conductors and are equipped with current limiting means so that the maximum power which they carry can never exceed 150 watts.

- 1286. Storage batteries shall comply with the requirements of regulations 538 to 542, both inclusive.

267. Table 1 of the principal Regulations is amended by adding thereto the following item:

4a	Heat-and-moisture-resisting thermoplastic.	TWH	75	167
----	--	-----	----	-----

268.(1) The heading for column 3 of Table 9 of the principal Regulations is amended by adding "and Thermoplastic type TWH".

(2) The heading for column 6 of Table 9 of the principal Regulations is amended by striking out "VC" and substituting therefor "V".

269.(1) The heading for column 3 of Table 11 of the principal Regulations is amended by adding "and Thermoplastic type TWH".

(2) The heading for column 5 of Table 11 of the principal Regulations is amended by striking out "VC" and substituting therefor "V".

(3) Column 2 of Table 11 of the principal Regulations is amended by striking out the figure "95" and substituting therefor the figure "100".

270.(1) The heading for column 2 of Table 18 of the principal Regulations is amended by adding "FF-32" after "RF-32".

Applications to Parliament Private Bills

PUBLIC NOTICE

LEGISLATIVE ASSEMBLY OF ONTARIO

The attention of Municipal Officials, Solicitors and all other persons who may be interested in the preparation of Private Bills for submission to the Legislative Assembly of Ontario is directed particularly to the following Rules of the House governing the submission of such Bills:

RULES RE SUBMISSION OF PRIVATE BILLS

63.—(1) No petition for any Private Bill is received by the House after the first two weeks of each Session nor may any Private Bill be presented to the House after the first three weeks of each Session; nor may any report of any Standing or Select Committee upon a Private Bill be received after the first six weeks of each Session and no motion for the general suspension or modification of this Rule shall be entertained by the House unless after reference made thereof, at a previous sitting of the House, to the several Standing Committees charged with the consideration of Private Bills upon Report submitted by two or more of such committees.

64.—(1) Any person desiring to obtain a Private Bill shall deposit with the Clerk of the House at least eight (8) days before the meeting of the House a copy of such Bill together with a fee of \$150, and if such Bill is not deposited by that time the applicant shall pay \$10 for each and every day which intervenes between the said eighth day and the date of the filing of the Bill.

(2) After the first reading of the Bill and before its consideration by the Committee to which it is referred, the applicant in every case shall pay the cost of printing the Act in the Statutes.

(3) The following charges shall also be levied and paid in addition to the foregoing:

(a) When any rule of the House is suspended with reference to a Bill or the Petition therefor, for each suspension, \$50.

(b) When a Bill is presented to the House after the first three weeks of the Session and before the end of the fourth week, \$75.

(c) When a Bill is presented after the fourth week of the Session, \$100.

(4) In case of any Bill incorporating a company or increasing the capital stock of a company already incorporated, there shall be paid to the Clerk of the House, by or on behalf of the applicant, before the same is reported to the House, the same fee as would be payable to the Provincial Secretary in the case of an incorporation or increase of capital under the provisions of The Ontario Companies Act, less the sum of \$150 already paid to the Clerk of the House.

(5) When a Bill is for the purpose of confirming by-laws, bonds, debentures or other securities, or authority is asked to borrow money or to increase borrowing powers, the following additional fees shall be paid according to the amount of money involved:

On amounts less than \$10,000, \$25; on amounts over \$10,000 and up to \$25,000, \$50; on amounts over \$25,000 and up to \$40,000, \$75; on amounts over \$40,000 and up to \$75,000, \$100; on amounts over \$75,000 and up to \$125,000, \$125; on amounts over \$125,000 and up to \$175,000, \$150; on amounts over \$175,000 and up to \$250,000, \$200; on amounts over \$250,000 and up to \$350,000, \$250; and an additional fee of \$50 for every \$100,000 over \$350,000.

66. All applications for Private Bills properly the subject of legislation by the Legislative Assembly of Ontario, within the purview of "The British North America Act, 1867," shall require a Notice, clearly and distinctly specifying the nature and object of the application and, where the application refers to any proposed work, indicating generally the location of the work, and signed by or on behalf of the applicants, such Notice to be published as follows, viz.:

A notice inserted in THE ONTARIO GAZETTE and in one newspaper published in the Municipality affected, or if there be no newspaper published therein, then in a newspaper in the next nearest municipality in which a newspaper is published.

Such notice shall be continued in each case for a period of at least six weeks, during the interval of time between the close of the next preceding Session and the consideration of the Petition.

If the application is by a Municipal Corporation for authority to issue debentures the notice shall set out the particulars of the existing debenture debt and the amount of rateable property of the Municipality according to the last revised assessment roll of the Corporation, and in brief and general terms, the object for which the new issue of debentures is required.

67. Before any Petition praying for leave to bring in a Private Bill for the erection of a Toll Bridge is received by the House, the person or persons intending to petition for such Bills shall, upon giving the Notice required by preceding Rule, also, at the same time and in the same manner, give Notice of the rates which they intend to ask, the extent of the privileges, the height of the arches, the interval between the abutments or piers for the passage of rafts and vessels, and mentioning also whether they intend to erect a drawbridge or not, and the dimensions of the same.

68. Before any Petition praying for leave to bring in a Bill for the construction of Railways, Tramways or canals is received by the House, the person or persons petitioning for such Bill shall deposit with the Clerk the following documents:

1. A map or plan upon a scale of not less than half an inch to the mile, showing the location upon which it is intended to construct the proposed work, and showing also the line of existing or authorized works of a similar character within, or in any way affecting the district or any part thereof which the proposed work is intended to serve. Such map or plan to be signed by the Engineer or other party making the same.

2. A book of reference in which shall be clearly set out the following information in separate schedules, namely:

SCHEDULE A.—The name of each municipality within which the proposed works or any part thereof are intended to be constructed; the population of each such municipality as returned by the next preceding census, the rateable value of the property within each such municipality, as returned by the next preceding assessment rolls thereof; and this schedule may contain in a separate statement similar information as to the adjoining districts intended to be served by the proposed work.

SCHEDULE B.—A general description of the nature, extent and proposed character of the contemplated works, and an estimate of the probable cost thereof, distinguishing the general items of construction and the cost thereof respectively, as well as the nature, extent and probable cost of all engines and car stock or other outfit or equipment necessary to the use and operation of the proposed undertaking, such schedule to be signed by the Engineer, or other person preparing the same.

SCHEDULE C.—An exhibit showing the total amount of capital proposed to be raised for the purposes of the undertaking and the manner in which it is proposed to raise the same, whether by ordinary shares, bonds, debentures or other securities, and the amounts of each respectively.

SCHEDULE D.—An estimate of the probable revenues of the proposed undertaking showing the sources whence the same are expected to be derived; the annual earnings thereof respectively; the probable annual cost of operation or working expenditure, and the annual net revenue applicable to the payment of interest on the proposed investments, such schedules to be signed by the person preparing the same.

72. When any Bill for confirming any Letters Patent, or Agreement, is presented to the House, the copy of such Letters Patent, or Agreement, shall be attached to it.

74. Every Private Bill, when read a first time shall unless it be an Estate Bill or a Bill providing for the consolidation of a floating debt or for the consolidation or renewal of debentures (other than local improvement debentures) of a Municipal Corporation, shall stand referred to the proper Standing Committee, and all petitions before the House, for or against the Bill, are considered referred to such Committee.

75. Every Private Bill, in so far as it provides for the consolidation of a floating debt or for the consolidation or renewal of debentures (other than local improvement debentures) of a Municipal Corporation when a Bill has been read the first time, shall, without special reference, stand referred to The Ontario Railway and Municipal Board for their report; and a copy of such Bill and of the Petition on which the same is founded shall be forthwith transmitted by the Clerk of the House to the Board, in order that the Board may, after an inquiry into the allegations set out in the Bill, and into any other matters which the Board may deem necessary in connection therewith, report to the House whether or not it is reasonable that such Bill or part thereof relating to the matters aforesaid shall be passed; and what alterations, if any, should be made in the same, and the Board shall make such inquiry accordingly and shall sign the same; and the said Report, Bill and Petition shall be transmitted to the Clerk, and the Report shall be read by the Clerk at the Table and shall be entered on the Journals of the House, and the Bill, together with the Report, shall stand referred to the Standing Committee on Private Bills.

76. Every Estate Bill, when read a first time shall without special reference, stand referred to the Commissioners of Estate Bills, for their Report, and a copy of such Bill, and of the Petition on which the same is founded, shall be forthwith transmitted by the Clerk of the House to the said Commissioners, or one of them, in order that they, or any two of them, may, after perusing the Bill, without requiring any proof of the allegations thereof, report to the House their opinion thereon under their hands; and whether presuming the allegation contained in the preamble to be proved to the satisfaction of the House, it is reasonable that such Bill do pass into a law; and whether the provisions thereof are proper for carrying its purposes into effect, and what alterations or amendments, if any, are necessary in the same, and in the event of their approving the said Bill they are to sign the same; and the said Report, with the said Bill and Petition, are to be transmitted by the said Commissioners to the Clerk; and the Report shall be read by the Clerk at the Table and shall be entered on the Journals of the House; and the Bill, together with the report shall stand referred to the Standing Committee on Private Bills, which is not to consider the said Bill, before the delivery of the said Report, Bill and Petition to the Chairman of the said Committee.

77. In the event of the Commissioners of Estate Bills reporting that, in their opinion, it is not reasonable that the Bill submitted to them shall pass into law such Bill shall not be further considered.

RODERICK LEWIS
Clerk of Legislative Assembly
of Ontario.

TREASURER'S SALE OF LANDS FOR ARREARS OF TAXES

MUNICIPALITY OF ANSON, HINDON AND MINDEN

BY VIRTUE OF a Warrant issued by the Reeve of the Township of Monmouth and Warden of the Provisional County of Haliburton, bearing the date the fifteenth day of March, A.D. 1958, and to me directed, commanding me to levy upon the several lands mentioned and described in the following list, for arrears of taxes thereon and costs herein as set forth, I hereby give notice that unless such arrears and costs are sooner paid, I shall proceed to sell by Public Auction at the County Court House, Minden, Ontario, the said lands necessary to pay the said arrears and costs on Friday, August 8th, 1958, at the hour of two o'clock in the afternoon. The adjourned sale will be held at the same place and hour on the fifteenth day of August, 1958. It is the intention of the municipalities herein mentioned to purchase at the adjourned sale such lots as do not bring the said taxes and costs.

JAMES McCRAE, Warden.

TREASURER'S SALE OF LANDS FOR TAXES

PROVINCE OF ONTARIO

To Wit:

BY VIRTUE OF A WARRANT issued by the Reeve under the Seal of the Corporation of the Township of Innisfil to me directed, having date the 16th day of April, 1958, commanding me to levy upon and sell the lands mentioned in the following list for arrears of taxes and costs due thereon, I hereby give notice that unless such arrears of taxes and costs are sooner paid I shall, pursuant to the provisions of The Assessment Act, proceed to sell by public auction the said lands, or as much thereof as may be necessary for the payment of the said taxes and costs, at the Community Hall, in the Village of Stroud, on Thursday the 21st of August, 1958, at the hour of two o'clock in the afternoon.

A. G. IRETON,
Treasurer.

THE FARM PRODUCTS MARKETING ACT

O. Reg. 95/58.

Plebiscite of Fresh Peach Producers re existing plan.

New and Revoking O. Regs. 218/57, 274/57 and 14/58.

Made—16th April, 1958.

Filed—16th April, 1958.

REGULATIONS MADE BY THE BOARD UNDER THE FARM PRODUCTS MARKETING ACT

APPLICATION

1. These regulations apply to a plebiscite of producers of fresh peaches on the question of favour of the existing plan.

INTERPRETATION

2. In these regulations

- (a) "Board" means The Farm Products Marketing Board;
- (b) "existing plan" means the plan set out in schedule 1 of Ontario Regulations 127/57;
- (c) "district" means a division of Ontario under subregulation 1 of regulation 4;
- (d) "fresh peaches" means peaches produced in Ontario except peaches which are used by a processor for processing;
- (e) "preliminary voters' list" means the list of voters prepared by the Board, before revision by the Revising Officers;
- (f) "processing" includes canning, dehydrating, freezing, or processing with sugar or sulphur dioxide or any other chemical;
- (g) "processor" means a person engaged in the business of processing of peaches;
- (h) "producer" means a person engaged in the production of fresh peaches; and for the purpose of the plebiscite means the person who is the owner of a property on which fresh peaches are produced, except in the case where
 - (i) the property is rented to a tenant who produces and markets the fresh peaches on his own account, in which case the producer shall be the tenant,
 - (ii) a corporation is engaged in the production of fresh peaches, in which case the producer shall be deemed to be the person, if any, designated in writing in respect of that property by the corporation for the purpose of the plebiscite,

- (iii) the business of producing and marketing fresh peaches is carried on by a partnership or under a trade name, farm name or other designation, in which case the producer shall be deemed to be the person, if any, designated in writing by the owner or one of the owners of such business in respect of that property for the purpose of the plebiscite,

- (iv) the property is owned jointly by two or more persons whose names appear on the voters' list in respect of that property, in which case the producer shall be deemed to be the one of such joint owners who first presents himself at the polling place and receives a ballot in respect of that property,

- (v) the property is held by an executor or a trustee, in which case the producer shall be the executor or trustee;

- (i) "polling place" means a place of voting in a district on the question of favour of the existing plan; and

- (j) "regulations made in respect of the plan" means Ontario Regulations 128/57.

PERCENTAGE OF VOTES REQUIRED UNDER SECTION 4 OF THE ACT

3. Where the Board submits to a plebiscite of the producers of fresh peaches the question of favour of the existing plan for the marketing of fresh peaches, the percentage of votes in favour of the plan shall be not less than 66⅔ per cent of all persons who vote in the plebiscite.

APPOINTMENTS

4.(1) For the purposes of the plebiscite Ontario is divided into the following districts:

- (a) The County of Essex.
- (b) The County of Kent.
- (c) The County of Lambton.

(3) Where a Revising Officer or a Deputy Returning Officer appointed under subregulation 2 is unable for any reason to carry out his duties, the Board shall appoint immediately a person in his stead.

DUTIES OF REVISING OFFICERS

6.(1) The Board fixes the 9th of May, 1958, as the date for revision of voters' lists.

(2) The Revising Officer shall attend at the place of revision mentioned in column 4 of the Table in subregulation 2 of regulation 5 on the 9th of May, 1958, from 9 a.m. until 5 p.m. standard time or daylight saving time, as the case may be, in the local municipality in which the place of revision is located.

(3) The Revising Officer shall post up at the place of revision and in such other locations as he may in his discretion deem advisable, copies of the preliminary voters' list not later than the 6th of May, 1958.

(4) Where a person appears before the Revising Officer and states that his name and place of production are omitted from the voters' list, the Revising Officer

- (a) if he is satisfied that the name of such person has been improperly omitted, or
- (b) if the person furnishes an affidavit that he is a producer within the meaning of these regulations,

shall add the name and address or location of his property on which fresh peaches are produced to the voters' list.

(5) Where a producer satisfies a Revising Officer that the name or place of production of the producer on the voters' list is not correctly recorded, the Revising Officer shall make the necessary corrections in the voters' list.

(6) Where any person furnishes evidence deemed sufficient by the Revising Officer that any name and place of production should not be recorded on the voters' list, the Revising Officer may omit the name from the voters' list, but the Revising Officer shall notify the Board and shall also notify immediately the person whose name has been omitted and inform him of his right of appeal to the Board.

(7) Each Revising Officer shall not later than the 10th of May, 1958, return to the Board the voters' list as revised, accompanied by all affidavits of persons whose names were added and by such statements as he deems necessary for the consideration of the Board in matters of appeal from decisions of the Revising Officer.

APPEALS TO BOARD

7.(1) Any person aggrieved by a decision of a Revising Officer may appeal to the Board at its office in Toronto.

(2) The appeal may be in person or in writing.

(3) The Board fixes the dates of the 14th, 15th and 16th of May, 1958, for the hearing of appeals from decisions of Revising Officers.

(4) The Board may extend the time for the hearing of appeals.

(5) The Board shall hear and consider the appeal and may amend the voters' list in accordance with its findings but the Board shall not omit any name from a voters' list without giving the person an opportunity to show cause why his name should not be omitted.

(6) When the time for appealing has expired, or the Board has heard all appeals from decisions of Revising Officers, the Board shall declare the voters' list complete for the purpose of the plebiscite and no person whose

name does not appear on such voters' list for a district shall be entitled to a vote in that district in the plebiscite.

POLLING

8.(1) The Board fixes the 30th of May, 1958, as the date that polling is to take place.

(2) The polling place shall remain open on the 30th of May, 1958, from 10 a.m. to 7 p.m. standard time or daylight saving time, as the case may be, in effect in the municipality in which the polling place is located.

(3) The Board shall prepare copies of the existing plan, of regulations made in respect of the plan and of these regulations and distribute them not later than the 23rd of May, 1958, to the Returning Officer and the Deputy Returning Officers.

BALLOTS

9.(1) The Board shall cause to be printed a sufficient number of ballots, not less than the number of persons eligible to vote.

(2) The Board shall forward the ballots to the Returning Officer before the polling day.

ARRANGEMENTS FOR VOTING

10. The Board shall provide ballot boxes.

11. The Board shall before the polling day furnish the Returning Officer with sufficient copies of all voters' lists to supply each Deputy Returning Officer with at least two copies of the voters' list for the district of the Deputy Returning Officer.

12. The Returning Officer shall furnish to each Deputy Returning Officer before the polling day

- (a) a sufficient number of ballots, not less than the number of persons eligible to vote in the district of the Deputy Returning Officer,
- (b) at least two copies of the voters' list for his district, and
- (c) such instructions and information as he deems necessary for the taking of the vote.

POSTING OF VOTERS' LIST

13. Each Deputy Returning Officer shall post up in the polling place before the polling day

- (a) one copy of the voters' list for his district, and
- (b) one copy of the existing plan, the regulations made in respect of the plan, and these regulations.

VOTE TO BE SECRET

14. Every vote shall be by secret ballot.

VOTING

15.(1) Each Deputy Returning Officer shall issue only one ballot to each person who

- (a) is eligible to vote, and
- (b) presents himself as a voter at the polling place.

(2) Where a Deputy Returning Officer deems it necessary, he shall require the person who presents himself as a voter to be identified as the person eligible to vote,

16.(1) Each Deputy Returning Officer shall ensure that the ballot box is empty before voting takes place and shall lock it and keep it locked until the time for voting on the polling day has expired.

(2) The Deputy Returning Officer shall, upon satisfying himself that a ballot marked by a voter is the ballot which he issued to the voter, deposit it in the ballot box.

(3) The Deputy Returning Officer shall on one copy of the voters' list mark off the name of every producer to whom a ballot is issued.

(4) Within three days from the polling date the Deputy Returning Officer shall deliver, or send by registered mail, to the Returning Officer

- (a) all ballots deposited in the ballot box during voting,
- (b) one copy of the voters' list marked under subregulation 3, and
- (c) all unused ballots.

17. No producer named on the voters' list shall vote more than once at a polling place.

18. No person shall at any polling place

- (a) cause any disturbance or loiter on the premises; or
- (b) remain on the premises after the Deputy Returning Officer or a peace officer or a constable requests or orders him to leave the premises.

ASSISTANTS FOR DEPUTY RETURNING OFFICERS

19. The Board may engage such persons as the Deputy Returning Officers may require to assist in the taking of the vote.

SCRUTINEERS

20.(1) The Ontario Fresh-peach Growers' Marketing Board and the Fresh Peach Growers Protective Association may appoint not more than two agents to act as scrutineers on polling day at each polling place.

(2) A scrutineer may bring to the attention of the Deputy Returning Officer any matter which he considers improper in the procedures at the poll but shall not interfere with the taking of the vote.

(3) The scrutineers may be present at the counting of the ballots.

RETURNS OF DEPUTY RETURNING OFFICERS

21.(1) Each Deputy Returning Officer shall make a return to the Returning Officer of the result of the vote as soon as possible after all ballots are counted.

(2) The return of a Deputy Returning Officer shall be in form 1.

RETURN OF RETURNING OFFICER

22.(1) The Returning Officer shall make a return to the Board of the result of the vote as soon as possible after all ballots are counted.

(2) The return of the Returning Officer shall be in form 2.

23. Ontario Regulations 218/57, 274/57 and 14/58 are revoked.

THE ASSESSMENT ACT

O. Reg. 102/58.

Payments to Mining Municipalities.
New and Revoking O. Regs. 197/52,
44/55, 205/55, 90/56, 26/57, 104/57,
113/57, 131/57, 271/57, 11/58 and
19/58.

Made—21st April, 1958.

Filed—21st April, 1958.

REGULATIONS MADE BY THE MINISTER UNDER THE ASSESSMENT ACT

PAYMENTS TO MINING MUNICIPALITIES

INTERPRETATION

1. In these regulations

- (a) "adjusted mill rate" means the number of mills in the dollar determined by dividing the total of all estimates approved for grant purposes in respect of a municipality for the preceding year by the total of the municipal mines-assessment and the equalized assessment of the municipality for the same year;
- (b) "total of all estimates approved for grant purposes" in respect of any municipality for any specified year means
- the total amount which would have been levied in that year for all purposes of the municipality and its local boards if no mining payment for that year were received, less
 - the portion of the payment for that year computed under clause *a* of regulation 4, and subject to
 - any debit or credit adjustments re capital expenditures out of revenue and deficits as determined by the Department;
- (c) "approval of the Minister" means the approval of the Minister as signified by his signature on estimates, by-laws, resolutions, conveyances and other records and documents;
- (d) "equalized assessment" means the assessment amount determined in accordance with regulation 13;
- (e) "local board" means any school board, public-utility commission, transportation commission, public library board, board of park management, local board of health, board of commissioners of police, planning board or any other board, commission, committee, body or local authority established or exercising any power or authority under any general or special Act with respect to any of the affairs or purposes, including school purposes, of a municipality or of two or more municipalities or portions thereof;

(f) "mining employee" means a person who is in receipt of or entitled to any salary, wages, or other direct compensation for services or labour performed for a mine or mineral work located in Ontario, and who is

(i) resident in a mining municipality at the time of the making of the last assessment of a municipality or

(ii) resident outside of a mining municipality and employed at a mine or mineral work in a mining municipality on the first of October in any year;

(g) "municipality" means a city, town, village, township or improvement district;

(h) "municipal mines-assessment" means 50 per cent of the total of

(i) \$1,600 for each mining employee shown in the register of the preceding year as working and residing in the municipality,

(ii) \$800 for each mining employee working in and residing outside the municipality on the first day of October in the preceding year as determined under regulation 17 or 18, and

(iii) mines profits as calculated under section 4 of *The Mining Tax Act* and set out by the mine assessor in the notice or notices of assessment referred to in section 12 of *The Mining Tax Act* in respect to any or all mines or mineral works located in the municipality and in respect to the year preceding the year of payment,

or 100 per cent of the total of sub-clauses i and ii whichever is the greater.

(i) "register" means register provided under subregulation 1 of regulation 17.

(j) "mine or mineral work" shall not include smelters.

2. These regulations apply to designated mining municipalities only.

DESIGNATION OF MINING MUNICIPALITIES

3. The following municipalities are designated as mining municipalities for the purposes of these regulations:

- (a) the City of Sudbury;
- (b) the towns of Blind River, Capreol, Chelmsford, Cobalt, Geraldton, Haileybury, Levack, Matheson, Ojibway, Timmius;
- (c) the villages of Bancroft, Caledonia, Hagersville, Marmora;
- (d) the townships of Atikokan, Balfour, Belmont and Methuen, Black River, Blezard, Bucke, Capreol, Cardiff, Coleman, Dowling, Drury, Denison and Graham, Falconbridge, Faraday, Hagar, Hanmer, Larder Lake, Marmora and Lake, Matachewan, McKim, Michipicoten, Mountjoy, Neelon and Garson, Oneida, Playfair, Rayside, Ross, Seneca, Teck, Tisdale, Waters, Whitney;
- (e) the improvement districts of Balmertown, Beardmore, Bicroft, Elliot Lake, Gauthier, Manitouwadge, McGarry, Onaping, Red Lake, Renabie.

COMPUTATION OF PAYMENT

4. In each year the Minister shall make a payment to each mining municipality being the total of

- (a) \$40 for each mining employee shown in the register of the preceding year as resident in and working outside the municipality, and
- (b) the amount in dollars resulting from applying the adjusted mill rate to the municipal mines-assessment of the municipality.

5. In any year the Minister may reduce the total payment to any municipality to an amount equal to 50 per cent of the sum of the total of all estimates approved for grant purposes for that municipality for the preceding year and the portion of the payment for that year computed under clause *a* of regulation 4.

6. In any year that the amount of a payment computed in accordance with regulation 4 is less than the total of the mines profits tax that would be collectible for that year by the municipality if it were not designated as a mining municipality and the amount the municipality could reasonably expect under a special grant scheme of Ontario, the Minister may increase the payment to an amount equal to 50 per cent of the sum of the total of all estimates approved for grant purposes for that municipality for the preceding year and the portion of the payment for that year computed under clause *a* of regulation 4.

7. For the purpose of computing payment to a municipality in the year of designation as a mining municipality, the adjusted mill rate and the municipal mines-assessment of the municipality referred to in clause *b* of regulation 4 shall be computed in reference to the year in which the designation is made.

8. Notwithstanding clause *a* of regulation 1, in the case of a municipality designated as a mining municipality in the year of its incorporation, the adjusted mill rate for the purpose of computing the payment for the year of incorporation shall be the number of mills in the dollar determined by dividing the total of all estimates approved for grant purposes for that municipality for the said year by the total of the municipal mines-assessment and the equalized assessment of the municipality for the same year, provided that in determining the estimates approved for grant purposes the amount to be deducted as the portion of the payment computed under clause *a* of regulation 4 shall be the amount determined at \$40 per mining employee shown in the register of the year of incorporation as residing in and working outside the municipality.

9. Where in any mining municipality the last operating mine closes down, the payment in the first year after the closing and in each year thereafter shall not be computed in accordance with regulation 4, 5 or 6, but the Minister shall make a payment

- (a) in the first year equal to 100 per cent;
- (b) in the second year equal to 80 per cent;
- (c) in the third year equal to 60 per cent;
- (d) in the fourth year equal to 40 per cent; and
- (e) in the fifth year equal to 20 per cent;

of the payment made in the year in which the mine closes down.

10. Except in the cases referred to in regulation 9, if the amount payable to a mining municipality under these regulations is less in any year than the amount paid in the preceding year, the Minister may approve an amount not greater than the larger amount.

CONDITIONS OF PAYMENT

11.(1) Where a mining municipality does not comply with these regulations or does not obtain the approval of the Minister to

- (a) the estimates of the municipality and its local boards; and
- (b) the amounts to be provided for and included in the estimates whether to be provided by taxation or otherwise; and
- (c) the imposition, rating and levying of all rates, assessments and taxation upon any or all of the rateable property within the municipality; and
- (d) the rates, rents and charges imposed, levied or collectible for supply or service of any public utility; and
- (e) the imposition and charging of all licence, permit or other fees, charges and expenses; and
- (f) the sale or other disposition of any assets; and
- (g) the passing of by-laws providing for the issue of debentures, the hypothecation of debentures or the sale thereof;

the Minister may withhold the whole or any part of a payment from the mining municipality.

(2) When the municipality complies with these regulations and obtains the approvals under sub-regulation 1 within the year in respect of which the payment is computed, the Minister shall make the payment so withheld.

12. The Minister shall have access at all times to all books, records, papers and documents of a mining municipality and of every local board, including but without limiting the generality of the foregoing all assessment rolls, collectors' rolls, by-laws, minute books, books of account, vouchers and other records, papers and documents relating to its and their financial transactions, and may inspect, examine, audit and copy the same or any part thereof.

13. Where in any year the amount voted by the Legislature for the payments under these regulations is insufficient to make the payments in full, the Minister may make a *pro rata* reduction.

EQUALIZATION OF ASSESSMENT

14. For the purpose of making uniform the methods of preparing assessment rolls in mining municipalities and for ascertaining whether the valuations of real property made by the assessor of each mining municipality bear a just relation one to another, the Minister may supervise the assessment and advise the assessors with respect to any particular assessment or omission to assess or generally with respect to all the assessments, or assessments of land only, or of buildings only, or business, included in the roll or rolls.

15. The Minister may ascertain whether the values of all lands and buildings and the amounts of business assessments as set down in the assessment roll or rolls of a mining municipality bear a just relation one to another.

16.(1) In order to make a just distribution of payments as between mining municipalities the Minister may in each year with respect to each municipality equalize the real property assessments and the business assessments upon which the current year's taxes are to be levied.

(2) The real property assessment together with business assessments of a mining municipality, as equalized by the Minister, shall be the equalized assessment of the mining municipality for the purpose of these regulations.

TABULATION OF MINING EMPLOYEES

17.(1) In each year the assessor of a mining municipality shall enter in a register provided for the purpose by the clerk of the municipality, the name of every mining employee residing in the municipality, and the name of the mine or mineral work at which the person is employed and the name of the municipality in which the mine or mineral work is located.

(2) Where the mine or mineral work is located in an area without municipal organization, the word "unorganized" shall be entered by the assessor after the name of the mine or mineral work.

(3) The register duly completed and certified by the assessor shall be returned to the clerk of the municipality with the assessment roll.

(4) The clerk shall make and certify a return to the Minister showing the number of mining employees

(a) residing in and working in the municipality, and

(b) residing in and working outside the municipality as determined by the register.

18. The Minister may agree with the council of a mining municipality on the total number of non-resident employees in the municipality after a reference to the mines or mineral works or to the Ontario Mining Association has disclosed the number in the employ of the mines or mineral works on the first of October in any year.

REVOCATION

19. Ontario Regulations 197/52, 44/55, 205/55, 90/56, 26/57, 104/57, 113/57, 131/57, 271/57, 11/58 and 19/58 are revoked.

Applications to Parliament Private Bills

PUBLIC NOTICE

LEGISLATIVE ASSEMBLY OF ONTARIO

The attention of Municipal Officials, Solicitors and all other persons who may be interested in the preparation of Private Bills for submission to the Legislative Assembly of Ontario is directed particularly to the following Rules of the House governing the submission of such Bills:

RULES RE SUBMISSION OF PRIVATE BILLS

63.—(1) No petition for any Private Bill is received by the House after the first two weeks of each Session nor may any Private Bill be presented to the House after the first three weeks of each Session; nor may any report of any Standing or Select Committee upon a Private Bill be received after the first six weeks of each Session and no motion for the general suspension or modification of this Rule shall be entertained by the House unless after reference made thereof, at a previous sitting of the House, to the several Standing Committees charged with the consideration of Private Bills upon Report submitted to two or more of such committees.

64.—(1) Any person desiring to obtain a Private Bill shall deposit with the Clerk of the House at least eight (8) days before the meeting of the House a copy of such Bill together with a fee of \$150, and if such Bill is not deposited by that time the applicant shall pay \$10 for each and every day which intervenes between the said eighth day and the date of the filing of the Bill.

(2) After the first reading of the Bill and before its consideration by the Committee to which it is referred, the applicant in every case shall pay the cost of printing the Act in the Statutes.

(3) The following charges shall also be levied and paid in addition to the foregoing:

(a) When any rule of the House is suspended with reference to a Bill or the Petition therefor, for each suspension, \$50.

(b) When a Bill is presented to the House after the first three weeks of the Session and before the end of the fourth week, \$75.

(c) When a Bill is presented after the fourth week of the Session, \$100.

(4) In case of any Bill incorporating a company or increasing the capital stock of a company already incorporated, there shall be paid to the Clerk of the House, by or on behalf of the applicant, before the same is reported to the House, the same fee as would be payable to the Provincial Secretary in the case of an incorporation or increase of capital under the provisions of The Ontario Companies Act, less the sum of \$150 already paid to the Clerk of the House.

(5) When a Bill is for the purpose of confirming by-laws, bonds, debentures or other securities, or authority is asked to borrow money or to increase borrowing powers, the following additional fees shall be paid according to the amount of money involved:

On amounts less than \$10,000, \$25; on amounts over \$10,000 and up to \$25,000, \$50; on amounts over \$25,000 and up to \$40,000, \$75; on amounts over \$40,000 and up to \$75,000, \$100; on amounts over \$75,000 and up to \$125,000, \$125; on amounts over \$125,000 and up to \$175,000, \$150; on amounts over \$175,000 and up to \$250,000, \$200; on amounts over \$250,000 and up to \$350,000, \$250; and an additional fee of \$50 for every \$100,000 over \$350,000.

66. All applications for Private Bills properly the subject of legislation by the Legislative Assembly of Ontario, within the purview of "The British North America Act, 1867", shall require a Notice, clearly and distinctly specifying the nature and object of the application and, where the application refers to any proposed work, indicating generally the location of the work, and signed by or on behalf of the applicants, such Notice to be published as follows, viz.:

A notice inserted in THE ONTARIO GAZETTE and in one newspaper published in the Municipality affected, or if there be no newspaper published therein, then in a newspaper in the next nearest municipality in which a newspaper is published.

Such notice shall be continued in each case for a period of at least six weeks, during the interval of time between the close of the next preceding Session and the consideration of the Petition.

If the application is by a Municipal Corporation for authority to issue debentures the notice shall set out the particulars of the existing debenture debt and the amount of rateable property of the Municipality according to the last revised assessment roll of the Corporation, and in brief and general terms, the object for which the new issue of debentures is required.

67. Before any Petition praying for leave to bring in a Private Bill for the erection of a Toll Bridge is received by the House, the person or persons intending to petition for such Bills shall, upon giving the Notice required by preceding Rule, also, at the same time and in the same manner, give Notice of the rates which they intend to ask, the extent of the privileges, the height of the arches, the interval between the abutments or piers for the passage of rafts and vessels, and mentioning also whether they intend to erect a drawbridge or not, and the dimensions of the same.

68. Before any Petition praying for leave to bring in a Bill for the construction of Railways, Tramways or canals is received by the House, the person or persons petitioning for such Bill shall deposit with the Clerk the following documents:

1. A map or plan upon a scale of not less than half an inch to the mile, showing the location upon which it is intended to construct the proposed work, and showing also the line of existing or authorized works of a similar character within, or in any way

affecting the district or any part thereof which the proposed work is intended to serve. Such map or plan to be signed by the Engineer or other party making the same.

2. A book of reference in which shall be clearly set out the following information in separate schedules, namely:

SCHEDULE A.—The name of each municipality within which the proposed works or any part thereof are intended to be constructed; the population of each such municipality as returned by the next preceding census, the rateable value of the property within each such municipality, as returned by the next preceding assessment rolls thereof; and this schedule may contain in a separate statement similar information as to the adjoining districts intended to be served by the proposed work.

SCHEDULE B.—A general description of the nature, extent and proposed character of the contemplated works, and an estimate of the probable cost thereof, distinguishing the general items of construction and the cost thereof respectively, as well as the nature, extent and probable cost of all engines and car stock or other outfit or equipment necessary to the use and operation of the proposed undertaking, such schedule to be signed by the Engineer, or other person preparing the same.

SCHEDULE C.—An exhibit showing the total amount of capital proposed to be raised for the purposes of the undertaking and the manner in which it is proposed to raise the same, whether by ordinary shares, bonds, debentures or other securities, and the amounts of each respectively.

SCHEDULE D.—An estimate of the probable revenues of the proposed undertaking showing the sources whence the same are expected to be derived; the annual earnings thereof respectively; the probable annual cost of operation or working expenditure, and the annual net revenue applicable to the payment of interest on the proposed investments, such schedules to be signed by the person preparing the same.

72. When any Bill for confirming any Letters Patent, or Agreement, is presented to the House, the copy of such Letters Patent, or Agreement, shall be attached to it.

74. Every Private Bill, when read a first time, unless it be an Estate Bill or a Bill providing for the consolidation of a floating debt or for the consolidation or renewal of debentures (other than local improvement debentures) of a Municipal Corporation, shall stand referred to the proper Standing Committee, and all petitions before the House, for or against the Bill, are considered referred to such Committee.

75. Every Private Bill, in so far as it provides for the consolidation of a floating debt or for the consolidation or renewal of debentures (other than local improvement debentures) of a Municipal Corporation when a Bill has been read the first time, shall, without special reference, stand referred to The Ontario Railway and Municipal Board for their report; and a copy of such Bill and of the Petition on which the same is founded shall be forthwith transmitted by the Clerk of the House to the Board, in order that the Board may, after an inquiry into the allegations set out in the Bill, and into any other matters which the Board may deem necessary in connection therewith, report to the House whether or not it is reasonable that such Bill or part thereof relating to the matters aforesaid shall be passed; and what alterations, if any, should be made in the same, and the Board shall make such inquiry accordingly and shall sign the same; and the said Report, Bill and Petition shall be transmitted to the Clerk, and the Report shall be read by the Clerk at the Table and shall be entered on the Journals of the House, and the Bill, together with the Report, shall stand referred to the Standing Committee on Private Bills.

76. Every Estate Bill, when read a first time shall without special reference, stand referred to the Commissioners of Estate Bills, for their Report, and a copy of such Bill, and of the Petition on which the same is founded, shall be forthwith transmitted by the Clerk of the House to the said Commissioners, or one of them, in order that they, or any two of them, may, after perusing the Bill, without requiring any proof of the allegations thereof, report to the House their opinion thereon under their hands; and whether the provisions the allegation contained in the preamble to be proved to the satisfaction of the House, it is reasonable that such Bill do pass into a law; and whether the provisions thereof are proper for carrying its purposes into effect, and what alterations or amendments, if any, are necessary in the same, and in the event of their approving the said Bill they are to sign the same; and the said Report, with the said Bill and Petition, are to be transmitted by the said Commissioners to the Clerk; and the Report shall be read by the Clerk at the Table and shall be entered on the Journals of the House; and the Bill, together with the report shall stand referred to the Standing Committee on Private Bills, which is not to consider the said Bill before the delivery of the said Report, Bill and Petition to the Chairman of the said Committee.

77. In the event of the Commissioners of Estate Bills reporting that, in their opinion, it is not reasonable that the Bill submitted to them shall pass into law such Bill shall not be further considered.

RODERICK LEWIS
Clerk of Legislative Assembly
of Ontario.

The Ontario Flue-cured Tobacco Growers' Plan.
Amending O. Reg. 152/57.
Made—24th April, 1958.
Filed—2nd May, 1958.

REGULATIONS MADE UNDER THE FARM PRODUCTS MARKETING ACT

1. Regulation 2 of Ontario Regulations 152/57 is revoked and the following substituted therefor:

2. The local board named in schedule 1 is given all of the powers which are vested in a co-operative corporation incorporated under Part V of *The Corporations Act, 1953*, as amended from time to time.

2. Section 5 of schedule 1 of Ontario Regulations 152/57 is struck out and the following substituted therefor:

5. The local board shall consist of fifteen members elected or appointed in accordance with sections 10, 11, 12 and 13.

3. Sections 10, 11 and 12 of schedule 1 of Ontario Regulations 152/57 are struck out and the following substituted therefor:

10. Producers in each district group shall on or before the 15th of May in each year elect from its members five producer representatives to The District Flue-Cured Tobacco Growers' Committee.

ELECTION OF MEMBERS TO LOCAL BOARD

- 11. (1) A producer shall not be eligible for election to the local board for more than one district.
- (2) Where a producer is nominated for election to the local board in more than one district he shall at least ten days before the date fixed for the election, notify in writing the secretary of the local board, the district for which he will be a candidate in the election.
- (3) Where a producer fails to notify the secretary of the local board under subsection 2, the producer shall not be eligible for election to the local board in any district other than the district in which he resides.
- 12. (1) Each District Flue-Cured Tobacco Growers' Committee for Districts numbered 2, 4, 6, 8, 10, 12 and 14, as determined under clauses *b, d, f, h, j, l* and *n* of section 7, may on or before the 31st of May, 1958, elect from the producers in that District one member to the local board for a term of two years.
- (2) Each District Flue-Cured Tobacco Growers' Committee for Districts numbered 1, 3, 5, 7, 9, 11 and 13, as determined under clauses *a, c, e, g, i, k* and *m* of section 7, may on or before the 31st of May, 1958, elect from the producers in that District one member to the local board for a term of one year.
- (3) Where the term for which any member elected under subsection 1 or 2 expires in any year, the District Flue-Cured Tobacco Growers' Committee may on or before the 31st of May of that year elect from the producers in that District one member to the local board for a term of two years.
- (4) Where in any year a District Flue-Cured Tobacco Growers' Committee fails to elect a member to the local board on or before the 31st of May of that year in accordance with subsections 1, 2 or 3, as the case may be, the members of all District Flue-Cured Tobacco Growers' Committees may on or before the 15th of June of that year elect a producer in that district as the member to the local board.
- 13. (1) The members elected or appointed to the local board shall at its first meeting after the 15th of July in each year appoint
 - (a) the member not elected by District Flue-Cured Tobacco Growers' Committees, and
 - (b) such other members not elected under section 12,
 to complete the local board.
- (2) The member appointed under clause *a* of subsection 1 shall be appointed for a term of not more than one year.
- (3) Each member appointed to the local board under clause *b* of subsection 1 shall be
 - (a) a producer in the District for which he is appointed, and

(b) appointed for the term provided for under subsection 1, or 2, or, 3 of section 12, as the case may be.

(4) Where a member of the local board dies or resigns before the expiration of his term of membership, the members of the local board may appoint a producer for the unexpired term, but where the member who died or resigned was elected or appointed from a District, the producer appointed for the unexpired term shall be from the same District.

(5) Each member of the local board shall be elected or appointed to hold office until the 15th of July of the year in which the term of his membership expires.

Applications to Parliament Private Bills

PUBLIC NOTICE

LEGISLATIVE ASSEMBLY OF ONTARIO

The attention of Municipal Officials, Solicitors and all other persons who may be interested in the preparation of Private Bills for submission to the Legislative Assembly of Ontario is directed particularly to the following Rules of the House governing the submission of such Bills:

RULES RE SUBMISSION OF PRIVATE BILLS

63.—(1) No petition for any Private Bill is received by the House after the first two weeks of each Session nor may any Private Bill be presented to the House after the first three weeks of each Session; nor may any report of any Standing or Select Committee upon a Private Bill be received after the first six weeks of each Session and no motion for the general suspension or modification of this Rule shall be entertained by the House unless after reference made thereof, at a previous sitting of the House, to the several Standing Committees charged with the consideration of Private Bills upon Report submitted to two or more of such committees.

64.—(1) Any person desiring to obtain a Private Bill shall deposit with the Clerk of the House at least eight (8) days before the meeting of the House a copy of such Bill together with a fee of \$150, and if such Bill is not deposited by that time the applicant shall pay \$10 for each and every day which intervenes between the said eighth day and the date of the filing of the Bill.

(2) After the first reading of the Bill and before its consideration by the Committee to which it is referred, the applicant in every case shall pay the cost of printing the Act in the Statutes.

(3) The following charges shall also be levied and paid in addition to the foregoing:

(a) When any rule of the House is suspended with reference to a Bill or the Petition therefor, for each suspension, \$50.

(b) When a Bill is presented to the House after the first three weeks of the Session and before the end of the fourth week, \$75.

(c) When a Bill is presented after the fourth week of the Session, \$100.

(4) In case of any Bill incorporating a company or increasing the capital stock of a company already incorporated, there shall be paid to the Clerk of the House, by or on behalf of the applicant, before the same is reported to the House, the same fee as would be payable to the Provincial Secretary in the case of an incorporation or increase of capital under the provisions of The Ontario Companies Act, less the sum of \$150 already paid to the Clerk of the House.

(5) When a Bill is for the purpose of confirming by-laws, bonds, debentures or other securities, or authority is asked to borrow money or to increase borrowing powers, the following additional fees shall be paid according to the amount of money involved:

On amounts less than \$10,000, \$25; on amounts over \$10,000 and up to \$25,000, \$50; on amounts over \$25,000 and up to \$40,000, \$75; on amounts over \$40,000 and up to \$75,000, \$100; on amounts over \$75,000 and up to \$125,000, \$125; on amounts over \$125,000 and up to \$175,000, \$150; on amounts over \$175,000 and up to \$250,000, \$200; on amounts over \$250,000 and up to \$350,000, \$250; and an additional fee of \$50 for every \$100,000 over \$350,000.

66. All applications for Private Bills properly the subject of legislation by the Legislative Assembly of Ontario, within the purview of "The British North America Act, 1867", shall require a Notice, clearly and distinctly specifying the nature and object of the application and, where the application refers to any proposed work, indicating generally the location of the work, and signed by or on behalf of the applicants, such Notice to be published as follows, viz.:

A notice inserted in THE ONTARIO GAZETTE and in one newspaper published in the Municipality affected, or if there be no newspaper published therein, then in a newspaper in the next nearest municipality in which a newspaper is published.

Such notice shall be continued in each case for a period of at least six weeks, during the interval of time between the close of the next preceding Session and the consideration of the Petition.

If the application is by a Municipal Corporation for authority to issue debentures the notice shall set out the particulars of the existing debenture debt and the amount of rateable property of the Municipality according to the last revised assessment roll of the Corporation, and in brief and general terms, the object for which the new issue of debentures is required.

67. Before any Petition praying for leave to bring in a Private Bill for the erection of a Toll Bridge is received by the House, the person or persons intending to petition for such Bills shall, upon giving the Notice required by preceding Rule, also, at the same time and in the same manner, give Notice of the rates which they intend to ask, the extent of the privileges, the height of the arches, the interval between the abutments or piers for the passage of rafts and vessels, and mentioning also whether they intend to erect a drawbridge or not, and the dimensions of the same.

68. Before any Petition praying for leave to bring in a Bill for the construction of Railways, Tramways or canals is received by the House, the person or persons petitioning for such Bill shall deposit with the Clerk the following documents:

1. A map or plan upon a scale of not less than half an inch to the mile, showing the location upon which it is intended to construct the proposed work, and showing also the line of existing or authorized works of a similar character within, or in any way affecting the district or any part thereof which the proposed work is intended to serve. Such map or plan to be signed by the Engineer or other party making the same.

2. A book of reference in which shall be clearly set out the following information in separate schedules, namely:

SCHEDULE A.—The name of each municipality within which the proposed works or any part thereof are intended to be constructed; the population of each such municipality as returned by the next preceding census, the rateable value of the property within each such municipality, as returned by the next preceding assessment rolls thereof; and this schedule may contain in a separate statement similar information as to the adjoining districts intended to be served by the proposed work.

SCHEDULE B.—A general description of the nature, extent and proposed character of the contemplated works, and an estimate of the probable cost thereof, distinguishing the general items of construction and the cost thereof respectively, as well as the nature, extent and probable cost of all engines and car stock or other outfit or equipment necessary to the use and operation of the proposed undertaking, such schedule to be signed by the Engineer, or other person preparing the same.

SCHEDULE C.—An exhibit showing the total amount of capital proposed to be raised for the purposes of the undertaking and the manner in which it is proposed to raise the same, whether by ordinary shares, bonds, debentures or other securities, and the amounts of each respectively.

SCHEDULE D.—An estimate of the probable revenues of the proposed undertaking showing the sources whence the same are expected to be derived; the annual earnings thereof respectively; the probable annual cost of operation or working expenditure, and the annual net revenue applicable to the payment of interest on the proposed investments, such schedules to be signed by the person preparing the same.

72. When any Bill for confirming any Letters Patent, or Agreement, is presented to the House, the copy of such Letters Patent, or Agreement, shall be attached to it.

74. Every Private Bill, when read a first time, unless it be an Estate Bill or a Bill providing for the consolidation of a floating debt or for the consolidation or renewal of debentures (other than local improvement debentures) of a Municipal Corporation, shall stand referred to the proper Standing Committee, and all petitions before the House, for or against the Bill, are considered referred to such Committee.

75. Every Private Bill, in so far as it provides for the consolidation of a floating debt or for the consolidation or renewal of debentures (other than local improvement debentures) of a Municipal Corporation when a Bill has been read the first time, shall, without special reference, stand referred to The Ontario Railway and Municipal Board for their report; and a copy of such Bill and of the Petition on which the same is founded shall be forthwith transmitted by the Clerk of the House to the Board, in order that the Board may, after an inquiry into the allegations set out in the Bill, and into any other matters which the Board may deem necessary in connection therewith, report to the House whether or not it is reasonable that such Bill or part thereof relating to the matters aforesaid shall be passed; and what alterations, if any, should be made in the same, and the Board shall make such inquiry accordingly and shall sign the same; and the said Report, Bill and Petition shall be transmitted to the Clerk, and the Report shall be read by the Clerk at the Table and shall be entered on the Journals of the House, and the Bill, together with the Report, shall stand referred to the Standing Committee on Private Bills.

76. Every Estate Bill, when read a first time shall without special reference, stand referred to the Commissioners of Estate Bills, for their Report, and a copy of such Bill, and of the Petition on which the same is founded, shall be forthwith transmitted by the Clerk of the House to the said Commissioners, or one of them, in order that they, or any two of them, may, after perusing the Bill, without requiring any proof of the allegations thereof, report to the House their opinion thereon under their hands; and whether presuming the allegation contained in the preamble to be proved to the satisfaction of the House, it is reasonable that such Bill do pass into a law; and whether the provisions thereof are proper for carrying its purposes into effect, and what alterations or amendments, if any, are necessary in the same, and in the event of their approving the said Bill they are to sign the same; and the said Report, with the said Bill and Petition, are to be transmitted by the said Commissioners to the Clerk; and the Report shall be read by the Clerk at the Table and shall be entered on the Journals of the House; and the Bill, together with the report shall stand referred to the Standing Committee on Private Bills, which is not to consider the said Bill before the delivery of the said Report, Bill and Petition to the Chairman of the said Committee.

77. In the event of the Commissioners of Estate Bills reporting that, in their opinion, it is not reasonable that the Bill submitted to them shall pass into law such Bill shall not be further considered.

RODERICK LEWIS
Clerk of Legislative Assembly
of Ontario.

May 17th, 1958

THE LAND TITLES ACT

O. Reg. 111/58.

Code of Standards and Procedure for Surveys and Plans.
New and Amending Regulations 237 of Consolidated Regulations of Ontario, 1950.
Made—1st May, 1958.
Filed—5th May, 1958.

REGULATIONS MADE UNDER THE LAND TITLES ACT

CODE OF STANDARDS AND PROCEDURE FOR SURVEYS AND PLANS

INTERPRETATION

1. In these regulations

- (a) "subdivision unit" means an area of land delineated by a survey of official record and includes
- (i) a township lot, city lot, town lot or village lot, section, block, gore, reserve, common, mining location and mining claim, or
 - (ii) a lot, block or other surveyed land shown on a plan registered under *The Land Titles Act* or *The Registry Act*;
- (b) "surveyor" means an Ontario Land Surveyor registered under *The Land Surveyors Act*.

2. These regulations shall be deemed to supplement the provisions of *The Surveys Act* and where a surveyor makes a plan of survey for registration under *The Land Titles Act* he shall make the survey in accordance with these regulations.

PART 1

GENERAL

3. Before a final survey is undertaken the surveyor shall refer to instruments of record containing a description of the lands to be surveyed and any uncertainty in the description shall be referred to the director of titles to be investigated and clarified.

4. Where a monument is restored or re-established regard shall be had to previous surveys of official record as evidence of its original position.

5.(1) A plan submitted for registration or to be of record in a Land Titles Office shall not be registered or be placed on record until it has been approved by the examiner of surveys or by such other person as may be designated by the director of titles, and prior to such approval being given the director may require the survey thereof to be examined on the ground by the examiner or by a person designated by the director who may require further information or material to explain any seeming discrepancy between the plan and the descriptions or plans of prior record, or of any other matter which is deemed by the director to require explanation.

(2) Subregulation 1 shall not apply to a plan of highways certified by an official authorized under *The Highway Improvement Act, 1957*, a plan of public lands

signed by the Surveyor General under *The Public Lands Act* or a plan signed by the Surveyor General of Canada Lands under the *Canada Lands Survey Act*, except where the title to the land shown on the plan is in dispute.

6. The requirements of all statutes and regulations which affect the lands shown on a plan shall be ascertained and complied with before the plan is submitted for approval.

7. Before a plan is presented for registration or to be of record a paper print of the plan shall be submitted to the examiner of surveys by the surveyor of the plan with such explanatory notes and such copies of field notes as may be required to enable the examiner to determine whether the survey and the plan conform to these regulations.

8. The examiner of surveys with the concurrence of the director of titles may approve a plan for registration or to be of record although not complying strictly with the requirements of these regulations.

9. Upon approval of a plan the examiner of surveys or such other person as has been designated by the director of titles shall endorse his approval on the plan.

PART 2

STANDARDS OF SURVEY AND MONUMENTATION

10. Every angle of the exterior boundaries of the land being surveyed shall be determined by measured and closed traverse or triangulation.

11. The position of a natural boundary which forms a boundary of the lands being surveyed or which governs the position of that boundary shall be determined by

- (a) periodic offsets at such intervals as the complexity of the natural boundary demands, and to such extent as will enable relocation of the natural boundary, said offset measures to be of not greater length than 250 feet and at not greater intervals than 300 feet along a reference traverse or line;
- (b) stadia side shots from a controlled traverse to record the position of the natural boundary to the same standards as prescribed by clause a; or
- (c) photogrammetric methods.

12. The error of actual field measurements of angles and distances whether determined by check measurements or by mathematical computation shall not exceed one in 5000.

13. The surveyor shall plant monuments of the kinds described in section 12 of *The Surveys Act* so that the interval between monuments shall not exceed 500 feet.

14.(1) Each corner of subdivision units and each line not defined by monuments under section 12 of *The Surveys Act* shall be defined by

- (a) a solid iron bar not less than one-half inch square and not less than twenty-four inches long; or
- (b) an iron pipe or iron tube not less than one inch in outside diameter and not less than twenty-four inches long; or

- (c) a square wooden stake not less than one and three-quarter inches square and not less than eighteen inches long; or
- (d) when placed in solid rock, by a half inch square iron bolt, three inches long, leaded or cemented in a hole drilled in the rock.

(2) Notwithstanding subregulation 1, and subject to the approval of the director of titles and such conditions as he may think proper, a subdivision may be evidenced by monuments of a permanent character which with the information on the plan showing their location establish the block outlines of the survey, and the plan of subdivision when registered shall be *prima facie* evidence of the manner in which each block of land is subdivided.

PART 3

PLANS

15.(1) A plan

- (a) shall be drawn on the dull side of durable linen that is not waterproof and is of such quality that opaque or transparent reproductions may be made by either a wet or dry process without damaging the plan or the print;
- (b) shall be drawn in black india ink only and show no colouring of any kind whatsoever;
- (c) shall be drawn to a professional standard of draughtsmanship and be neat and clear and in fit condition for making reproductions;
- (d) shall have all letters, figures and symbols printed in black india ink and no writing shall appear on the face of the plan except the signature of the surveyor and of the persons who are required to sign the plan, and where signatures are required they shall be signed in black india ink under which shall be legibly printed the name of the person signing;
- (e) shall be certified by the surveyor;
- (f) shall be signed and certified by the owner or by such other person whose signature is required;
- (g) shall be complete and correct without amendments, corrections or erasures but a plan containing amendments, corrections or erasures may be accepted at the discretion of the director of titles;
- (h) shall have printed thereon the word "ORIGINAL" in bold letters one-quarter inch high initialled by the surveyor.

(2) Where the plan is a plan of Crown land, a duplicate of the plan may be registered in place thereof.

16. No part of a plan or of any certificate, approval or other matter required thereon shall be stamped, typewritten, stencilled, lithographed or engraved, but the director of titles may accept a plan notwithstanding that the title, legend, form of the surveyor's certificate or margin is printed, if machine printed with metallic overprint ink.

17. A plan shall be drawn to a scale sufficient for clarity of all particulars on the plan.

18. All lineal measurements on a plan shall be shown either in feet and decimals of a foot or in feet and inches.

19. Bearings shall be referred to a governing line which shall be shown on the plan and defined on the ground by two monuments, one at or near each extremity of the line.

20. The bearing of the governing line shall be shown on the plan as "astronomic" where its direction has been determined by the surveyor by astronomic observation and the bearing shall be related to the meridian through a point on the line identified by a monument.

21. The bearing of the governing line shall be shown on the plan as "assumed" if its direction has been obtained from a line of known astronomic bearing or if taken from a prior registered plan.

22. Directions shall be shown on the plan in quadrantal bearings referred to the cardinal points of the compass.

23. Sufficient data shall be shown on the plan to permit the calculation of a closure about each subdivision unit created thereby and the lineal error of closure of the exterior boundaries of the surveyed area or of any subdivision unit within its limits shall not exceed one in 5000.

24. There shall be clearly shown on a plan by broken lines sufficient information to enable the identification to be made of

- (a) the limits of pre-existing subdivision units or limits defined by registered descriptions of lands included within the lands surveyed and shown on the plan, and
- (b) the limits of the lands adjacent to the land being surveyed; and
- (c) the identifying numbers or letters of the lands in clauses a and b.

25. The outer limits of the area of land shown on a plan shall be shown by a heavier black line than the lines of survey or delineation either within or without the area.

26.(1) A plan shall show the position and form of all survey monuments and other evidence found and on which the survey is based and complete data of the monuments planted.

(2) Where a monument referred to in subregulation 1 of regulation 14 is shown on a plan it shall be designated on the plan by the abbreviation "IB", "IP", "WS" or "IB rock" respectively, as the case may be.

(3) Where monuments of a type other than those described in subregulation 1 of regulation 14 are shown on the plan by symbols or abbreviations, the meaning of the symbols and abbreviations designating the monuments shall be given in a legend of the plan.

(4) Monuments found shall be identified by the abbreviation "Fd".

(5) Where monuments are not planted in accordance with any law in that behalf, the explanation for not doing so shall be noted on the plan.

27.(1) The true measurements of distances and directions obtained by the surveyor in the course of survey on the ground shall be shown on the plan.

(2) Where a measurement on a plan differs from that shown in the register or on a prior registered plan, the difference shall be indicated in brackets on the plan by the abbreviation "Meas." after the measurement, and the corresponding measurement in the register or on the prior plan shall be shown followed by "register", or "plan No....." showing the number of the plan as the case may be, respectively.

(3) Where a measurement on a plan differs from that shown in a deed or on a prior plan registered under *The Registry Act*, the difference shall be indicated in brackets on the plan by the abbreviation "Meas." after the measurement, and the corresponding measurement in the deed or on the prior plan shall be noted followed by "deed No....." or "plan No.....", as the case may be, showing the number of the deed or plan, respectively.

28.(1) Subject to subregulation 2, every plan shall contain a true copy of the field notes of the survey and the field notes shall be certified on the plan by the surveyor as follows:

Certified a true copy of the field notes of survey.

(date) (sgd) Ontario Land Surveyor

(2) Where the field notes can not conveniently be shown on the plan they shall be shown in black india ink on a separate plan prepared for the purpose, or on a paper print of the plan, or in book form, and shall be certified on the plan by the surveyor as follows:

Field notes (or a true copy of field notes, as the case may be) of survey are filed under No.....

.....in the office of Land Titles
at.....

(date) (sgd) Ontario Land Surveyor

(3) The field notes shall include

- (a) a title including the designation "Field Notes of";
- (b) a complete record in graphical form showing all lines run and distances or angles measured or bearings determined;
- (c) a complete record of all governing evidence found, including descriptions of monuments and post markings;
- (d) a complete record of all evidence created, including descriptions of monuments and post markings;
- (e) a complete representation of all information recorded that relates to title or that is of use in a re-survey;
- (f) the designation of all assumed or computed data and the source of derived or assumed data;
- (g) where the field notes are filed under subregulation 2, they shall be certified by the surveyor as being either the original field notes or a true copy thereof.

29. A plan shall show

- (a) the bearing and length of each straight line forming any limit or part of any limit of every lot, block, street, lane or public passage, except that in the case of a tier of lots that is shown by dimensions to be a series of parallelograms, the directions of the side lines of the lots may be indicated by the bearings at both ends of the tier;
- (b) the radius length, arc length, chord length and chord bearing of each curved line forming any limit or part of limit of every lot, block, street, lane or public passage;
- (c) the perpendicular or radial widths of all streets, lanes and public passages of which the limits are parallel or concentric;

(d) the straight line distances and bearings between the points of street intersections on the same side of the street and where all or part of the intersections are on curves, the radius, arc length, chord length and bearing of the curved portion;

(e) the location of the centre of an arc which forms the end of a cul-de-sac, clearly defined with reference to the street or streets approaching the cul-de-sac.

30.(1) Every curve shall be defined by its radius.

(2) Where the arc of a simple curve joins two lines that are not tangents to the curve the bearing of the tangents or of the radii at the beginning and end of the curve shall be shown.

(3) Where space does not permit the showing of the chord length and bearing of the radii in their normal position in respect to the curve, they may be shown in schedule form at some other convenient place on the plan.

31.(1) There shall be shown on every plan all roads, streets, lanes, railway lands, rivers, canals, streams, lakes, mill ponds and marshes lying within or abutting the surveyed lands.

(2) Topographical information that does not relate to the definition of limits of subdivision units shall not be shown.

(3) Natural boundaries shall be accurately plotted on the plan.

(4) Where traverse lines are shown from which natural boundaries have been defined on the ground, complete particulars shall be shown on the plan, including

- (a) bearings, distances and lengths of offsets and the angles which they make with the respective traverse lines;
- (b) bearings and distances of stadia side shots;
- (c) information relevant to any other method by which a natural boundary is determined; and
- (d) information relating to the boundaries and ties with other surveys and land boundaries.

(5) The particulars required by subregulation 4 shall be shown along the appropriate course on the plan, but where this is not practicable they may be shown in a schedule if they are identified and related to the appropriate course on the plan.

32. Each subdivision unit into which an area of land is subdivided shall be designated on the plan by a number or letter or by words and if the designation is by numbers or letters these shall follow consecutively and there shall not be more than one subdivision unit on the plan designated by the same number, letter or words.

33. A subdivision unit on a plan of survey shall not be designated as a "parcel".

34. Subject to regulation 35, a plan shall not contain information describing the purpose for which any portion thereof is intended to be used.

35. Roads, streets, highways, lanes and reserves shall be so designated on the plan.

36. An easement or other right of way existing on the date of registration may be shown on the plan if designated and treated as a subdivision unit.

37. Each plan shall bear a title showing the designation of every original subdivision unit the whole or a portion of which is being surveyed and in case of re-division shall show the number of the last registered plan thereof.

38. Each plan shall show under the title the scale to which the plan is drawn, the name of the surveyor and the year in which the survey was completed.

39. A simple north point accurately plotted shall be placed in a conspicuous position on each plan.

PART 4

REGISTERED PLANS OF SUBDIVISION

40.(1) A registered plan of subdivision shall not exceed 24 inches in width or 30 inches in length, including a margin not exceeding one-half inch, and where the survey is of such an extent that it requires a larger size the plan shall be divided into parts each of which shall not exceed the maximum size, and a plan shall not be registered in more than two parts.

(2) Where a plan is in two parts the surveyor shall identify the parts as "Part 1 of 2 Parts" or "Part 2 of 2 Parts" as the case may be, in the upper right corner leaving a clear space of one and one-half inches below the top margin and in bold print one-quarter inch high.

(3) The surveyor's certificate in Form A shall be endorsed on the first part of the plan and he shall sign the second part under the notation "Part 2 of 2 Parts".

(4) A space of 4 inches by 4 inches shall be left unused

(a) in the upper right corner of the plan, or

(b) when the plan is in two parts on the first part of the plan under the words "Part 1 of 2 Parts".

41.(1) A certificate of the owner in Form B shall be endorsed on every plan of subdivision.

(2) No corporate seal shall be embossed on a plan, duplicate plan or mounted duplicate plan, but the words "Corporate Seal" shall be printed beside the signatures of the authorized signing officers who certify the plan in Form B on behalf of the corporate owner.

42. Every plan of subdivision submitted for registration under section 107 of the Act shall be accompanied by a Plan Document which shall consist of an application in Form C, an owner's certificate in Form D supported by an affidavit of execution in Form E or Form F, as the case may be, and where there is a charge or mortgage on the lands, a consent of the chargee or mortgagee in Form G supported by an affidavit of execution in Form E or Form F as the case may be.

43. Upon registration of a plan, the duplicate plan and the mounted duplicate plan the proper master of titles or his deputy shall endorse the plan, the duplicate plan and the mounted duplicate plan by his certificate in Form H.

44. The surveyor of a plan of subdivision shall endorse on the plan the following notation:

"Certificates, consents and dedications are filed under No

45. A duplicate plan shall be a mechanically reproduced copy of the plan of which it is the duplicate, on such linen and by such process as the director of titles may approve.

46.(1) A mounted duplicate plan shall be mounted with square corners on stiff pasteboard of good quality or other backing approved by the director of titles and 24 inches in width by 30 inches in length.

(2) A mounted duplicate of a plan registered in The Land Titles Office for the County of York shall be 24 inches in width by 32 inches in length.

(3) A mounted duplicate plan shall be mechanically reproduced from the plan of which it is the duplicate, on opaque white linen, or on such other linen or by such other process as the director of titles may approve.

47. The lands shown on a mounted duplicate plan shall be coloured a light shade of pink to designate lots and blocks, brown to designate streets, lanes and street widenings and green to designate reserves.

48. Every duplicate plan and every mounted duplicate plan shall bear the word "DUPLICATE" in bold print one-quarter inch high and initialled by the surveyor.

49. Where the title of part of the land shown on a plan is subject to a mortgage or charge registered prior to the plan, the proper master of titles may require a paper print of the plan showing the areas affected by the mortgage or charge to be affixed to the reverse side of the mounted duplicate plan.

50. Where an error is corrected on a plan after registration the correction shall be certified in Form I by

(a) the master of titles at Toronto where the plan is registered in the Land Titles Office for the County of York;

(b) the director of titles where the plan is registered in a land titles office other than the Land Titles Office for the County of York.
